

**REQUEST FOR PROPOSAL FOR SELECTION OF
SYSTEM INTEGRATOR FOR DESIGN,
DEVELOPMENT, IMPLEMENTATION AND
MAINTENANCE OF “ANNA DARPAN”**

FOOD CORPORATION OF INDIA

**FCI Headquarters
16-20 Barakhamba Lane,
New Delhi – 110001**

Disclaimer

- a. The information contained in this Request For Proposal (RFP) document or subsequently provided to the bidder, either verbally, via documents or any other form by or on behalf of Food Corporation of India (FCI) or any of its employees or advisors, is provided to the bidder based on the decided terms and conditions mentioned in this RFP document.
- b. This information is on a wide range of matters, some of which depend upon interpretation of law. While every effort has been made to provide comprehensive and accurate background information, requirements, and specifications, bidders shall form their own conclusions about the services required.
- c. Bidders of this RFP shall consult their own legal advisors in relation to this RFP.
- d. All information supplied by bidders shall be treated as contractually binding on the bidders upon successful award of the assignment by FCI based on this RFP. No commitment of any kind, contractual or otherwise shall exist until and unless a formal written contract has been executed by or on behalf of FCI.
- e. FCI may cancel this RFP at any time prior to a formal written contract. Once a bidder has been selected through this e-tendering process and awarded a formal contract for execution of work as defined in this RFP and its corrigenda, the respective bidder shall be bound to carry out all activities defined under this RFP for design, implementation, and maintenance of entire application.
- f. If post award the selected bidder retracts from carrying out such work, PBG (including e-BG) shall be forfeited and FCI shall award the work to any alternate party at the risk, cost, or responsibility of the selected bidder.
- g. FCI, its employees and advisors make no representation or warranty and shall have no liability to any person including any bidder under any law, statute, rules, regulations or tort, principles of restitution or unjust enrichment or otherwise for any loss, damages, cost or expense which may arise from or be incurred or suffered on account of anything contained in this RFP document or otherwise, including the accuracy, adequacy, correctness, reliability or completeness of the RFP document and any assessment, assumption, statement or information contained therein or deemed to form part of this RFP document or arising in any way in this selection process.
- h. FCI also accepts no liability of any nature whether resulting from negligence or otherwise however caused arising from reliance of any bidder upon the statements contained in this RFP document.
- i. FCI may in its absolute discretion, but without being under any obligation to do so, update, amend or supplement the information, assessment or assumption contained in this RFP document.
- j. In all matters regarding doubts raised by bidders on the clauses of the RFP, interpretation of clauses, scope, terms, and conditions, as stated in this RFP and/or its subsequent corrigenda/addenda, if any, the decision of FCI shall be final and binding on all bidders. The issue of this RFP document does not imply that FCI is bound to select any bidder or to appoint the selected bidder for the assignment. FCI reserves the right to reject in full or part, any, or all bids without assigning any reason thereof. FCI

reserves the right to assess the bidder's capabilities and capacity. The decision of FCI shall be final and binding.

- k. The bidder shall bear all costs associated with or relating to preparation and submission of its bid including preparation, copying, postage, delivery fees, expenses or any other requirement associated with any demonstrations or presentations which may be required by FCI, formation or any other costs incurred in connection with or relating to its bid. All such costs and expenses shall remain with the bidder and FCI shall not be liable in any manner whatsoever for the same or for any other costs or other expenses incurred by a bidder in preparation or submission of the bid, regardless of the conduct or outcome of the selection process.

Critical Dates & Time

Last date and time for submission of queries	7th December 2023, 11:59 PM
Pre-bid conference date and time	8th December 2023, 3:00 PM
Date and time for submission of online bids	10th January 2024, 3:00 PM
Date and time of opening of technical bids	10th January 2024, 3:30 PM
Date and time of opening of commercial bids	Shall be intimated later

Fact Sheet

Related Clause	Details
Method of Selection	The method of selection of vendor for this RFP is Quality and Cost-Based Selection (70:30)
RFP Release	The RFP document will be published on the Government e-Marketplace (GeM): https://gem.gov.in/ and on the official website of the Food Corporation of India (FCI): https://fci.gov.in/ on 5th December 2023. The interested bidders can download the RFP and other detailed terms & conditions from the GeM Portal or FCI website after registration, which is free of cost. Start date for RFP document for further action by bidders: 5th December 2023 End date and time to download RFP document: 10th January 2024, 3:00 PM
Service/Product Requirement	The RFP is to provide turnkey services for design, development, implementation, and maintenance of ANNA DARPAN. The system shall be implemented as an advanced version of the existing supply chain management system with latest technology architecture, addition of new modules, coverage of additional functionalities, digitization of existing processes & legacy data (if required), a user-friendly mobile application in both Android & iOS operating systems.
Pre-Bid Meeting Details	A pre-bid meeting will be held on 8th December 2023, 3:00 PM at Board Room, 3rd Floor, FCI Headquarters, New Delhi The name, address, and telephone numbers of the Nodal Officer is: The Chief General Manager (IT) Food Corporation of India 16-20, Barakhamba Lane New Delhi – 110001 E-mail: gmit.fci@nic.in Bidders are requested to send their pre-bid queries to FCI by 7th December 2023, 11:59 PM prior to the pre-bid meeting scheduled on 8th December 2023, 3:00 PM via email to: agm2it.fci@gov.in. Pre-bid queries shared via mode other than specified shall not be acknowledged.
Language	Proposals shall be submitted in English ONLY Supporting documents and printed literature furnished by the bidder with the bid may be in any other language if they are accompanied by translations in the English language, duly authenticated and certified by the bidder. Supporting materials, which are not translated into English, may not be

Related Clause	Details
	considered. For interpretation and evaluation of the bid, the English language translation shall prevail.
Proposal Validity	Bids must remain valid up to 90 days from the date of opening of Technical Bid. However, FCI reserves the right to extend this period by another 30 days at its discretion, which shall be binding on the bidders. Thereafter, this period may be further extended by the parties on mutual consent.
Proposal Submission Type	The bidders shall submit their responses in 2 parts namely “Pre-Qualification & Technical Proposal” and “Commercial Proposal” by the due date and time. The online packets containing the Proposal shall include the Scanned copy of all relevant documents, serially numbered, and duly signed on each page by the bidder. All documents as required to be submitted needs to be digitally signed or self-attested by the Authorized Signatory.
Proposal Submission address	The bidders are required to submit the soft copies of their bids electronically on Government e-Marketplace: https://gem.gov.in/ using valid Digital Signature Certificates.
Submission Date	Proposals must be submitted electronically no later than 10th January 2024, 3:00 PM on the Government e-Marketplace (GeM). Please note that the server time, which is displayed on the bidder’s dashboard, will be considered as the standard time for referencing the deadlines for submission of the bids by the bidders. The bidders shall follow this time during bid submission.

Important Definitions

Term	Description
Bidder	The term 'bidder', wherever it occurs, shall refer to a party that submits a bid in response to the request for proposal (RFP) offering their pricing, terms, and other relevant details or conditions.
Bidding Document	Documents issued by FCI including any amendments thereto, that set out the terms and conditions of the given procurement and includes the invitation to bid.
Contract	The term 'Contract', wherever they occur, shall mean, and include the contract agreement signed between the bidders selected from this e-tendering process and FCI for executing this project. Terms and expressions not herein defined shall have the meaning assigned to them in the Indian Contract Act, 1872, or the General Clauses Act, 1897.
Contract/Project Period	The Contract/Project Period is number of days as outlined in the contract that the contract shall run for.
Commercial Bid	The term 'Commercial Bid', wherever it occurs, shall mean the "price bid" and all documents (Please refer Section 17 for details)
SLA	Service Level Agreement (SLA) is a negotiated agreement between two parties wherein one is the customer, and the other is the service provider. It is a service contract where the level of service is formally defined. In practice, the term SLA is sometimes used to refer to the contracted delivery time (of the service) or performance.
Technical Bid	The term 'Technical Bid', wherever they occur, shall mean all documents required as part of Eligibility Criteria under Section, technical solution, approach and methodology and all forms and formats as applicable (Please refer Section 13 – Appendix – III for details) required to establish eligibility of the participating bidders for executing this project.
Turnkey Services or Project	The term 'Turnkey Services' or 'Project', wherever they occur, shall mean a type of project in which a firm/agency/company/contractor/supplier/vendor is responsible for providing a complete, ready-to-use product or service to the client or customer.

Structure of the RFP

This RFP is meant to invite bids from interested system integrators (“Bidders”) capable of delivering the services described in this document. The complete RFP is contained in two parts as explained below:

Part A: Technical Bid

It comprises of following four sections:

I. Project Background and Scope of Work

This section of the RFP details out all information that may be required by potential bidders to understand the background of the RFP issuing authority i.e., Food Corporation of India (FCI), the background of the project and the complete scope of work, technical and functional requirements of the intended integrated supply chain management system “ANNA DARPAN”.

II. Instructions to Bidders (ITB)

This section of the RFP details out the general information that FCI deems necessary to share with potential bidders concerning this RFP.

III. Terms and Conditions of Contract

This section of the RFP details out all the information that may be required by potential bidders to understand the contractual & legal terms and conditions.

IV. Appendices

This section of the RFP contains all appendices to this RFP enlisting the forms and formats of technical bid submission, current state assessment and issues, functional requirements specification (FRS) and technical specifications for the ANNA DARPAN, procedure for online bid submission and other supplementary information.

Part B: Commercial Bid

It comprises of commercial bid covering letter, instructions to submit commercial bid and commercial bid format.

PART A – TECHNICAL BID

SECTION I - PROJECT BACKGROUND & SCOPE OF WORK

1 About the Organization

1.1 About Food Corporation of India (FCI)

The Food Corporation of India (FCI) is one of the premier organizations of Government of India (GoI) setup under the Food Corporation Act 1964, to fulfil the objectives of the Food Policy.

Since its inception, FCI has played a highly significant role to fulfil the key objectives of the food security policy of the GoI, which includes effective price support operations for safeguarding the interests of the farmers, distribution of foodgrains throughout the country for public distribution system, maintaining satisfactory level of operational and buffer stocks of foodgrains to ensure national food security.

FCI's objectives are:

- a. Effective price support operations for safeguarding the interests of the farmers.
- b. Making foodgrains accessible at reasonable prices, especially to the weak and vulnerable sections of the society under Public Distribution System (PDS).
- c. Maintaining satisfactory level of operational and buffer stocks of foodgrains to ensure National Food Security.
- d. To make foodgrains available at reasonable prices, particularly to vulnerable sections of the society.
- e. To intervene in market for price stabilization.
- f. Efficient procurement at Minimum Support Price (MSP), storage and distribution of food grains.
- g. Ensuring availability of foodgrains and sugar through appropriate policy instrument.

FCI has been entrusted with the responsibility of execution of the Food Policies of the GoI in the areas of procurement, storage, movement, and distribution of foodgrains across the nation. FCI has put a great emphasis on improving its operational efficiency, handling the complex and dynamic operations, spread throughout the country, through use of IT enabled systems for efficient and fast paced decision making. It has played a significant role in India's success in transforming the crisis management – oriented food security into a stable security system.

1.2 Organizational Structure of FCI

The organizational structure of FCI comprises of 198 administrative offices across the nation to manage its overall operations:

- a. 1 Headquarters (FCI HQ)
- b. 5 Zonal Offices (ZO)
- c. 26 Regional Offices (RO)
- d. 165 Divisional Offices (DO)
- e. Institute of Food Security (IFS).

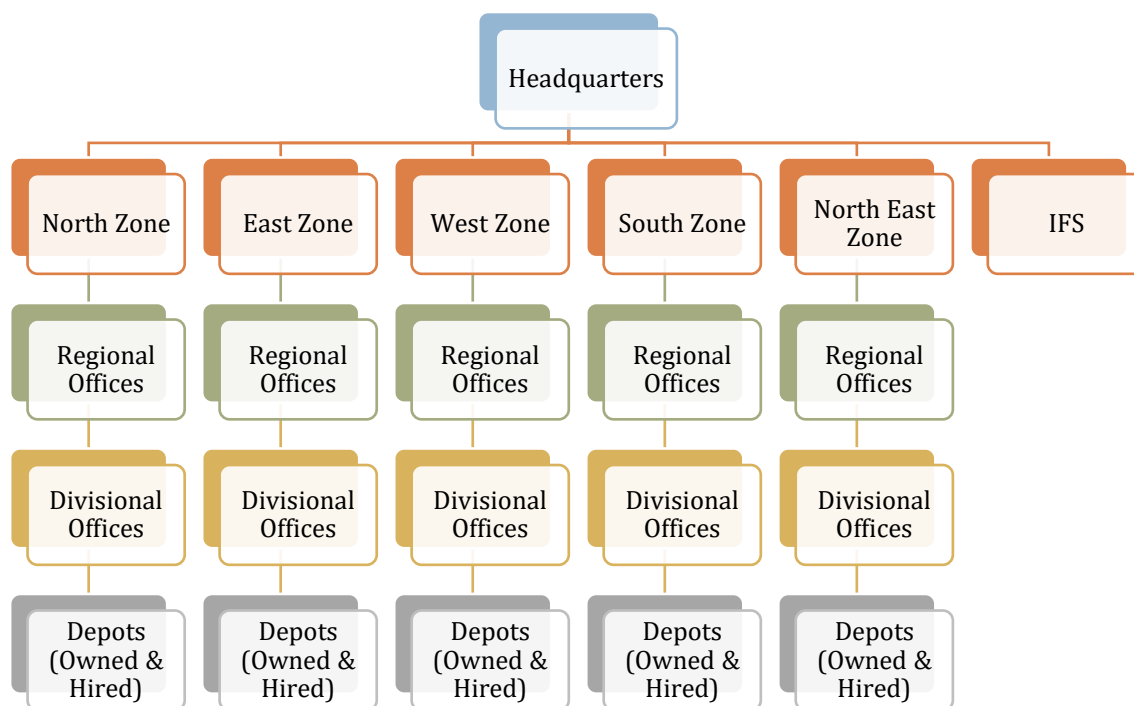

Figure 1: Organization Structure of FCI

#	Branches and Supporting Units	Description
1	Headquarters	FCI Headquarters is in New Delhi. It is headed by the Chairman and Managing Director (C&MD) and supported by a team of Executive Directors (EDs).
2	Zones	FCI Zonal Offices are in Noida (North Zone), Mumbai (West Zone), Chennai (South Zone), Kolkata (East Zone) and Guwahati (Northeast Zone). Each zone is headed by an Executive Director (Zone) and supported by a team of General Managers (GMs).
3	Regions	FCI Regional Offices are headed by a General Manager and supported by a team of Deputy General Managers (DGMs).

#	Branches and Supporting Units	Description
4	Divisions	The Divisional Offices are headed by Assistant General Managers (AGM) (also known as Divisional Managers) and supported by a team of Managers.
5	Depots	Under each Divisional office, there are depots (owned and hired) to manage the stock of the food grains.

1.3 Project Background

FCI has undertaken a digital transformational journey to implement **ANNA DARPAN, a microservices based integrated supply chain management system** to cater to end to end supply chain operations and services at Mandis, Mills, Depots (Owned/Hired), Divisional, Regional, Zonal, and HQ level with the upgraded technology, IT environment and architecture. The application is envisioned to be designed using a service mesh architecture for communication among the microservices and API based integration with external applications associated with FCI.

In addition to development of the core applications / microservices, it is envisaged to develop a centralized analytics platform for better data driven decision making. The analytics platform shall comprise of data lake, data warehouse, data pipeline and associated analytical solutions for the purpose of analytics, reporting and dashboard (having key KPIs from various other systems of FCI). (Please refer to Section 16 – Appendix – VI of this RFP for overview of other FCI applications).

The various stakeholders involved are as below:

#	Stakeholder
1	Headquarters, FCI
2	Zonal, Regional and Divisional Offices under FCI
3	Ministry of Consumer Affairs, Food and Public Distribution
4	Ministry of Agriculture
5	FSSAI
6	Department of Food and Public Distribution
7	Ministry of Railways
8	Private Transporters
9	Central Warehousing Corporation

#	Stakeholder
10	State Warehousing Corporation
11	Owned and Hired Depots under FCI
12	State Government Agencies
13	Labour Unions, Gangs & Contractual Employees under FCI
14	National Informatics Centre

2 Objectives of ANNA DARPAN

The ANNA DARPAN has been envisioned to fulfil certain objectives, which are aligned with the vision of FCI leadership. ANNA DARPAN is formulated in line with the key objectives, which shall help in eliminating the challenges of the current state of existing FCI applications.

Key objectives of the envisaged ANNA DARPAN are:

- a. **Improved Efficiency and Productivity:** Streamlined processes, reduced manual interventions, and automated repetitive tasks leading to improved efficiency and increased productivity throughout the organization.
- b. **Interactive and User-Friendly UI design:** To implement a user centric solution with interactive design components. The system shall be intuitive, visually appealing, and organized in a way that allows users to navigate the system with ease.
- c. **Role-Based Access:** To allow a role – based access to different modules and data within the system where users shall be granted permissions based on their roles and responsibilities. This ensures access to relevant information only based on the respective job functions.
- d. **Data-Driven Decision Making:** Utilization of data analytics techniques and business intelligence to drive decision-making processes leading to more informed and effective choices at various levels of the system.
- e. **Integration with Internal and External Systems:** Creation of standard APIs to establish seamless communication, data sharing and functionality between various internal and external applications which shall contribute to ease of access and data flow.
- f. **Merger of Existing Internal Systems:** Merger of various internal systems to facilitate seamless sharing of information and functionality through a single application.
- g. **Mobile First:** To have a lighter version of the said system in form of a mobile application, where role-based access for users shall also be available. This mobile application shall be able to scan encrypted QR codes, barcodes, RFID tags and similar solutions.
- h. **Improved Feedback Mechanisms:** To implement an improved feedback mechanism and regularly seeking feedback from users to incorporate improvements based on their suggestions to refine the system and enhance ease of access over time.
- i. **Standardization of Technology Stack:** To have proper utilization of compute and storage, enhanced security features, seamless integration with modern IoT devices and analytics.

3 Scope of Work

The ANNA DARPAN is envisioned to be a turnkey project (including provisioning of cloud environment for hosting the solution) which shall be implemented as an advanced version of the existing supply chain management system with latest technology architecture, addition of new modules, coverage of additional functionalities, digitization of existing processes & legacy data (if required) and a user-friendly mobile application in both Android & iOS operating systems.

The purpose is to develop **preferably an open-source solution (having enterprise support for production environment)** for development of ANNA DARPAN application resulting in a single source of information for FCI, Department of Food & Public Distribution (DFPD) and other involved stakeholders.

ANNA DARPAN shall comprise of functionalities for following indicative modules (Please refer Section 11.1 of this RFP for detailed Functional Requirements):

- a. **Procurement:** The module shall provide access to the users with procurement of wheat, paddy and other foodgrains from farmers at mandis/purchasing centres, with additional capabilities to create procurement plans and monitor them.
- b. **Movement:** The module shall provide functionalities related to movement planning of stocks between depot to depots and mandis/purchasing centre to depots via optimal route and using the most suitable mode of transport viz rail, road, and ship.
- c. **Storage:** This module shall have details regarding storage management of the foodgrains procured by FCI and state government agencies (on behalf of FCI) which are stored in FCI owned godowns or FCI hired godowns across the States. Additional features to include recording truck in/out at gate entry, weighment of stocks, quality, and storage, shed inspections, disinfestation of foodgrains, inspections, gunny accounting or similar in the depots/warehouses.
- d. **Quality Control & Physical Verification:** The module shall have the functionality for quality management and physical verification activities like quality check, analysis on periodic basis and analysis performed by Manager (Quality Control) and Technical Assistants.
- e. **Asset and Inventory Management (Stores):** This module shall provide an overview of storing and tracking information about assets such as equipment, facilities as well as other inventory. Also optimizing operations by ensuring that assets and inventory are utilized effectively, reducing waste, and improving overall productivity.
- f. **Sales & Import/Export:** The module shall have provision to manage various schemes launched by the GoI under which the commodity shall be issued to the states and other entities. Additional features to include generation of release order by DO staff and supply the required commodity against that release order, management of imports and exports of commodities or similar.
- g. **Engineering & Maintenance:** The module shall allow users to raise and schedule requests for engineering and maintenance work to be carried out in FCI depots and offices.
- h. **Contract Management:** The module shall capture details of the users in management of transporter contracts, miller contracts, other service providers like gunny bags, securities, plumber, or electric service or similar.

- i. **Labor Management:** The module shall allow the users to manage operations including workforce planning, labor contracting and payments, work assignments and monitoring or similar tasks.
- j. **Ticketing Mechanism:** This module shall allow logging and tracking of issues observed in ANNA DARPAN. A dedicated cloud-based SLA management tool shall be in place offering complete solution for proactive monitoring of real-time alerts and proactive/reactive incidents.
- k. **User Management:** The module shall allow the system administrator to create and manage user accounts, assign roles & access to functionalities at various levels.
- l. **Masters:** The module shall allow storage of common data about users, units, suppliers, materials, accounts, and other critical “entities” that is commonly stored and replicated across the system. A system administrator shall be given rights to manage the same.
- m. **Mobile Application:** A mobile application (Android & iOS) shall be developed with certain functionalities to process urgent requirements/tasks of different FCI users such as generation of tokens, recording quality, generation of WCM or similar.
- n. **MIS Reporting:** ANNA DARPAN users shall have provision to generate customizable reports for analysis and monitoring purposes. The reports generated shall be role/department/office/user specific. The reports shall provide actionable insights that help management make informed decisions. The insights shall be presented in a way that is easy to understand and use, so that management can quickly act based on the information presented.

The project shall be executed in three phases:

- a. **PHASE 1A: Requirement Gathering, Gap Analysis and Documentation of the complete system:** SI shall carry out a complete study, which shall include understanding and assessment of the requirements, current process flows, databases, tables, integration points, and analytical requirements for existing FCI and other related applications (Please refer to Section 3.1 for details).
- b. **PHASE 1B: Design, Development, Integration, Testing, Implementation and Rollout of Core Modules – Web & Mobile App**
 - i. This phase shall incorporate design, development, implementation, integration & rollout of core modules (Please refer Section 3.4 for detailed Design, Development, and Implementation Strategy):

• Procurement	• Quality & Physical Verification
• Movement	• Sales & Imports/Export
• Storage	
• User Management	• MIS Reporting
• Masters	

After rollout of Phase 1B, SI shall start with the stabilization period for the mentioned phase. Please note, this period shall not be considered as start of Operations and Maintenance Phase.

- ii. SI shall develop an Android & iOS based mobile application as a lighter version of the ANNA DARPAN (Please refer Section 3.5 for Mobile Application Scope of Work).
- iii. SI shall study other FCI applications and subsequently carry out the necessary integration activities after identifying the integration points, data exchange type and mode of integration (Please refer Section 3.6 for Integration Scope of Work).

c. PHASE 2: Design, Development, Testing, Implementation and Rollout of Secondary Modules and Analytics – Web & Mobile App

- i. This phase shall incorporate the design, development, implementation, integration & rollout of secondary modules (Please refer Section 3.4 for detailed Design, Development, and Implementation Strategy):
 - Asset & Inventory Management
 - Engineering & Maintenance
 - Labor Management
 - Contract Management
 - Ticketing Mechanism

This phase shall commence in parallel to Phase 1B.

- ii. SI shall also perform design, development, testing and deployment of analytics tools based on the requirements of FCI (Please refer Section 3.7 for Data Dashboard and Analytics Scope of Work).

The overall indicative scope of work (SOW) for the ANNA DARPAN is detailed below.

3.1 Requirement Gathering, Analysis & Documentation

- a. SI shall carry out a complete study, which shall include understanding and assessment of the requirements, current process flows, databases, tables, integration points, and analytics for existing and related FCI applications. (Please refer Section 11.1 for detailed Functional Requirements and Section 16 Appendix – VI for details on other FCI related applications).
- b. SI, in close consultation with FCI, shall conduct Design Thinking Workshops to gather requirements from key stakeholders for ANNA DARPAN.
- c. SI shall plan and visit the depots, mandis, millers, FCI offices or similar locations (pan India wherever required) after approval from FCI (minimum of 5 Zonal Offices, 1 Regional Office per zone (5 Nos.), 1 Divisional Office per region (5 Nos.) and 2 depots (Owned + Hired) per Divisional Office (10 Nos.), i.e., minimum count of offices to be visited = 25) In addition, the SI shall also visit 15 other locations like mills/mandis/PCs etc. to understand FCI's requirement. This shall be the minimum requirement however the SI may visit more locations at their own discretion in case they find it necessary to understand the operations better. The cost for the same shall be borne by the SI.
- d. SI shall identify important integration points in close consultation with FCI (Please refer Section 3.6 for details). Also, SI shall develop the application in such a way that any future/additional integrations are also implementable.
- e. SI shall create a detailed implementation plan, in line with the RFP requirements.
- f. SI shall identify microservices for implementation of the ANNA DARPAN system.
- g. SI shall submit well-defined and detailed documents as mentioned in the deliverables list (Please refer Section 3.14 for details on list of deliverables). FCI shall assist the SI with all

available documentation for carrying out the system study and requirement gathering activities. SI shall obtain sign-off on each of the deliverables from the designated authority/committee stationed at FCI HQ. For the purpose of centralized signoff if any confirmations are required to be obtained from the field units it shall be done by designated authority/committee stationed at FCI HQ.

- h. SI shall ensure that each deliverable is prepared considering all provisions for future scalability in terms of functional & technical requirement/enhancement of all the modules planned to be covered and their integration with third party applications, legacy applications and other modules developed.
- i. SI shall update all the relevant documents as and when any enhancement/modifications are made into the modules/system till the duration of contract.
- j. SI shall maintain versions of the documents compiled for ANNA DARPAN and share the same with FCI upon every update for reference purposes.
- k. SI shall conduct data migration activity if required by FCI at any given point (Please refer Section 3.15 for Data Migration details).

3.2 Project Management and Execution Framework

- a. SI shall create a project management framework for implementing the ANNA DARPAN across all the deliverables.
- b. SI shall create fortnightly trackers to monitor the progress of the project and same shall be shared with FCI. Project timelines shall be maintained by the project manager for effective monitoring of the project progress. The project manager shall organise meetings with all the concerned stakeholders and share updates as per agreed schedule.
- c. Submission of each deliverable shall be deemed complete after the approval of FCI.
- d. SI shall create a repository to store all the project related documentation for all deliverables. During the maintenance period, any change requests and enhancements to the application shall be similarly documented to create a comprehensive repository of all artifacts relevant to FCI stakeholders. This shall serve as a valuable knowledge input during Exit Management and for any statutory audit.
- e. SI shall adopt IT Service Management Best Practices including incident management, change management, configuration management, undertake requisite testing and quality assurance and facilitate user acceptance testing to ensure smooth operations of the ANNA DARPAN.

3.3 Hosting Infrastructure

3.3.1 Current Assessment of existing IT infrastructure

SI shall undertake assessment of the current DC/DR infrastructure and operations covered across all levels of FCI, defined in this scope. SI shall ensure that the AS-IS assessment is undertaken of DC/DR also to understand the current IT infrastructure (including servers, storage devices and other associated infrastructure components).

3.3.2 Hosting over Cloud and DR Site

- a. SI shall host the applications on cloud infrastructure of suitable cloud service provider. Suitable disaster recovery services shall also be provided over cloud infrastructure for the ANNA DARPAN. All costs related to hosting of ANNA DARPAN on cloud infrastructure (both DC and DR site on cloud) shall be borne by the SI.
- b. The proposed Cloud Service Provider (CSP) must be MeitY (Ministry of Electronics and Information Technology) empanelled and audit compliant and shall strictly adhere to the audit guidelines provided by MeitY.
- c. The solution technology shall have hyper-scaler capabilities.
- d. The solution shall support migration to any other cloud environment, if needed in future.
- e. The solution shall be able to build, deploy, and run containerized applications.
- f. The solution shall have the capability to host containers and manage containers orchestration. It shall have scalable and reliable container orchestration platform.
- g. Hyperscale variances shall not inhibit portability of application between clouds.
- h. The cloud facility must be within India and categorized as Tier III or IV. The DR site shall also be in India and located in a different geographical area (Geographical Area here means “Data Centers” which are independently MeitY empanelled and are sufficiently apart to be impacted by any single natural calamity or law and order disruption) and facility from Cloud DC.
- i. The cloud DC, where cloud hosting is proposed, must have ISO 27001 certification. Bidder must submit a copy of ISO 27001 certificate as part of their Technical Bid.
- j. SI shall provide the rate chart of the cloud services to FCI during operations and maintenance period to be used as a reference in case of over-utilization of cloud resources.
- k. Cloud services shall be accessible via Internet, Point to Point/MPLS, Leased Lines, OFC WAN, or similar options. SI must provide suitable connectivity between FCI’s network and Cloud DC Facilities.
- l. SI shall be fully responsible for upgrades, security patches, bug fixes and other operational aspects of the infrastructure that is within its scope or purview.
- m. SI shall provide interoperability support concerning available APIs and data portability for FCI to utilize in case of change of cloud service provider, migration back to Local DC, burst to a different cloud service provider for a short duration or availing backup services from an alternate cloud service provider.
- n. SI is required to prepare and submit along with their bid, the details of methodologies and computations for sizing and capacity of storage, compute, backup, network, and security resources.
- o. FCI shall retain ownership of the container platform, templates, clones, and scripts/applications created for FCI’s applications. FCI shall retain the right to request (or shall be able to retrieve) full copies of these containers at any time.
- p. In no circumstances, the data accumulated and processed by the cloud DC/DR site shall be compromised. Hence, provisions shall be made to keep all the data stored in this platform highly secured with required multi layered security access control and authorization framework.
- q. SI, through its proposed CSP, shall be responsible for providing cloud services for replicating ANNA DARPAN at DR site for the project duration.

- r. During the time when DR site is active, all modules and functions of the ANNA DARPAN shall be available to the end-users.
- s. Additional Parameters:
 - i. SI shall configure, schedule, and manage backups of all the data including files, folders, images, system state, databases, enterprise applications or similar.
 - ii. Encryption of all backup files and data and management of encryption keys as a service that can be enabled for Government Departments that require such a service.
 - iii. SI shall offer dashboard to provide visibility of services.
 - iv. SI shall not delete any data at the end of the agreement (*for a maximum of 90 days beyond the expiry of the Agreement*) without the approval of FCI. In case of data, containers, clones or templates pertaining to FCI is not transferred within these 90 days, the SI shall submit all such data, containers, templates or clones to FCI within 30 days through suitable media and without any changes to such data, containers, templates, clones or similar.
 - v. SI shall carry out frequent DR drills (*minimum twice in a year*) to ensure DR fail over and switchback is possible smoothly. Certificates of completion and detailed reports to be submitted to FCI for every drill conducted.

3.3.3 Preparation of Disaster Recovery Operational Plan

SI shall provide detailed operating procedures for the ANNA DARPAN during the following scenarios. These shall be mutually agreed upon with FCI during the project kick-off.

- a. Business As Usual (BAU): The primary site is functioning as required, procedures for ensuring consistency of data availability at secondary site.
- b. Disaster: Declaration of disaster, making the DR site live for production, ensuring availability of users to the secondary site.
- c. Operations from DR site: Ensuring secondary site is addressing the functionality as desired.
- d. Configure proposed solution for usage.

3.3.4 Periodic Disaster Recovery Plan Update

SI shall be responsible for:

- a. Devising and documenting the DR policy as discussed and approved by FCI.
- b. Providing data storage mechanism from the Go-Live date till the date of contract expiry for the purpose of compliance and audit.

3.4 Application Design, Development and Implementation Strategy

This phase denotes the main component of the project which is development of the ANNA DARPAN. This phase shall start in parallel to the requirement gathering and analysis phase.

- a. SI shall deploy the required team of architects, technical leads, developers, testers, and any additional expertise felt necessary, for implementation of the project as per the timelines (Please refer Section 8 for Milestones, Deliverables and Payment Terms).
- b. SI shall prepare a Solution Design Document highlighting the best practices available in the proposed solution. The document shall indicate the additions/modification that need to be made to the business process in view of overall implementation.
- c. SI shall develop solution using preferably an **open-source technology (having enterprise support for production environment)** to meet the requirements of FCI centrally and helps

in better utilization of resources by enabling end to end visibility of supply chain operation up to the last mile of the operation i.e., bag/stack level in a depot by integrating with internal and external applications of FCI. The ANNA DARPAN developed shall be smart enough to accommodate any future integrations.

- d. SI shall develop required number of standardised APIs for both backward and forward integration with various applications as required.
- e. SI shall transfer the rights and ownership of the developed application to FCI at the end of the development.
- f. SI shall design and implement requisite user authentication and authorization as well as other IT security controls, for the entire solution.
- g. SI shall be responsible to arrange for the necessary development tools (software) during development, integration, and testing of the ANNA DARPAN. SI shall also arrange necessary services such as SMS Gateway, Email, Toll Free number (telecom services) or any other similar tools required during the contract period. Any cost involved in the arrangement of these shall be borne by the SI. Recurring cost towards SMS charges (if any) shall be borne by FCI on actuals.
- h. The solution shall be scalable enough to capture data from QR codes, barcodes, RFID tags and IoT devices, and incorporate into the system database without any manual intervention.
- i. SI shall ensure that the ANNA DARPAN developed is compliant with the latest version of the Guidelines for Indian Government Websites (GIGW) and with any other recommendations provided by GoI in terms of cloud, data, security or similar.

3.5 Mobile App Development

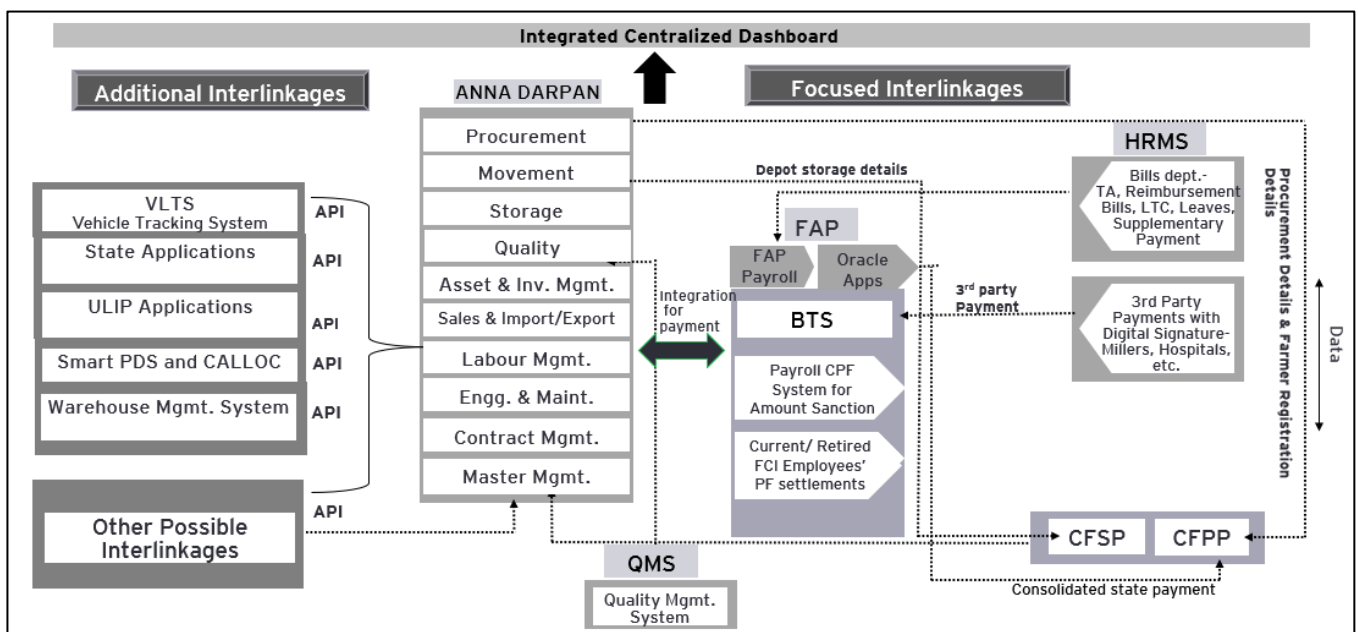

SI shall develop a mobile application for the ANNA DARPAN on Android and iOS, as part of the overall solution requirements. This shall include:

- a. The mobile application shall have a provision of installing, configuring, and using function-specific mobile apps for both smart phones and tablets (Android & iOS).
- b. The mobile application shall have a user-friendly interface and be responsive. User shall have a seamless experience and clearly understand what to do with the application, which buttons to click and so on.
- c. The mobile application shall be able to scan encrypted QR codes, barcodes, RFID tags and similar solutions.
- d. The mobile application shall be adaptable to different screen sizes.
- e. Standardization of mobile apps on Android and iOS and support for push notifications for all necessary events and application updates from the central server.
- f. The mobile application shall have facility to upload and attach scanned documents.
- g. Implementation of a Mobile Application to ensure secured access to FCI data using mobile application and enforce FCI policies for mobile app users accessing the system network. Basic minimum scope includes:
 - Role Based Access (RBA).
 - User Authentication/verification.
 - Troubleshooting & resolving the functionality, availability and performance issues.

- h. Notifications for bug fixes, upgradation patches and similar events. The mobile application shall have a search option to navigate user what they are searching for in a simple and easy to use manner.
- i. Charges for renewal/update of services of Mobile application used (if any) are to be borne by the selected SI.
- j. SI shall ensure deployment of required tools to monitor the performance, stability and responsiveness of the mobile application and generate reports to be shared with FCI on need basis.

3.6 Integration

The diagram below covers indicative integrations needed for the solution development. During the design phase, SI shall discuss with FCI on the integrations needed for the solution.

- a. SI shall study other FCI applications and subsequently carry out the necessary integration activities after identifying the integration points, data exchange type and mode of integration.
- b. The below-mentioned integrations are indicative and not exhaustive. The list of applications to be integrated may be varied based on the discussions held during the requirement gathering.
- c. The system developed shall be capable enough to accommodate any new integrations proposed in future.
- d. The system developed shall allow integration with LWB (Lorry Weigh Bridge) or any other weighment tool approved by FCI in all depots for the purpose of online weighment of trucks/vehicle carrying foodgrains.
- e. SI shall prepare integration test cases for any such integration beyond above existing application as per the project requirement with no additional cost and shall be within the contract as per the final proposal.

- f. SI shall develop **standard APIs** (Data Exchange i.e., pull and push of data) as per requirements of FCI for integration of ANNA DARPAN with any other systems as per best practices available in the industry. No separate payments shall be made to the SI in this regard.
- g. The developed system shall be interoperable to support information flow and future integrations. **It shall support the open and interoperable data sharing tools/techniques** like JSON, XML, Lightweight Directory Access Protocol (LDAP) or **similar tools where information/data can be ported to/from any system, as and when desired.**
- h. API integration (Data Exchange i.e., pull and push of data) activities to be carried out parallelly with development of application. A complete solution with all the API integrations in place is expected to be delivered at the time of rollout of Phase 2.

Currently it is envisaged that the proposed ANNA DARPAN shall have to integrate with the following indicative internal and external applications:

3.6.1 Integration with internal FCI applications

ANNA DARPAN shall be integrated with the following systems which are already developed and are in use by FCI;

- a. **Financial Accounting Package (FAP):** Integration with FAP for carrying out all financial transactions including payments related to FCI operations.
- b. **Vehicle Location Tracking System (VLTS):** Integration of ANNA DARPAN with the VLTS for fetching truck chit details generated in ANNA DARPAN and push necessary notifications/alerts to VLTS and vice versa.
- c. **Central Foodgrains Procurement Portal (CFPP):** Integration with CFPP to maintain a nationwide single source of truth for various transactions related to procurement operations. This shall provide the standardized procurement master data, captured from all reported states by CFPP.
- d. **Central Foodgrains Storage Portal (CFSP):** integration with CFSP to capture data related to storage of central pool foodgrains from all DCP states.
- e. **Human Resource Management System (HRMS):** Integration with HRMS for seamless flow of data related to FCI manpower and operations on a real-time basis.
- f. **FCI Website:** To provide various information related to operations of FCI generated through ANNA DARPAN and to be put out on the public domain on real-time basis.
- g. **Video Surveillance System (VSS):** Integration of VSS being developed by FCI for the purpose of managing the alerts and outputs of VSS for data analytics.
- h. **Quality Management System (QMS):** Integration of QMS being developed by FCI for managing quality aspects of food grains to capture the data related to inspection, sampling, and testing of foodgrains.
- i. **e-Office:** e-Office already been implemented at FCI. Integrations of ANNA DARPAN with e-Office shall be carried out for the purpose of analytics and single sign-on.
- j. **Procurement Center Self-Assessment Portal (PCSAP):** Possible integrations of ANNA DARPAN with PCSAP shall be carried out for procurement module and analytics.

3.6.2 Integration with external applications

- a. **DFPD Website:** To provide various information related to operations of FCI generated through ANNA DARPAN and to be put out on the public domain on real-time basis.

- b. **Sales Platforms:** Integration with e-auction platform (presently mjunction) for enabling digitized process of sale of food grains (other than regular govt. schemes) undertaken by FCI
- c. **Agri Stack** Integration with Agri Stack to fetch farmer data required for the purpose of validation.
- d. **State/UT Applications:** The integration of ANNA DARPAN application with approximately **24+ State/UT-run applications** to achieve nationwide single source of truth with granular analysis and reporting of master data fields to cater to a standardized format in ANNA DARPAN.
- e. **Warehouse Management System:** The integration of ANNA DARPAN with the **Warehouse Management System of CWC and SWC** to eliminate multiple entries and manual efforts at CWC and SWC Warehouses to maintain single source of truth.
- f. **SMART-PDS/IMPDS/FEAST:** Integration with SMART-PDS/IMPDS/FEAST to ensure digitized issue of food grain stocks for PDS and other such govt. sponsored schemes and to capture data related to distribution of such food grains to the beneficiaries.
- g. **Aadhaar (UIDAI):** Aadhaar integration primarily for the purpose of authentication of farmers during procurement process. In this regard responsibility for appointing an appropriate Authentication User Agency (AUA), Sub-AUA and Aadhaar Data Vault (ADV) and providing necessary hardware like Point of Sale (PoS) devices shall be with FCI. SI shall be responsible for developing the application and related databases.
- h. **Freight Operations Information System (FOIS)/Railway Systems:** FOIS is a comprehensive system to manage and control various aspects of freight operations within the railway network. This integration with FOIS shall help FCI in streamlining and automating freight operations, providing real-time information, and improving the overall efficiency and effectiveness of the Indian Railways' freight services.
- i. **Food Safety and Standards Authority of India (FSSAI):** Possible integrations of ANNA DARPAN with FSSAI system for management of samples inventory and its results after LAB testing as well as registration/licences.
- j. **Public Financial Management System (PFMS):** The objective of PFMS is to track the funds released under all plan schemes of Government of India, and real time reporting of expenditure at all levels of programme implementation. This integration of PFMS shall help FCI to enhance financial management, transparency, and accountability within the organization, thereby supporting FCI in its mission to ensure food security and efficient grain management in India.
- k. **National Food Security Portal (NFSP):** This integration with NFSP shall help FCI to leverage real-time data, streamline beneficiary management, enhance supply chain management, and improve monitoring and reporting. This shall in turn enable FCI in effectively implementing food security programs, ensuring the timely and equitable distribution of foodgrains to the targeted population.
- l. **Climate Data Service Portal (CDSP):** The CDSP serves as an integrated platform to render weather and climate services of India Meteorological Department, Ministry of Earth Sciences. Broadly we may require data temperature, humidity and rainfall for undertaking predictive analytics.
- m. **e-Way Bill:** Through this integration with e-Way Bill, FCI shall be able to improve transportation management, compliance with legal requirements, transparency, and tracking of goods in transit. This shall simplify documentation processes, enhance route planning, and provide valuable data for analysis and reporting.

3.6.3 Merger of internal FCI applications with ANNA DARPAN

- Depot Code Management System (DCMS):** The system used for maintaining the details related to depot addition, re-hiring, and de-hiring of depots shall be part of ANNA DARPAN.
- District Information System for Foodgrains Management (DISFM):** ANNA DARPAN shall provide all required data to generate KPIs as defined in DISFM system.
- Integrated Rapid Reporting System (IRRS):** ANNA DARPAN shall provide real-time data of food grain stocks in all depots replacing present manual system of IRRS.
- Stack Management System/WINGS:** ANNA DARPAN shall have provision for automated linking of mill to depots and allocation of space replacing the existing standalone system use for the purpose.

Note: Any integrations beyond the scope of work shall be subject to the conditions specified for change requests in the RFP (refer Section 4.6 for details on Change Requests).

3.7 Data Dashboarding and Analytics

The below diagram shows an indicative architecture, needed for analytics platform. During the design phase, SI shall discuss with FCI for finalizing the analytics architecture.

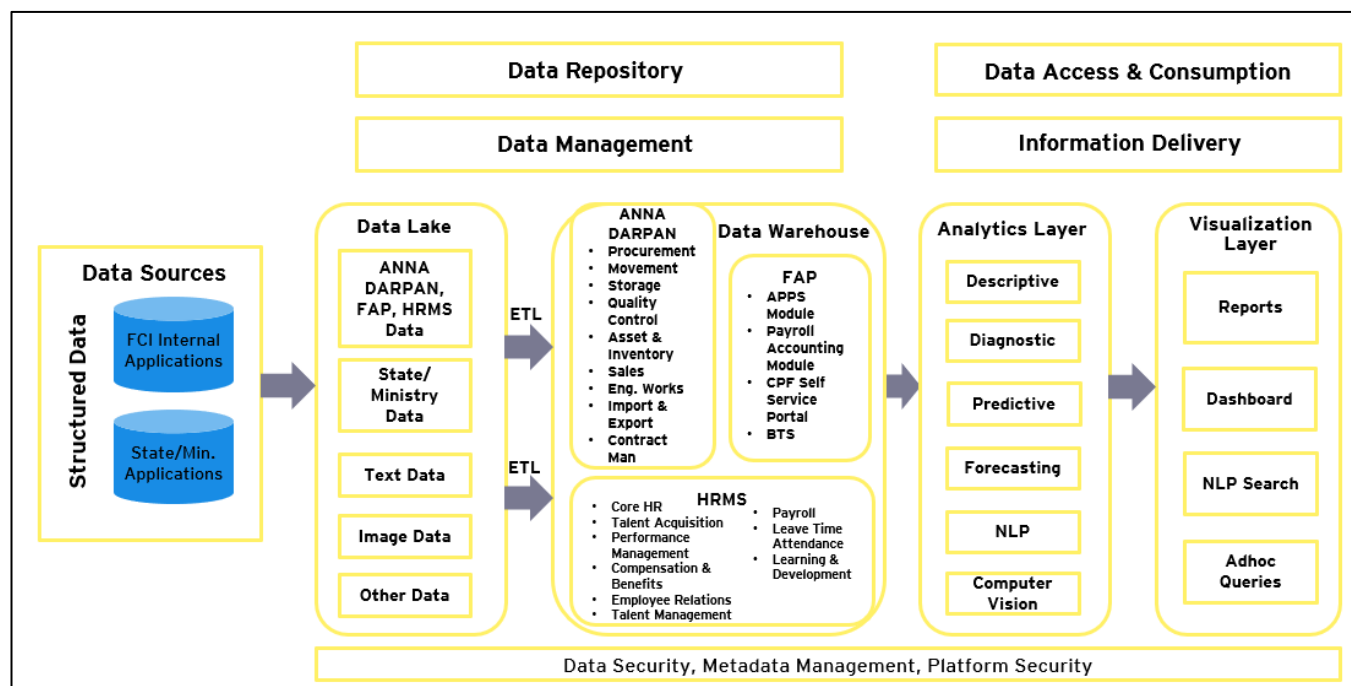

Figure 2: Analytics Scope of Work

- SI shall carry out a complete study which shall include requirement gathering and understanding the data analytics requirements of FCI in Phase 1A.
- SI shall setup and operationalize a Data Warehouse and Analytics Platform

- c. SI shall finalize the analytics use cases and dashboard requirements and take sign off from FCI before initiating their work on the same.
- d. SI shall submit tentative project plan for this track for development and testing, followed by Go-live, in-line with the overall timelines of the project.
- e. SI shall also perform design, development, testing and deployment of analytics tools.
- f. SI shall provide an AI based chatbot for the application to help and support users on their issues by accessing the application and its content over internet.
- g. SI shall provide trainings to enable users for adoption of analytics reports and features and provide application usage trainings and user handholding.
- h. SI shall be responsible for on boarding of new data sources (if any) and providing maintenance and support for the applications' components deployed in production.

3.7.1 Indicative principle for Data Analytics System:

- a. Data Model: The project envisages creation of a data model to capture key information (structured) stored across multiple FCI databases.
- b. The data model shall link the transactional data, master data, historical and current information across all the related databases together into one single data model. The information is expected to be linked across the database systems and the user shall be able to traverse through this information uniformly with best possible query performance.
- c. The solution shall receive and process the incoming data as per the business logic, store it as per the defined data model and store in prescribed format.
- d. The data lineage and traceability shall be maintained for entire data lifecycle across the various stages of ETL.
- e. The solution shall have features to perform data profiling, improvement of data quality, master data management and data enrichment activities.
- f. The system shall facilitate creation of required BI reports and dashboards.
- g. The solution shall have the capability of exploratory data analytics (EDA) and AI/ML for generating outcomes.
- h. The system shall be scalable enough to handle the future data growth requirements.
- i. The data architecture and the data model shall be modular and flexible enough to manage additional sources of information in the future.
- j. The system shall be configured in a High Availability mode.
- k. Metadata Management – The metadata standards prescribed by Government of India for e-Governance projects shall be followed. Please refer latest version of the document: Metadata and Data Standards – Demographic available on the official website of e-Governance Standards & Guidelines. (<https://egovstandards.gov.in>)

3.8 Testing

Below is the set of activities which SI needs to conduct during testing of ANNA DARPAN:

- a. SI shall prepare a detailed testing plan and testing strategy.
- b. SI shall prepare various use cases and scenarios.
- c. SI shall perform unit testing, integration testing, system testing, load testing and performance testing.

- d. SI shall take corrective steps based on the test reports i.e., rectifying the application issues/ bugs reported during the test.
- e. SI shall compile and submit detailed test reports enlisting the test results. The reports shall be submitted upon request from FCI.
- f. FCI shall also conduct User Acceptance Testing (UAT) to ensure satisfactory completion of the application development as per the functional requirement specifications. SI must provide the test cases/scenarios for such testing along with test data and facilitate and hand hold FCI officials to carry out the UAT. SI shall also continue to fix any issues identified during the testing before the final acceptance of the application. Corrective measures based on UAT findings to be incorporated as part of the final version of the ANNA DARPAN prior to final Go-Live.

3.9 **Training and Capacity Building**

- a. SI shall create a detailed training schedule, including the dates, areas to be covered, time and the training literature shall be prepared by the SI at various stages of the project cycle and feedback for effectiveness shall be agreed to by all parties during the performance evaluation of the SI as per the Contract.
- b. The SI shall implement a 'Train the Trainer (TTT)' program at the national level which shall involve the training of a set of Master Trainers who shall be responsible for further training of various entities and stakeholders who shall be directly or indirectly using the application.
- c. The FCI users shall be divided into the following groups:

Band	Users*
Group 1	Nominated officers of FCI HQ
Group 2	Master Trainers

* Grouping subject to change based on inputs from FCI

- d. After the first training is completed for the Master Trainers, requirement for any further assistance to these Master Trainers shall be decided by FCI.
- e. Training program shall be continuously monitored by FCI to ensure quality standards of the training.
- f. Refresher training, during the O&M period, shall be carried out every quarter (two sessions of one day each) for internally nominated employees of FCI. Training location shall be decided by FCI. All the cost incurred during training to be borne by SI.
- g. It is the responsibility of the SI to prepare a feedback mechanism (i.e., printed feedback forms) and get it filled by the participating batch and submits the same on a regular basis to FCI, along with assessment of the trainers themselves.
- h. It is the responsibility of the SI to prepare video lectures and documents including User manuals, technical manuals, training material, feedback forms, administration manuals or any other similar material and provide the same to FCI for feedback. In case of modifications either in the training plans or substitutions of the regular trainers, proper correspondence with FCI shall be made.

3.10 **Project Rollout**

SI shall ensure complete rollout of the application across all levels of FCI organizational structure including depots (FCI owned and hired). SI must undertake the following activities and ensure adequate manpower to support all depots till the end of the rollout duration.

- a. SI shall be responsible for pan India rollout of the ANNA DARPAN application i.e.,
 - i. **Phase 1B:** Design, Development, Implementation, Testing & Rollout of Core Modules - Web & Mobile App (90% modules in at least 100 depots)
 - ii. **Phase 2:** Design, Development, Implementation, Testing & Rollout of Secondary Modules and Analytics – Web & Mobile App
- b. Stabilization of the ANNA DARPAN based on issues encountered and feedback obtained.
- c. Installation of mobile application and role-based configuration of the handheld devices (if applicable) at all levels (HQ, Zonal, Regional, Divisional, Depot, Mills or wherever necessary).
- d. SI shall be responsible for providing the handholding support to FCI for both mobile and desktops:
 - i. **Functional Handholding:** SI shall provide handholding support to FCI's staff at the depots/DO/RO/ZO/HQ throughout the rollout period till Go-Live and acceptance of the solution at each of the depots. These staff shall be identified by FCI exclusively for performing the functions.
 - ii. **Technical Handholding:** For technical expertise support on special technical requirements for which FCI is not currently equipped with the required skill sets, the SI shall provide the handholding support to FCI during the warranty period.
 - iii. Ensure the generation of all reports online through the implemented system after the go-live of each of the depots.

3.11 **Go-Live Acceptance Criteria**

Successful implementation and Go-live means commissioning and integration of all the software applications, including the solutions configured, customized, and used successfully by all the intended users. Following are the list of acceptance criteria to be adopted for the project. The list below is indicative, and the activities shall include but not be limited to the following:

- a. SI must prepare a go-live and training plan duly approved by FCI and shall conduct training and handholding sessions for end users.
- b. Development, testing and UAT of all functional modules of the ANNA DARPAN including integration with all other required applications.
- c. Complete implementation of all modules of ANNA DARPAN and rollout across all depots.
- d. Complete data migration from existing FCI applications with minimal data loss.
- e. Required training and change management sessions conducted for all identified employees.
- f. Security Testing Certificate of ANNA DARPAN.
- g. Confirmation from the respective administrative offices about ANNA DARPAN operations gone live (all modules rolled out in all depots).
- h. The Go-Live shall be declared upon the following criteria:
 - i. **Phase 1B Go – Live:** Implementation of minimum 90% modules in at least 100 depots covering both owned and hired.

Note: Selection of these modules shall be mutually decided later.

- ii. Phase 2 Go – Live: Successful completion and rollout of the entire application including integration with all IT applications/initiatives by FCI.
- i. FCI shall assign a designated nodal officer at ZO/RO/DO level with the responsibility to provide the Go-Live acceptance. After project Go-Live, SI shall be solely responsible for management of operations, maintenance, and support of the ANNA DARPAN.

3.12 STQC Audit

- a. FCI may appoint a MeitY empanelled Third-Party Auditor (TPA) to audit and ensure that the project (including all the project components as discussed in the scope of work) meets requirements, standards, specifications, and performance, by ensuring that the following are associated with clear, quantifiable metrics for accountability:
 - Security
 - Performance
 - Availability
 - Manageability
 - SLA Reporting
 - Data Quality
 - Availability of the project services in the defined locations
 - Infrastructure Compliance
 - Localisation Compliance
 - Functional Requirements
 - Project Documentation
- b. All costs related to TPA shall be borne by FCI.
- c. SI shall provide all necessary support to ensure that the audit process is carried out smoothly.
- d. As part of the audit performed through the appointed TPA, FCI shall review all aspects of project development and implementation including the processes relating to the design of solution architecture, design of systems and subsystems, coding, testing, business process description, documentation, version control, change management, security, service oriented architecture, performance in relation to defined requirements, interoperability, scalability, availability and compliance with all the technical and functional requirements of the RFP and the agreement.
- e. The procedures and parameters for testing shall be laid down by the TPA after approval from FCI; the solution deployed by the SI shall satisfy third party acceptance testing upon which the system shall go-live, subject to approval from FCI.
- f. FCI shall establish appropriate processes for notifying the selected SI of any shortcomings from defined requirements at the earliest instance after noticing the same to enable the selected vendor to take corrective action. All gaps identified shall be addressed by the SI immediately prior to Go-live of the solution. It is the responsibility of the selected SI to take any corrective action required to remove all shortcomings before the rollout of the project.
- g. FCI shall also get the solution audited through the TPA periodically after Go-Live to ensure success of the project and system stability.
- h. 1st payment of O&M phase shall be released only after successful completion of STQC audit.

3.13 **Security Audit**

The selected SI needs to ensure that the activity related to security audit is performed on yearly basis by MeitY/CERT-In empanelled agency to review the security policies as per MeitY Security Guidelines. In addition to this, the SI shall also conduct a Comprehensive Security Audit to keep a check vulnerability at the application level, network level or any other. The cost for the same to be borne by the selected SI.

The SI shall address ongoing needs of security management including, but not limited to, monitoring of various devices/tools such as firewall, intrusion prevention/ detection, content filtering and blocking, virus protection, event logging and correlation and vulnerability protection through implementation of proper patches and rules. The SI shall also perform vulnerability assessment quarterly and submit reports to FCI within 3 weeks (21 Days) after completion of every quarter.

3.14 **List of Deliverables/Documents**

The SI is expected to provide the following indicative deliverables/documents during the project design, development, and implementation:

#	Deliverable	Description/Remarks
1	Resource Deployment Plan	The resource deployment plan shall outline the allocation of various resources to achieve the objectives of the project.
2	Detailed Project Management Plan and Implementation Roadmap	These detailed documents shall outline the strategies, methodologies, and processes that shall be employed to achieve the objectives of the project. The plan shall be used by the concerned stakeholders to understand the scope, timelines, resources, risks, and overall approach for managing the project. The documents shall provide a clear timeline and sequence of activities required to achieve the project objectives.
3	Risk Management & Mitigation Plan	The risk management and mitigation plan shall incorporate a strategy to identify potential risks, assess their potential impact on the project, and outline measures to mitigate or minimize those risks to ensure that the project proceeds smoothly and successfully, even in the face of uncertainties and potential challenges.
4	Communication Plan	The communication plan shall outline the process of disseminating, sharing, and managing information among various stakeholders associated with the project. The plan shall be designed to ensure effective and efficient communication among stakeholders.
5	Traceability Matrix	The traceability matrix shall allow the concerned stakeholders to track the relationship between different project artifacts/requirements to provide a systematic way to ensure that all project requirements are accounted for and properly addressed throughout the project life cycle.

#	Deliverable	Description/Remarks
6	System Requirement Specification (SRS)	The SRS shall provide a detailed roadmap/blueprint for developers, designers, and stakeholders to understand and agree on the functionality and behaviour of the software.
7	Functional Requirement Specification (FRS)	The FRS shall outline the detailed functional requirements of the proposed solution.
8	High Level Design Document (HLDD)	The HLDD shall provide an overview of the architectural and structural design of the proposed solution at a conceptual level.
9	Low Level Design Document (LLDD)	The detailed LLDD shall follow the HLDD and provide a granular, step-by-step explanation of the implementation of the proposed solution. It shall outline the specific design choices, algorithms, data structures, and code modules required to build the proposed solution.
10	Technical Architecture Document (TAD)	The comprehensive and detailed TAD shall provide an in-depth overview of the technical architecture of the proposed solution. It shall outline the various components, technologies, and design decisions that form the foundation of the proposed solution's infrastructure. The document shall provide an in-depth view of the integration aspects of the said project.
11	Wireframe Design	Mock-ups/visual representations of the application UI shall be compiled and shared, serving as a blueprint or skeletal framework for concerned stakeholders to visualize and understand the layout and functionality of the final product.
12	Data Migration Plan	The data migration plan shall outline the strategy, process, and steps involved in migrating data from the legacy systems/storage environment to the proposed solution. It shall ensure that data is transferred accurately, securely, and with minimal disruption to the business operations.
13	Analytics Use Cases	Analytical use cases shall be specific scenarios or business problems where data analytics and insights are applied to extract valuable information and make data-driven decisions.
14	Analytics User Stories	Analytical user stories shall be specific, user-centric statements that describe the functionality or features that the users require from an analytical system or data-driven application.
15	Unit Testing Report	To be shared on need basis
16	Integration Testing Report	To be shared on need basis
17	Functional Testing Report	The Functional Testing Report shall provide detailed information about the execution and results of functional testing activities performed on the proposed solution. To be shared prior to release of proposed solution for UAT.
18	Data Migration Report	The Data Migration Report shall provide an overview of the entire data migration process, including the planning, execution, and verification of data migration activities. It serves as a summary of the data migration project, capturing key information and outcomes.

#	Deliverable	Description/Remarks
19	Training Plan	The training plan shall outline the strategy and approach for providing training to individuals or groups within FCI.
20	UAT Test Cases	Specific scenarios or sets of steps shall be compiled and shared to FCI for conducting the UAT. The scenarios shall be executed by the concerned users/stakeholders of the proposed solution to ensure that the system meets their business requirements and is ready for production deployment.
21	UAT Plan	The UAT plan shall outline the strategy, scope, and approach for conducting UAT on the proposed solution. The plan shall be well-structured to ensure that the UAT is conducted efficiently, and issues are identified and addressed before the application is released to end users.
22	UAT Completion & Feedback Report	A detailed report shall be shared to FCI HQ upon completion of every round of UAT along with the list of feedbacks received from the participants.
23	Capacity Building Plan	The capacity building plan shall incorporate a structured and strategic approach to enhance the abilities, skills, resources, and capabilities of the organization to achieve its goals and objectives effectively and efficiently.
24	Change Management Plan	The change management plan shall provide a roadmap for guiding individuals, teams, and the entire organization to effectively navigate and manage the processes through the transition from the current state to the desired future state, while minimizing resistance, disruptions, and negative impacts on productivity.
25	Training Completion & Feedback Report	A report shall be shared to FCI HQ upon completion of every planned training session along with the list of feedbacks received from the participants.
26	Rollout Strategy	The rollout strategy shall be a systematic approach to introduce the proposed solution to the organization ensuring a smooth and successful transition from the development or testing phase to full-scale adoption and use.
27	Security Audit Completion Certificate	SI to provide Security Audit Certificate from CERT-In empanelled vendors
28	Module Wise SOP	The document shall outline the step-by-step instructions and guidelines for performing a specific task or process in a consistent and standardized manner. To be compiled per module of the proposed solution.
29	Application and System Performance Monitoring Plan	A detailed strategy and set of guidelines shall be compiled and shared for continuously monitoring the performance and health of the proposed solution.
30	User Manuals	Text based training content (module wise) shall be compiled explaining the features, process background, process flow, applicable data fields and FAQs for the proposed solution.

#	Deliverable	Description/Remarks
31	Content for Video Lectures	Multimedia training content shall be compiled explaining the features, process background, process flow, applicable data fields and FAQs for the proposed solution.
32	Frequently Asked Questions (FAQ)	FAQs shall be compiled & shared for queries by concerned end users pertaining to developed modules, overall system operations, role-based functionalities, and other relevant categories.
33	Data Dictionary	A reference guide shall be compiled and shared for understanding the meaning, properties, and relationships of the data stored in the database and providing a comprehensive description of the data elements (fields) used within the proposed solution.
34	System Transaction Report	A system generated report shall be shared (on need basis) providing a detailed summary of all the transactions or activities processed by the proposed system within a specified period. The report shall be generated via specialized software tools used in the proposed solution that track and record transactional data.
35	Helpdesk Ticket Analysis Report	To be shared on need basis
36	Service Level Agreement (SLA) Report	To be shared on need basis
37	Patch Release Notes	To be shared upon every patch release

3.15 Data Migration Strategy

This section provides a broad framework for the application and data migration for the project. It is expected that the SI shall propose a detailed migration strategy as part of the proposal. The implementation of this strategy shall be done in close consultations with FCI.

The key objectives of data migration for FCI shall include:

- Each user of ANNA DARPAN shall be able to access the application with their login credentials.
- Minimum business impact: Maximum downtime for 24 hours, during the changeover and during the migration process. Legacy data is to be migrated to new application and shall be available to the users for various business processes.
- Data integrity is maintained throughout the migration and no compromise on the data quality in data migration.

3.15.1 Data Migration approach

- In most scenarios, an export and import utility is used to migrate the data from legacy source system into Data Migration Staging Area. Database Record counts and reconciliation shall be performed to confirm all data is migrated appropriately.
- Data profiling and analysis is done against the legacy data in the staging area to identify data consistency issues and gain understanding of the legacy data structures to support development of the ETL processes; controls are reviewed and validated.

- c. ETL Process: This process shall involve development of the code to implement the mapping of the legacy data into the Intermediate Schema, to prepare it for further processing.
- d. Further the process shall involve, extracting data from the Intermediate schema and populating to the production schema. Record counts and amounts are reconciled against the data collected in the data profiling stage. Data Import tools shall execute the required data integrity checks and the data shall be loaded into the production tables only if there are no integrity errors:
 - i. Once data is loaded into production tables, it is tested, validated, and reconciled against the data source.
 - ii. Any issues identified upon testing shall need to analyse and in turn the scripting is to be revised.
 - iii. Upon revision of scripting, steps (i) through (iii) are repeated until there are no data issues and production data has been validated against source or legacy data.

4 Operations and Maintenance

An annual maintenance contract shall be for five years to provide comprehensive support for FCI ANNA DARPAN post final go-live date declared by FCI. It may be renewed/extended on yearly basis (subject to the final decision of FCI) after completion of tenure of five (5) years (Please refer Section 9.3 for details on Extension of Contract). Details of activities which are required to be performed by the SI are broadly categorized as below:

4.1 Application Support and Maintenance

- a. SI shall need to provide operations and maintenance services for the server and related infrastructure commissioned by the SI for the application at the Data Centre and Disaster Recovery Centre.
- b. SI shall rectify application(s) bugs, depending on the severity of tickets and SLAs (Please refer Section 10.2 for details on SLA for Operation & Maintenance).
- c. SI shall release enhancements quarterly required by FCI due to functionality updates, design changes, bugs/issue resolution and architecture changes. Enhancements shall be addressed in an upgrade patch of an ANNA DARPAN. Proper documentation to be submitted to FCI in this regard for reference.
- d. SI shall develop patches including their testing and assistance in deployment with deliverables and release notes. Delivery period of patch shall be one full quarter. However, Liquidated Damages (LD) on SI shall be applicable on any delay in release of patch beyond one month post release cycle.
- e. SI shall provide support with maintenance activities like patch management for all components/software installed for development, testing and production environments (including UAT, training & staging).
- f. SI is advised to size the development, test, and production environments (including UAT and training) in an optimal manner. It shall not be over or undersized. SI needs to submit the specifications for these environments.
- g. Major bugs shall be resolved by SI at central location in New Delhi within defined SLAs and following deliverables shall be submitted as follows, for any patch update/upgrade:
 - i. Patch release notes.
 - ii. Design Document (Latest version with applicable updates).
 - iii. User Manual (Latest version with applicable updates).
 - iv. Impact assessment report on other functionalities/modules.
- h. Once the application patch is ready, SI shall support to deploy the same in the production environment (including UAT, staging and training) as accepted by FCI. The patch along with all the relevant installation procedures shall be released by the SI.
- i. SI shall be responsible for monitoring and managing all environments including development, testing, UAT, staging, and production for software, tools and ANNA DARPAN serviceability.
- j. SI shall also be responsible for taking timely steps for rectification of issues which are under their purview and notifying FCI about issues which are not under their purview with all necessary details for further taking up with requisite agencies/SI.
- k. SI shall develop and maintain inventory database of all assets of an ANNA DARPAN like server/infrastructure details, software licences, databases details or any similar details and share with FCI on quarterly basis and whenever it is required by FCI.

- l. SI shall update and maintain the standard master codes (LGD Codes, Depot Codes and similar) published by GoI/DFPD/FCI in the application as and when required.

4.2 Cloud Support Services

SI shall ensure of all containers, templates, clones, and scripts/applications created for FCI's application is maintained properly.

SI shall ensure that CSP providing hosting and DR services for ANNA DARPAN shall carry out at a minimum the following:

- a. Data Center operations to follow industry leading ITSM frameworks like ITIL, ISO 20000 & ISO 27001.
- b. Ensure compliance to relevant SLAs.
- c. 24x7x365 monitoring, managing the availability & security of the infrastructure and assets.
- d. Perform regular hardening, patch management, testing and installation of software updates issued by vendors from time to time after following agreed process.
- e. Ensure overall security – ensure installation and management of every security component at every layer.
- f. Prepare documentation/policies required for certifications included in the SOW.
- g. Preventive maintenance plan for every quarter.
- h. Performance tuning of system as required.

4.3 Database Maintenance

- a. SI shall be responsible for monitoring database activity and performance, changing the database logical structure to embody the requirements of new and changed programs.
- b. SI shall be responsible to perform physical administrative functions such as re-organizing the database to improve performance.
- c. SI shall be responsible for tuning of the database, ensuring the integrity of the data and configuring the data dictionary.
- d. SI shall follow guidelines issued by FCI in this regard from time to time including access of database by administrators and guidelines relating to security of database.
- e. Database administration shall follow the principle of segregation of duties to ensure no single DBA can update production tables/data singularly.
- f. In addition to restrictions on any direct change in data by any administrator, the databases shall have auditing features enabled to capture all activities of administrators.

4.4 Security Management

- a. Regular hardening and patch management of components of the ANNA DARPAN as agreed with FCI.
- b. Performing security services on the components that are part of FCI environment as per security policy finalized with FCI.
- c. Complete security and privacy of the system
- d. IT Security Administration – Manage and monitor safety of information/data.
- e. Reporting security incidents and resolution of the same.
- f. Ensure proactive monitoring, management, maintenance & administration of all security devices and update engine, signatures, and patterns as applicable to FCI's hosting environment.

- g. Managing and monitoring of anti-virus, anti-malware, phishing, and malware for managed resources.
- h. Ensuring 100 percent antivirus coverage with patterns not older than the period agreed on any given system.
- i. Monitoring centralized pattern distribution (live update) and scan for deficiencies.
- j. Maintaining secure domain policies
- k. Ensuring secured communication between FCI end-user and server.
- l. Review of security policies on at-least quarterly basis during first year of O&M and then after at least on half-yearly basis.
- m. Resolution of calls for security notifications, system alerts, vulnerabilities in software and alerting FCI as appropriate.
- n. Ensure patch management is carried out for all security applications including content management system, antivirus, and VPN.
- o. Providing root cause analysis for all defined problems including hacking attempts.
- p. Monthly reporting on security breaches and attempts plus the action taken to thwart the same and providing the same to FCI.
- q. Maintaining documentation of security component details including architecture diagram, policies, and configurations.
- r. Performing periodic review of security configurations for inconsistencies and redundancies against security policy.
- s. Performing periodic review of security policy and suggest improvements.
- t. Reviewing logs daily of significance such as abnormal traffic, unauthorized penetration attempts, any sign of potential vulnerability, security alerts and responses, and proactive measures in the event a problem is detected.
- u. Sensitizing users to security issues through regular updates or alerts – periodic updates/ help FCI in issuance of mailers in this regard.
- v. Coordination with proposed CSP for rapid resolution of every incident/problem within mutually agreed timelines.

4.5 Data Backup/Restore/Archival

- a. SI shall be responsible for implementation of backup & archival policies as finalized with FCI. SI is responsible for getting acquainted with the storage policies of FCI before installation and configuration. It shall be noted that the activities performed by SI might be reviewed by FCI.
- b. SI shall be responsible for monitoring and enhancing the performance of scheduled backups, scheduled regular testing of backups and ensuring adherence to related retention policies.
- c. SI shall be responsible for prompt execution of on-demand backups of volumes and files whenever required by FCI or in case of upgrades and configuration changes to the system.
- d. SI shall be responsible for real-time monitoring, log maintenance and reporting of backup status on a regular basis. SI shall appoint administrators to ensure prompt problem resolution in case of failures in the backup processes.
- e. SI, through its proposed CSP, shall also provide a 24x7 support for file and volume restoration requests at the Data Centre(s).
- f. SI shall maintain a repository for all digital assets for the ANNA DARPAN such as, VPN account details, firewall rules, digital formats or any other similar assets.

4.6 Change Requests

- a. Any request by FCI that results in changes in the structure of the application, or a new module is added shall be considered as change requests (CR).
- b. Any minor changes required in the application such as addition/deletion/alteration of a row/column/field, additional report, menu items shall not be considered as change requests and shall be supported by the SI.
- c. Any new requirement of reports, data sets in .CSV format, spread sheet format etc which doesn't necessitate Production level table field additions/deletions, shall not be considered as CR.
- d. Any change request leading to changes in the existing flow, shall be well documented by the SI, and shall be duly approved by FCI.
- e. Changes shall be implemented in a controlled manner and shall be tested in the test (non-production) environment prior to implementation. The impact of technical changes on application environment shall also be performed. Dependencies of changes shall be documented.
- f. The procedure that shall be adopted for evaluating change requests shall be based on the Work Breakdown method/Function Point Analysis method or the method mutually agreed upon with SI.
- g. SI is required to develop a change management methodology to ensure all application changes and technical changes (after go-live, from the start of contract), are reviewed, tested, approved, implemented, and verified post implementation.
- h. All change requests shall be documented and maintained in a database. All change requests shall be classified, and approval and escalation mechanisms shall be defined as per classification.
- i. All changes shall be reviewed, and emergency change requests shall follow a defined and controlled process.
- j. A release schedule shall be maintained for all the changes, to provide minimum disruption to business services.
- k. SI shall be required to perform analysis of change requests to review frequently occurring issues, trend analysis, and an analysis report to be provided to FCI along with a summary report.

4.6.1 Purpose of Change Requests

FCI may at any time, by a written order given to the SI, make changes in scope of the work or schedule of services as specified in the RFP document. The purpose of the change request procedure is to manage/regulate changes to the software/system environment. The change request procedure has the following objectives:

- a. To avoid implementation of any changes which is not reviewed, approved, or analysed.
- b. To minimize the occurrence of unintended affects during the implementation of necessary changes.

Any change request where the total development effort requirement is less than 40-person hours shall not be considered as change request, however, change management process shall be applicable on every change. These changes can be agreed and approved by FCI (not valid for system update or upgrade (due to OS/firmware updates, patches or similar).

4.6.2 Change Management Guidelines

- a. Both FCI and SI, while evaluating and finalizing the change request, shall consider the change in the context of the parameter, namely whether the change is beyond the scope of services

including ancillary and concomitant services required and as detailed in the sign-off version of all required documents.

- b. Change requests shall be reported to FCI, who shall prioritize and review progress. SI shall be required to implement any proposed changes once approved with effect from the date agreed for implementation.
- c. If FCI gives any new requirement or change request, the SI shall follow the change management process to implement the Change on additional payment basis. On receiving any change request from FCI, the SI must submit its proposal with all the required information in the format agreed with the onboarded SI, for perusal within defined number of working days.
- d. SI may also submit any queries/clarifications that it may have with respect to implementation of change requested. SI must not deny the implementation of any Change requested by FCI under any circumstances unless technical feasibility is in question. In all such matters, FCI's decision shall be final.
- e. The acceptance criteria for any such change shall remain the same as described in the RFP with respect to the performance and quality parameters.
- f. The change request shall be categorized as simple, medium, and complex change. SI must provide the list of deliverables within agreed timelines.
- g. The change request process shall be considered complete only when the training is imparted to the target users (if required) for whom the change is being done and the feedback is evaluated by FCI.
- h. For each approved change request, the SI shall conduct a separate security audit apart from testing and UAT with no additional cost to FCI.

4.6.3 Change Management Process

a. Change Request Note ("CRN")

- i. Change Request Note (CRN) shall emanate from the Project Manager of SI who shall be responsible for obtaining approval for the change. CRNs shall be presented to FCI who shall acknowledge the receipt.
- ii. SI and FCI, during the project design, development and implementation phase and during the Operations and Management Phase and while preparing the CRN, shall consider the change in the context of the following parameter, namely whether the change is beyond the scope of services including ancillary and related services required and as detailed in the RFP and is suggested and applicable only after the testing and the project design, development and implementation phase as set out in this contract.
- iii. SI shall submit a rate card for manpower in the commercial proposal that shall be used in case of any change request arise.
- iv. Please refer Section 12.1 for the pre-defined proforma of the Change Request Note (CRN).

b. Quotation

SI shall assess the CRN and complete Part B of the CRN. In completing the Part B of the CRN, SI shall provide as a minimum:

- i. A description of the change.
- ii. A list of deliverables and dependencies required for implementing the change.
- iii. A timeline for implementation.
- iv. An estimate of any proposed change.
- v. List of existing functionalities affected by the change.

- vi. Any relevant acceptance criteria.
- vii. An assessment of the value of the proposed change; material evidence to prove that the proposed change is not already covered within the agreement and the scope of work.
- viii. Prior to submission of the completed CRN to FCI, SI shall undertake its own internal review of the proposal and obtain all necessary internal approvals. As part of this internal review process, the SI shall consider the materiality of the proposed change in the context of the contract, and the project design, development and implementation affected by the change and the total effect that may arise from implementation of the change.

c. Cost

Both SI and FCI shall be responsible for its own costs incurred in the quotation, preparation of CRNs and in the completion of its obligations described in this process provided the SI meets the obligations as set in the CRN. In the event the SI is unable to meet the obligations as defined in the CRN then the cost of getting it done by third party shall be borne by the SI.

d. Obligation

SI shall be obliged to implement any proposed changes once approval in accordance with above provisions has been given, with effect from the date agreed for implementation and within an agreed timeframe. SI shall not be obligated to work on a change until FCI agrees in writing upon its scope, price and/or schedule impact.

4.7 Software Change & Version Control

- a. SI shall maintain version control and configuration information for any system documentation and application software.
- b. All configuration changes or customizations or bug fixes or enhancements in the functional scope mentioned in this RFP for the proposed applications, which do not involve the creation of any new application process, are to be carried out by SI at no extra cost.
- c. Any new functionality in the solution, which have neither been mentioned in the RFP, nor been proposed within six months from Go-Live, shall be carried out through a separate Change Request Note (CRN) prepared by SI.
- d. Changes in the application that are mandatorily required for complying with any of the predefined SLA requirements, FRS or to-be functional solution cannot be treated as a separate change request, and hence to be completed by the SI at no extra cost.
- e. All changes during the warranty phase shall be subjected to comprehensive and integrated testing by SI to ensure that changes, implemented in the system, meet the desired and specified requirements of FCI and don't impact any other function of the system.
- f. SI shall submit a quarterly report on the changes performed on the application and resolution of malfunctions carried out by SI.
- g. SI shall troubleshoot all possible problems, monitor erratic behaviour through the application logs.
- h. All planned changes to application systems shall be coordinated within established Change Control processes to ensure that:
 - i. Appropriate communication on changes required has taken place.
 - ii. Proper approvals have been received.

- iii. Schedules have been adjusted to minimize impact on the production environment.
- iv. For any changes to the application, SI shall submit a document indicating proposed changes, impact to the system in terms of functional outcomes/additional features added to the system.

4.8 Maintain Configuration Information & System Documentation

SI shall maintain and update documentation of the software system to ensure that:

- a. Application documentation is updated to reflect on-going maintenance and enhancement including Software Design Documents and SRS, in accordance with the defined standards.
- b. User manuals and training manuals are updated to reflect on-going changes and enhancements introduced in the ANNA DARPAN for users.
- c. Standard practices are adopted and followed in respect of version control and management of system documentation.

4.9 Handholding Support

- a. SI shall deploy resources for handholding support at the respective offices of FCI for an initial period of 1 year starting from the date of successful implementation and rollout of Phase 1B. Handholding support may be extended further if required by FCI at quoted unit rate in the price bid (Please refer Section 17.3.1 for Price Bid for Application Development). The number of resources may be altered at the discretion of FCI. ANNA DARPAN
- b. Handholding support staff shall be stationed/deployed at administrative offices of FCI (HQ, ZOs and ROs). However, if required, the handholding support staff shall travel to or be deployed at Divisional Offices. Indicative distribution of handholding support staff is mentioned in the table below:

DISTRIBUTION OF HANDHOLDING SUPPORT STAFF FOR ANNA DARPAN (INDICATIVE)			
#	OFFICE	LOCATION	COUNT
1	FCI Headquarters	New Delhi	3
2	ZO – North	Noida	1
3	RO – Punjab	Chandigarh	3
4	RO – Haryana	Panchkula	2
5	RO – Delhi	New Delhi	1
6	RO – Uttarakhand	Dehradun	1
7	RO - Uttar Pradesh	Lucknow	4
8	RO - Himachal Pradesh	Shimla	1
9	RO - Jammu & Kashmir	Jammu	1
10	RO – Rajasthan	Jaipur	3
11	ZO – South	Chennai	1
12	RO - Tamil Nadu	Chennai	2
13	RO - Andhra Pradesh	Amravati	3
14	RO – Telangana	Hyderabad	3
15	RO – Karnataka	Bengaluru	2

DISTRIBUTION OF HANDHOLDING SUPPORT STAFF FOR ANNA DARPAN (INDICATIVE)			
#	OFFICE	LOCATION	COUNT
16	RO – Kerala	Trivandrum	2
17	ZO – East	Kolkata	1
18	RO – Odisha	Bhubaneswar	3
19	RO – Jharkhand	Ranchi	2

25	RO – Chhattisgarh	Raipur	2
26	RO - Madhya Pradesh	Bhopal	3
27	ZO – Northeast	Guwahati	1
28	RO – Assam	Guwahati	1
29	RO – NEF	Shillong	1
30	RO - Nagaland & Manipur	Dimapur/Imphal	1
31	RO - Arunachal Pradesh	Itanagar	1
TOTAL			60

- c. The handholding support staff are required to perform the following activities:
 - i. Functional/Application support at all offices related to ANNA DARPAN.
 - ii. Functional/System support, including training, at all the offices related to various functionalities and features of the ANNA DARPAN.
 - iii. Basic trouble-shooting support for the ANNA DARPAN.
 - iv. Provide periodic training and support to FCI staff.
- d. The handholding support staff shall follow the working hours and holiday list of the concerned offices of FCI assigned to them.

4.10 Helpdesk Management

SI shall maintain adequate number (min. 10 resources) at **FCI Headquarters or a mutually agreed location** to attend all the queries raised by FCI users and other stakeholders through a technical helpdesk and provide resolution in required professional capacity and in a timebound manner.

- a. In case, the mutually agreed location is FCI Headquarters, basic infrastructure i.e., seating space and necessary connectivity shall be provided by FCI.
- b. Any instruments or devices required shall be arranged by the SI with no extra cost to FCI.
- c. SI shall be responsible to arrange necessary services such as SMS Gateway, Email, Toll Free number (telecom services) or any other similar tools required during the contract period. Any cost involved in the arrangement of these shall be borne by the SI. Recurring cost towards SMS charges (if any) shall be borne by FCI on actuals.
- d. The resources shall follow FCI working hours i.e., 9 AM - 6 PM, Monday to Saturday (except Public Holidays).
- e. SI shall ensure that all the calls shall be recorded, and the facility and any related infrastructure required shall be arranged by the SI with no extra cost to FCI.

- f. The helpdesk staff shall have prior experience in helpdesk operations and shall have excellent verbal and written communication skills both in English and Hindi. The executives shall also have basic technical knowledge for troubleshooting and resolving common user issues.

Manpower for helpdesk shall continue for the entire **Operations & Maintenance Phase** to facilitate the following activities:

- a. Onsite support to handhold the user to troubleshoot any issues in the centralized ANNA DARPAN and the mobile application running on the handheld devices.
- b. Coordinate with backend application support team to explain any issues and assist them resolving the issues in timely manner.

SI shall address end users' queries through helpdesk. The helpdesk service shall serve as a single point of contact for all incidents and service requests at FCI. The service shall provide a Single Point of Contact (SPOC) and escalation/closure of incidents for the user. The activities shall include:

- a. Managing helpdesk facility during service period window for reporting user department incidents/issues/problems.
- b. SI to provide helpdesk support to all the end users as per the FCI's working hours/days.
- c. Provide and manage necessary channels for reporting issues to the helpdesk. The incident reporting channels could be the following:
 - i. Specific e-mail account
 - ii. Customer service number
 - iii. Ticketing & incident reporting platform
- d. Management of a call logging system in line with the severity levels as per the SLAs. The Helpdesk shall log user calls and assign an incident/call ID number.
- e. Creation of knowledge base on frequently asked questions (FAQs) to assist user in resolving basic issues themselves.
- f. Facility to track each incident/call to resolution, provide feedback to callers and analyse the call statistics.
- g. Monitoring shall be done with the help of monitoring tools and therefore the reports and alerts can be auto generated.
- h. Escalate the calls, to the appropriate levels, if necessary, as per the escalation matrix agreed between the SI and the department. The escalation matrix shall be developed by the SI in discussion with FCI.
- i. Coordinate with respective team/users for closure of calls.
- j. Analyse the incident/call statistics and provide monthly reports such as:
 - i. Type of incidents/calls logged
 - ii. Incidents/calls resolved
 - iii. Incidents/calls open till date
 - iv. Maintaining up to date user's details, or any other based on the requirement of FCI.
- k. Escalation shall take place on an exception basis and only if successful issue resolution cannot be achieved in a defined time frame.
 - i. Either FCI or SI can initiate the procedure.
 - ii. The "moving party" shall promptly notify the other party that management escalation shall be initiated.
 - iii. Management escalation shall be defined as shown in the contact map below.
 - iv. Escalation shall be one level at a time and concurrently.

ESCALATION MATRIX		
LEVEL	DETAILS OF FCI REPRESENTATIVE	DETAILS OF SI REPRESENTATIVE
Level 1		
Level 2		
Level 3		

Note: SI shall provide the details for their Chief Executive Officer/Higher Management, Program Manager, involved team in the project or any other.

4.10.1 Helpdesk MIS Reports

SI shall submit the following list of MIS reports (indicative) to FCI, and any designated agency appointed by FCI on regular basis. Any other report required in any desired format by FCI, the SI shall be responsible to share the same as per the frequency desired (Daily, Weekly, Monthly, Quarterly and Half Yearly). Following list of reports shall be compiled and shared with FCI as applicable:

- a. **Ticket Summary Report:** To provide overview of all tickets submitted to the helpdesk by users of ANNA DARPAN including details like ticket counts, ticket status, mode of receipt or similar details.
- b. **Ticket Resolution Time Report:** To provide details of average resolution time taken for resolving tickets.
- c. **Customer Satisfaction Report:** To monitor user feedback and satisfaction levels with the resolution provided by the helpdesk.
- d. **Problem Management Report:** To track details of category wise type of issues reported for identification of recurring issues.

Note:

- a. MIS and SLA reports shall be provided by SI via an automated Service Level Management (SLM) tool to be deployed by the SI. All decision regarding SLA compliances or deviations shall be governed strictly as per the output of the SLM tool and no manually generated report shall be considered/acceptable.
- b. The above-mentioned reports are indicative, the SI may have to provide additional reports as per the requirement of FCI.

5 Resource Structure and Core Team

Integrity of solution components is extremely important in the development process. Hence, SI needs to deploy its own team by assessing the requirements mentioned in RFP.

For the design, development, implementation, and maintenance of ANNA DARPAN, the SI shall deploy a core team for the identified positions onsite as per the requirements in this RFP mentioned below. SI shall propose relevant CVs to FCI and shall make sure that the proposed resources are on payroll of the SI.

5.1 Resource Requirement

ANNA DARPAN is envisioned to be a specialized solution. So, it becomes important to deploy competent resources that can deliver the project as desired. The table given below provides a list of the **indicative core team resources**. Apart from these, SI shall deploy other required resources to execute the project, meet the timelines, and adhere to the SLAs stated in this RFP.

Indicative Manpower for Design, Development, Implementation and Maintenance of ANNA DARPAN					
CORE TEAM					
#	Role	Implementation Phase		Operations & Maintenance Phase	
		Deployment	Quantity	Deployment	Quantity
1	Program Manager	Onsite	1	Onsite	1
2	Technical Lead	Onsite/Offsite	1	Onsite/Offsite	1
3	Domain Expert	Onsite	1	Onsite	1
4	Solution Architect	Onsite/Offsite	1	-	-
5	Data Architect	Onsite	1	Onsite	1
6	IT Infrastructure Lead	Onsite	1	Onsite	1
7	Senior Business Analyst	Onsite	1	Onsite	1

Note:

- SI shall submit CVs for all the proposed resources in the CV format defined in **Form 14**
- SI shall not make any changes to the composition of the core team.
- SI shall not require or request any member of the core team to cease or reduce his or her involvement in the provision of the services during the term (or agree to any request other than from FCI that shall have the same effect):
 - Unless that person resigns, is terminated for cause, dies, is long-term disabled, is on permitted mandatory leave under Applicable Law or retires; or
 - Without FCI's prior written consent.
- SI shall promptly notify FCI of its intention to re-hire any member of the core team who had resigned from the SI in the previous 12-month period. FCI shall have the right to request that any member of the core team assigned to this project, who resigns and is re-hired by the SI within 12 months of the resignation date be re-assigned to the provision of the services.

5.2 Minimum Qualification of Resources

#	Designation	Qualification	Minimum Experience	Desirable Experience
1	Program Manager	B.E./B.Tech + MBA/PGDBA	1. 13+ years of experience of project management. 2. Experience of managing at least 4 projects of similar nature. 3. At least 2 projects with Central/State Government/PSU	1. PMP certified 2. Experience in handling & managing supply chain management projects 3. CI/CD implementation experience is also desired 4. Experience of managing large, cross-functional teams
2	Technical Lead	B.E./ B. Tech/MCA (Preferably in CS/IT)	1. 8+ years of total experience including minimum 5 years of working as team lead/development lead for projects of similar nature. 2. Experience of managing at least 2 projects of similar nature. 3. Experience in designing and architecting software solutions to meet business requirements including decision making about technologies, platforms, and overall system architecture.	1. Experience with mobile development for both Android and iOS. 2. Hands on experience with version control management tools such as Git, SVN or similar. 3. Experience in projects working with various databases like MySQL/ PostgreSQL/Mongo DB/ Oracle and similar. 4. Deep understanding of programming languages, development frameworks, and best practices.
3	Domain Expert	B.E./B.Tech./ M.Tech /MCA/MBA	1. 10+ years of experience working in the relevant area of expertise. 2. Advanced knowledge of business operations and project management. 3. In-depth knowledge and understanding of supply chain domain.	1. Up to date with the latest developments, trends, and innovations within the domain. 2. Exceptional leadership and mentorship abilities to introduce and implement technical solutions.
4	Solution Architect	B.E./B. Tech./MCA/M .Tech	1. 10+ years of relevant experience in designing and architecting large enterprise scale IT applications with specific experience in working on large scale deployments.	1. Relevant certifications 2. Shall have led the technical design and architecture in at least two supply chain management projects. 3. Experience in Microservices architecture 4. Experience in Containerization technologies – Dockers, Kubernetes etc.

#	Designation	Qualification	Minimum Experience	Desirable Experience
5	Data Architect	B.E./B.Tech./MCA	1. 8+ years of relevant experience in designing and architecting databases with specific.	1. Relevant certifications 2. Experience in working on large scale deployments. 3. Experience in data standardization, migration, data consolidation and data archival
6	IT Infrastructure Lead	B.E./B.Tech./MCA	1. 5+ years of relevant work experience in expertise in setting up and managing IT infrastructure (preferably cloud), migration, monitoring data storage services and cloud management.	1. Relevant certifications 2. Experience in managing on-premises infrastructure 3. Experience in infrastructure consolidation
7	Sr. Business Analyst	B.E./B.Tech./MBA	1. At least 8 years of total experience including Minimum 5 years of working as business analyst for projects of similar nature 2. Experience of Managing at least 2 projects of similar nature 3. At least 1 project with Central Govt/State Govt/PSU	1. Relevant certifications 2. Experience in creating Business Requirement Documents and Functional Requirement Specification documents 3. Experience in conducting stakeholder workshops and trainings for users

These are the minimum skillsets for the indicative core team members to be involved in design, development, implementation, and maintenance phases of the project. However, the SI shall propose the allocated resources for each category and phase at the time of proposal submission. Deployment of the team at FCI shall be discussed and finalized at the time of signing of contract between FCI and the successful bidder based on the project need.

Any additional or support manpower shall be estimated and shall be accounted for in the commercial bid by the selected SI, so that, the project as per the scope defined and agreement are fulfilled, and the project objectives are met.

Note:

- SI is required to submit profiles of members of the core team as defined in the technical evaluation criteria of this RFP.
- Replacement of assigned resources must be done with prior approval from FCI to avoid applicable penalties.
- Resource experience shall be evaluated as on date of publishing RFP.
- Post qualification experience shall be considered.

5.3 Resource Replacement

- a. The replacement of resources deployed as part of the core team (as per the Technical Bid), shall be liable for penalties (Please refer Section 10.6 for SLA penalty details). However, such replacement shall be allowed only with a resource of equivalent or higher qualification and experience.
- b. In case the resource has resigned, SI must inform within one week of such resignation. SI shall promptly initiate a search for a replacement and use commercially reasonable efforts (including the expenditure of reasonable sums, such as to engage the services of a recruiting firm) to ensure that the role of any member of the core team is not vacant for any longer than 15 days, subject to reasonable extensions requested to FCI by SI.
- c. Before assigning any replacement member of the core team to the provision of the services, SI shall provide FCI with the curriculum vitae (CV) and any other information about the candidate that is requested by FCI duly signed and stamped by the authorized signatory.
- d. If FCI does object to the appointment, SI shall not assign the individual to that position and shall seek an alternative candidate in accordance with this section. The decision of FCI shall be final and binding in the matter of replacement of resources, deployed as members of the core team, irrespective of the fact that a resource may be replaced by a person with higher qualifications and/or experience.
- e. SI must ensure at least 2 weeks of overlap period between the existing resource and the replacement resource to facilitate knowledge transfer.

5.4 High Attrition

If in the first 6-month period from the time of signing of contract between FCI and the successful bidder or during the complete rollout period, 20 percent or more of the members of the core team cease or reduce their involvement in the services for any reason with FCI's prior written consent, SI shall:

- a. provide FCI with a reasonably detailed explanation for such change; and
- b. if such change to the core team has or is likely to have any material adverse impact on the provision of the services or any substantial part thereof, undertake, at its own costs, such remediation acts as are reasonably necessary to improve the retention of the members of the core team.

SECTION II – INSTRUCTION TO THE BIDDERS

6 Instruction to Bidders

6.1 General

- a. While every effort has been made to provide comprehensive and accurate background information, requirements and specifications, bidders must form their own conclusions about the support required. Bidders of this RFP may wish to consult their own legal advisors in relation to this RFP.
- b. All information supplied by bidders may be treated as contractually binding on the bidders, on successful award of the assignment by FCI based on this RFP.
- c. No commitment of any kind, contractual or otherwise shall exist until and unless a formal written contract has been executed by or on behalf of FCI. FCI may cancel this RFP at any time prior to a formal written contract. However, once a bidder has been selected through this e-tendering process and awarded a formal contract for execution of work as defined in this RFP and its corrigenda, the respective bidder shall be bound to carry out all activities defined under this RFP for design, development, implementation, and maintenance of the complete ANNA DARPAN. If the selected bidder retracts from carrying out such work, the PBG (if submitted) shall be forfeited and FCI shall award the work to any alternate agency at the risk, cost, or responsibility of the selected bidder.
- d. This RFP supersedes and replaces any previous public documentation & communications, and bidders shall place no reliance on such communications.
- e. Bids shall be submitted by the interested bidders on the GeM Portal before the time and date specified in the schedule of the RFP notice.
- f. The details of the online e-tendering procedure are provided in Section 6.5. FCI shall issue RFP and corrigenda documents on GeM portal. Bidders are advised to check GeM portal for all updates regarding this RFP.
- g. Only online bids shall be accepted. No other mode of bid submission shall be accepted. If any of the attached documents are found to be forged/ fabricated/ false at any stage, the PBG (including e-BG) of the bidder shall be liable to be forfeited/encashed without prejudice to the right of the corporation to proceed against the bidder legally.
- h. All the supporting documents required in the bid submission shall be submitted on the company/bidder's letter head.

6.2 Compliant Bids/Completeness of Response

- a. Bidders are advised to study all instructions, forms, requirements, appendices, and other information in the RFP documents carefully. Submission of the bid shall be deemed to have been done after careful study and examination of the RFP document with full understanding of its implications.
- b. Failure to comply with the requirements of the RFP may render the bid non-compliant and the bid may be rejected. Bidders must:
 - i. Comply with all the requirements as set out within this RFP.
 - ii. Submit the forms as specified in this RFP and respond to each element in the order as set out in this RFP.

iii. Include all supporting documentations specified in this RFP.

6.3 **Bidder to Inform**

The bidder shall be deemed to have carefully examined and understood the complete RFP prior to submission of their bid. If the bidder has any doubts/clarifications regarding any clause/section in the RFP or its subsequent corrigenda, they shall consult before the last date for submission of pre-bid queries, set forth thereof and submit them to FCI in writing to ensure such doubts are clarified.

Regarding the queries raised by bidders on the clauses of the RFP, interpretation of clauses, scope, terms, and conditions as stated in this RFP and/or its subsequent corrigenda, if any, the decision of FCI shall be final and binding on all bidders.

6.4 **Pre-Bid Meeting & Clarifications**

6.4.1 **Bidders' Queries**

- a. FCI shall hold a pre-bid meeting with the prospective bidders on **8th December 2023, 3:00 PM** at FCI Headquarters, New Delhi.
- b. Bidders are requested to send their pre-bid queries to FCI by **7th December 2023, 11:59 PM** prior to the pre-bid meeting scheduled on **8th December 2023, 3:00 PM** via email to: agm2it.fci@gov.in.
- c. The queries shall necessarily be submitted in the following format:

#	RFP Document Reference(s) (Section & Page Number)	Content of RFP requiring Clarification	Points of clarification

- d. The pre-bid meeting shall be conducted to address any relevant queries or clarifications required to the prospective bidders.
- e. FCI shall not be responsible for ensuring the receipt of the bidders' queries.
- f. Any requests for clarifications post the indicated date and time (**7th December 2023, 11:59 PM**) shall not be entertained by FCI.

6.4.2 **Responses to Pre-Bid Queries and Issue of Corrigendum**

- a. The officer notified by FCI shall endeavour to provide timely response to all the relevant queries on GeM portal. However, FCI makes no representation or warranty as to the completeness or accuracy of any response made in good faith, nor does FCI undertake to answer all the queries that have been raised by the bidders.
- b. At any time prior to the last date for receipt of bids, FCI may, for any reason, whether at its own initiative or in response to a clarification requested by a prospective bidder, modify the RFP document by a corrigendum. FCI may, at its sole discretion, also extend the deadline for submission of proposals by issuing a corrigendum.

- c. The corrigendum (if any) & clarifications to the relevant queries from bidders shall be posted on the GeM portal. Bidders are advised to check the portal frequently for all updates regarding this RFP.
- d. Any such corrigendum shall be deemed to be incorporated into this RFP and shall be considered as its part, thereafter.
- e. To provide prospective bidders reasonable time considering the corrigendum (if any), FCI may, at its discretion, extend the last date for the receipt of bids.

6.5 **Online Bidding Procedure**

As per the directives of Department of Expenditure, this tender document has been published on the GeM portal (URL: <https://gem.gov.in/>). The bidders are required to submit soft copies of their bids electronically on the GeM portal, using valid Digital Signature Certificates. The instructions given below are meant to assist the Bidders on submission of bid on the GeM.

Additional information/instructions for submitting online bids on the GeM portal may be obtained at: <https://gem.gov.in/>

6.6 **Key Requirements of the Bid**

6.6.1 **Right to Terminate the Process**

- a. FCI may terminate the RFP process at any time without providing any reason. FCI makes no commitments, express or implied, that this process shall result in a business transaction with anyone.
- b. This RFP does not constitute an offer by FCI. The bidder's participation in this process may result in selection of bidder by FCI to engage towards execution of the contract.

6.6.2 **Earnest Money Deposit (EMD)**

- a. Bidders shall submit, along with their bids, Earnest Money Deposit of INR **2,00,00,000 (Rupees Two Crores Only)**, via RTGS/NEFT/Electronic Mode/e-BG to

Name: FOOD CORPORATION OF INDIA (HQ)

Account Number: 10220632672

Bank Name: STATE BANK OF INDIA

Branch Name: K.G. Marg, New Delhi

IFSC Code: SBIN0050191

EMD shall not be entertained in any other form and shall be denominated in INR only.

- b. EMD submitted by unsuccessful bidders shall be returned at the earliest, but not later than 30 days after the signing of contract to the successful bidder.
- c. No interest shall be payable on EMD, in any case.
- d. The bids not accompanied by the requisite EMD shall be summarily rejected.
- e. Compliance to be ensured of instructions issued by MSME (Public Procurement Policy) vide OM dated 27-Jan-2022. Under MSE category, only service providers for services are eligible for exemption from EMD. Subject to compliance of MSE guidelines.
- f. FCI has registered with Invoicemart having Entity ID No. 1000013215XXX * (M/s. A TReDS Ltd.) MSE suppliers should register themselves on Invoicemart (M/s. A TReDS Ltd.) in order to avail

facility of Bill discounting by converting their trade receivables into liquid funds on TReDS portal (refer DPE, D.O No. 7/4/07-Fin dated 07.09.2022).

- g. The EMD may be forfeited:
 - i. If a bidder withdraws its bid during the period of bid validity.
 - ii. If a bidder modifies its quoted prices during the period of bid validity or its extended period, if any.
- h. The EMD as Bank Guarantee shall be valid for a period of 120 days from the date of issue.
- i. In case of a successful bidder, if the bidder fails to sign the contract or to furnish PBG (including e-BG) within specified time, in accordance with this RFP.
- j. Any exemption of EMD as per the terms and conditions of GeM shall be applicable. In case of non-submission of EMD, the bidder must submit the **“Bid Security Declaration Form”** as per the format mentioned in **Form 22**.
- k. In case the bidder fails to submit the EMD or the Bid Security Declaration Form (as applicable) then FCI reserves the right to reject the proposal of the concerned bidder without providing any opportunity for any further correspondence by the concerned bidder.

6.6.3 Submission of Bids

- a. The bidders shall submit their responses in two parts namely “Technical Bid” and “Commercial Bid”. The online packets containing the bid shall include scanned copies of all relevant documents as mentioned below, serially numbered, duly signed and stamped on each page by the bidder. All documents as required to be submitted need to be digitally signed or self-attested by the authorized signatory.
- b. All the pages of the bid must be sequentially numbered and must contain the list of contents with page numbers.
- c. The bid shall be prepared in indelible ink. It shall contain no interlineations or overwriting, except as necessary to correct errors made by the bidder itself. Any such corrections must be initialled by the person (or persons) who sign(s) the bids.
- d. All pages of the bid shall be initialled and stamped by the person authorized to sign the bid. In case, the bid is signed digitally, the digital signature used shall be of the authorized person only.
- e. The bidder shall not indicate any prices in the technical bid.
- f. Bidder shall log onto the site well in advance for bid submission and shall be responsible for any delays thereafter.
- g. Any default by the bidder in respect of tender terms and conditions shall lead to rejection of the bid.
- h. FCI reserves the right to reject any or all bids without assigning any reasons thereof.
- i. Documents required as part of Technical Bid (as per Part A):
 - i. Letter of Bid as per format given in [Form 1 of Appendix – III](#).
 - ii. Power of Attorney for authorized signatory of the bidder [Form 2 of Appendix – III](#).
 - iii. The letter of authorization must be accompanied by a copy of the board resolution stating the powers of the executants to authorize the concerned person being issued the power of attorney.
 - iv. Bidder particulars as per format given in [Form 3 of Appendix – III](#).
 - v. Compliance sheet for eligibility criteria as per format given in [Form 4 of Appendix – III](#).

- vi. Checklist of documents attached as per format given in [Form 5 of Appendix – III](#)
 - vii. Performance Bank Guarantee (including e-BG) as per format given in [Form 6 of Appendix – III](#).
 - viii. Certificate for Turnover and Net Worth of the Bidder as per format given in [Form 7 of Appendix – III](#).
 - ix. Certificate of Experience as per format given in [Form 8 of Appendix – III](#).
 - x. Project Citation and declaration of projects under NDA (Forms 9A and 9B) as per format given in [Form 9 of Appendix – III](#).
 - xi. Certificate for Technical Manpower as per [Form 10 of Appendix – III](#).
 - xii. Proposed Solution comprising of understanding of project, details of proposed solution, detailed approach and methodology for design, development, implementation and operations and un-priced bill of material as per format given in [Form 11 of Appendix – III](#).
 - xiii. Proposed Work Plan as per format given in [Form 12 of Appendix – III](#).
 - xiv. Team Composition as per format given in [Form 13 of Appendix – III](#).
 - xv. Curriculum Vitae (CV) of proposed members of the core team as per format given in [Form 14 of Appendix – III](#).
 - xvi. Self-certification for non-blacklisting as per format given in [Form 15 of Appendix – III](#).
 - xvii. Undertaking for Total Responsibility as per format given in [Form 16 of Appendix – III](#).
 - xviii. Earnest Money Deposit (EMD) as Bank Guarantee as per format given in [Form 17 of Appendix – III](#).
 - xix. Declaration as per format given in [Form 18 of Appendix – III](#).
 - xx. Draft contract agreement as per format given in [Form 19 of Appendix – III](#).
 - xxi. Undertaking for Cloud Service Provider (CSP) as per format given in [Form 20 of Appendix – III](#).
 - xxii. Tender Acceptance Letter as per format given in [Form 21 of Appendix – III](#).
 - xxiii. Bid Security Declaration Form as per format given in [Form 22 of Appendix – III](#).
 - xxiv. Tender document signed and stamped on each page.
- j. Bids not submitted as per the specified format and nomenclature may be rejected. Ambiguous/Incomplete/Illegible bids may be out rightly rejected. Any alteration/overwriting/cutting in the bid should be duly countersigned else it will be out rightly rejected.
- k. Bidders are requested to note that they shall necessarily submit their financial bids in the format provided and no other format is acceptable resulting in rejection of the bid. Not quoted bids shall be consider as non-responsive and shall be rejected.
- l. The bid summary must be printed and kept as an acknowledgement of the submission of the bid. This acknowledgement may be used as an entry for any bid opening meetings.

6.6.4 Clarifications & Amendments to Bid Documents

FCI may, at any time prior to the due date of the bid and for any reason, whether at its own initiative or in response to any clarification sought by any bidder, modify the Bid document. Any corrigendum thus issued shall be posted on the GeM portal and such modification shall be

binding on all. To provide sufficient time for the prospective bidders to consider the modification or for any other reasons, FCI may, at its discretion extend the due date for the proposal.

At its discretion, FCI may seek from any or all bidder(s), clarification(s) in respect of any detail furnished in the bid. The request for such clarification and the response shall be in writing and submitted on time.

FCI at its sole discretion may ignore minor omission in the submission of technical bid such as omitting to give number on a page, signature/stamp on any page of the bid or may require any bidders to rectify any such discrepancies noticed in the technical bids submitted by them in the interest of increasing the competition. Any document already in existence on the last date of submission of bid shall not be treated as new document and shall be accepted at the sole discretion of FCI.

6.6.5 Consortium

The bidder is **not allowed** to enter into a consortium agreement with another entity to present the bid as a single bid.

6.6.6 Subcontracting

The bidder shall be allowed to subcontract non-core elements of the project. It may be noted that in case of subcontracting, the bidder is mandated to detail out the activities being proposed for subcontracting in the technical proposal. The subcontracting can only be done for one or more of the non-core elements as listed below:

- a. Cloud Services
- b. Training and Handholding
- c. Helpdesk Support
- d. Any other component with the prior approval/consent from FCI

6.7 Preparation of Bids

6.7.1 Bid Preparation Costs

The bidder shall bear all its costs associated with or relating to the preparation and submission of its bid including preparation, copying, postage, delivery fees, expenses associated with any demonstrations or presentations which may be required by the authority, or any other costs incurred in connection with or relating to its bid.

All such costs and expenses shall remain with the bidder and the Authority shall not be liable in any manner whatsoever for the same or for any other costs or other expenses incurred by any bidder in preparation or submission of the bid, regardless of the conduct or outcome of the bidding process.

6.7.2 Language

The bid and all related correspondence and documents in relation to the bid process shall be in English language only. Supporting documents and printed literature furnished by the bidder with the bid may be in any other language if they are accompanied by translations in the English language, duly authenticated and certified by the bidder. Supporting materials, which are not translated into English shall not be considered. For interpretation and evaluation of the bid, the English language translation shall prevail.

6.7.3 Late Bids

- a. Bids shall be submitted online only before the date and time mentioned in this RFP or its subsequent corrigenda. No other mode of bid submission shall be accepted.
- b. The time settings fixed in the server side & displayed at the top of the GeM portal, shall be valid for all actions of requesting, bid submission, bid opening or similar., for this RFP. The bidders shall follow this time during bid submission.
- c. Beyond the date and time of bid submission, bidder shall not be able to submit their bids on GeM portal.

6.7.4 Deviations

No deviations shall be allowed in the bidder's response and the bidder must agree to unconditional acceptance of all the contents of the RFP document including Terms and Conditions, Scope of Work, Deliverables and Timelines, Payment Terms, Service Level Agreements and Deductions and similar sections etc. Conditional bids shall be summarily rejected.

6.7.5 Total Responsibility

Bidder shall issue an undertaking stating that they have read and understood all details provided in the RFP and subsequent corrigenda and undertake total responsibility for the defect free operation of the proposed solution as per the requirements stated in the RFP and its subsequent corrigenda. Format for the undertaking is provided in [Form 16 of Appendix – III.](#)

6.8 Bid Evaluation Process

6.8.1 General

- a. FCI shall constitute a Bid Evaluation Committee to evaluate the responses of the bidders.
- b. The Bid Evaluation Committee constituted by FCI shall evaluate the responses to the RFP and all supporting documents/documentary evidence. Inability to submit requisite supporting documents/documentary evidence, may lead to rejection of the bid.
- c. During evaluation, FCI reserves the right to seek clarifications from the bidders in relation to their submitted bids for supporting eligibility criteria or any other requirements of the RFP or its corrigenda or if the submitted bids are illegible in part or full. Bidders shall submit all such clarifications timely to avoid rejection of their bids.

- d. The decision of Bid Evaluation Committee/FCI in the evaluation of responses to the RFP shall be final. No correspondence in this regard shall be entertained.
- e. The Bid Evaluation Committee may ask for meetings with the bidders to seek clarifications on their bids.
- f. FCI reserves the right to reject any or all bids owing to on any deviations.
- g. Each of the responses shall be evaluated as per the criteria and requirements specified in this RFP.

6.8.2 Minimum Quantity

The scope of work in this RFP includes design, development, implementation, and maintenance of ANNA DARPAN across all administrative offices of FCI with depots including legacy records of FCI's existing applications. FCI reserves the right to change the number of administrative offices at any time in future for any upgrades to be done, which may vary from what is being specified in the RFP (in the event of changes in number of administrative offices of FCI).

Any decision of FCI in this regard shall be final, conclusive, and binding on the bidder.

6.8.3 Opening of Bids

The bids submitted up to **10th January 2024, 03:00 PM** shall be opened on **10th January 2024, 03:30 PM** by FCI designated officials, in the presence of those bidders or their representatives who wish to remain present at the time of opening. The representatives of the bidders shall carry the identity card or a letter of authority from the tendering firms to identify their bonafides for attending the opening of the bid. In the event of the specified date for the opening of bids being declared a public holiday by the GoI or FCI, the bids shall be opened at the appointed time on the next working day. FCI may, at its discretion, extend this deadline for bid opening on the GeM Portal. Bidders are requested to check the GeM Portal regularly.

6.8.4 Bid Validity

Bids must remain valid up to 90 days from the date of opening of Technical Bid. However, FCI reserves the right to extend this period by another 30 days at its discretion, which shall be binding on the bidders. Thereafter, this period may be further extended by the parties on mutual consent. Any bidder not keeping the offers open for the prescribed period shall be summarily rejected.

6.8.5 Bid Evaluation

If the bid submitted is not in accordance with the RFP, then the bid shall be considered as non-responsive. The process for evaluation of responsive bids is as mentioned below.

6.8.5.1 Stage I: Eligibility and Technical Evaluation

- a. The Bid Evaluation Committee shall open the packet for “Technical Bid” from the GeM.
- b. The committee shall evaluate each of the responses to validate the compliance of the bidders according to the eligibility criteria mentioned in this RFP, and as per format and supporting documents mentioned against each clause. The bidder shall qualify only if all the eligibility criteria are met. Non-compliance to any of the conditions mentioned in the eligibility criteria shall lead to disqualification. (Please refer Section 6.10 for Pre – Qualification Criteria).
- c. Bidders shall be informed of their qualification/disqualification based on the eligibility criteria through GeM.
- d. The committee shall also evaluate the technical responsiveness of the bidders with respect to the scope, functional and technical requirements stated in this RFP document and corrigenda (if any).
- e. The committee shall review the technical bids of the bidders to determine whether they are substantially responsive as per the requirements of the RFP. Bids that are not substantially responsive are liable to be disqualified at the committee’s discretion.
- f. The bidder shall not incorporate any condition in the bid, as the conditional bids are liable to be rejected. Bidders who have qualified in Technical Evaluation stage shall only be eligible for Commercial Evaluation.

6.8.5.2 Stage II: Commercial Bid Evaluation

- a. All the eligible bidders shall be notified to participate in Commercial Bid opening process.
- b. The commercial bids of the eligible bidders shall then be opened from the corresponding packet in GeM Portal on the notified date and time and reviewed to determine whether they are substantially responsive. Bids that are not substantially responsive are liable to be disqualified at the committee’s discretion.
- c. Only fixed price commercial bids indicating total prices for all the deliverables and services specified in this bid document shall be considered.
- d. The bid price shall include all taxes, duties, fees, and levies except GST and shall be in Indian Rupees (INR).
- e. Arithmetical errors in the commercial bid shall be read on the following basis:
 - i. If, in the price structure quoted for the required services/works, there is discrepancy between the unit price and total price (which is obtained by multiplying the unit price by the quantity), the unit price shall prevail and the total price shall be corrected accordingly.
 - ii. If there is an error in a total corresponding to the addition or subtraction of subtotals, the subtotals shall prevail, and the total shall be corrected.
 - iii. If there is a discrepancy between words and figures, the lesser amount quoted shall prevail.
 - iv. If there is such discrepancy in an offer, the same shall be conveyed to the bidder with target date up to which the bidder must send his acceptance on the above lines and if the bidder does not agree to the decision of FCI, the bid is liable to be disqualified.

6.9 Acceptance/Rejection of Bids

- FCI reserves the right to reject in full or part, any, or all bids without assigning any reason thereof. FCI reserves the right to assess the bidder's capabilities and capacity. The decision of FCI shall be final and binding.
- Bid shall be free of over writing. All erasures, correction or addition must be clearly written both in words and figures and attested.
- In the event of any assumptions, presumptions, key points of discussion, recommendation or any points of similar nature submitted along with the bid, FCI reserves the right to reject the bids. If there is any discrepancy in the commercial bid, it shall be dealt as per relevant clauses under Section 6.8.5.2.

6.10 Pre-Qualification (PQ) Criteria

The bidder's response shall be evaluated as per the eligibility criteria given in the table below. The Bid Evaluation Committee shall validate the bidder's compliance according to the eligibility criteria along with the format and supporting documents mentioned against each clause. Each of the eligibility criteria mentioned below is mandatory. The bidder shall qualify for commercial evaluation only if all the eligibility criteria are met. In case the bidder does not meet any one of the conditions, the bidder shall be disqualified and shall not be considered for the commercial evaluation.

#	Basic Requirement	Specific Requirements	Supporting Documents Required
1	Company Registration (Legal Entity)	- The bidder shall be a company, registered under Indian Companies Act, 1956/ Companies Act, 2013. OR A partnership firm registered under Indian Partnership Act, 1932. OR A partnership firm registered under Indian LLP act 2008. - The bidder shall be registered with the Goods and Services Tax (GST) Authorities and shall: ➤ Have GSTIN where the business is located ➤ Have PAN <i>Note: Consortium/Joint Venture in any form are not allowed.</i>	1. Copy of valid Registration Certificates or Copy of Certificates of incorporation

#	Basic Requirement	Specific Requirements	Supporting Documents Required
2	Financial: Turnover from IT/ITES	The bidder shall have a minimum of INR 500 Crores as Annual turnover during the last three (3) financial years i.e., from 2020-21 to 2022-23 (as per the last published audited balance sheets). <i>Note: The turnover refers to the bidder's turnover and not the composite turnover of its subsidiaries/sister concerns.</i>	CA Certificate with CA's Registration Number and Seal *Note: For the year 2022-23, provisional certificate shall be accepted Please refer Form 7 of Appendix - III

#	Basic Requirement	Specific Requirements	Supporting Documents Required
		been otherwise disqualified pursuant to debarment proceedings. • Bidder shall not have a conflict of interest in the procurement in question as specified in the bidding document. • Bidder shall be an individual organization. Consortium shall not be allowed. • Bidder shall comply with the Memorandum No. F. No. 6/18/2019-PPD dated 23-Jul-2020 and further, superseded by Memorandum No. F.7/10/2021/-PPD (1) dated 23-Feb-2023 and issued by the Public Procurement Division, Department of Expenditure, Ministry of Finance, regarding Restrictions Rule 144 (ix) of the GFR.	
5	Relevant Business Experience	The bidder shall have experience of successfully completed design, development, implementation, and maintenance of large ICT systems in the last five (5) financial years (FY 2018-19 to FY 2022-23) for any Indian Govt. (Central/State)/Ministries/PSUs/Government Autonomous Bodies, of value specified herein: Single project of value INR 80 Cr. or more OR Two projects each having minimum value of INR 60 Cr. or more OR	Work Order and Completion certificate from the client OR Work order along with certificate of completion Certified by statutory auditor/CA/CS OR Work Order along with Phase Completion Certificate from the client for ongoing projects. <u>Please refer Form 8 of Appendix - III</u>

#	Basic Requirement	Specific Requirements	Supporting Documents Required
		Three projects each having minimum value of INR 40 Cr. or more	
6	Manpower Strength	The bidder must have at least 500 technically qualified professionals on its role in the Application development, deployment, O&M, who have prior experience in Application system maintenance & management. Out of the 500 technical manpower, At least 300 resources shall be B.E/B.Tech/MCA/MBA with developer technical certifications. At least 30 professionals with PMP certification. At least 20 professionals with ITIL V3 (Intermediate or above)/TOGAF certifications.	Self-Certification by the authorised signatory/ HR department
7	Certifications	The bidder must have following certificates, valid at the time of submission of bid: • ISO 9001 • ISO 20000 • ISO 27001 • CMMI Level 5	Copy of Valid Certificate and undertaking to renew the certificates in case either of these is getting expired in one (1) Year.
8	Bidder Location	The bidder shall have at least 1 office in Delhi NCR	Self-Certification by the authorised signatory

6.11 Technical Qualification (TQ) Criteria

All the eligible bidders who have given a certificate of conformity/no deviation and meet eligibility criteria of the RFP shall be evaluated on technical parameters as given below:

#	Eligibility Criteria	Max Marks	Supporting Documents Required
1.	The bidder shall have experience of successfully completed design, development, implementation, and maintenance of large ICT systems (preferably supply chain management applications) in the last five (5) financial years (FY 2018-19 to 2022-23) for any Indian Govt. (Central/State)/Ministries/PSUs/Government Autonomous Bodies (min. INR 40 Cr.) with below criteria: Scoring Criteria: ≥ 5 projects: 20 Marks = 4 projects: 15 Marks = 3 projects: 10 Marks	20	A. Documents required in case of Completed project: Copy of Purchase Order / Work order / Agreement / Contract along with the Completion certificate from Client on client's letterhead and Assignment Details as per the format provided in Bidding Forms. B. Documents required in case of Ongoing project (Project in O&M phase after Go-Live): Copy of work order/Agreement, Go-live certificate from client on client's letterhead along with Assignment Details as per the format provided in Bidding Forms <u>Please refer Form 8 of Appendix – III</u> Note: - The credentials regarding experience and past performance to the extent required as per eligibility criteria submitted by the bidder may be verified by FCI, from the parties for whom work has been done. - Projects shall be considered COMPLETED only upon GO-LIVE.
2	The bidder shall at least have a combination of the below mentioned number of technically qualified professionals (on payroll) with prior experience in application design, development, implementation, and maintenance of similar kind of projects.	20	Self-Certification by the authorized signatory and HR department on company's Letterhead. <u>Please refer Form 10</u>

#	Eligibility Criteria	Max Marks	Supporting Documents Required
	Technical Qualification: • B.E/B.Tech/MCA/MBA with technical certifications • Project management professionals with PMP certification • ITIL V3 certifications or similar. Scoring Criteria: • ≥ 1500 resources: 20 Marks • ≥ 1000 and < 1500 resources: 15 Marks • ≥ 500 and < 1000 resources: 10 Marks <i>Note: Third party/ outsourced resources shall not be considered.</i>		
3	Annual Turnover of the bidder from IT/ITeS during the last three (3) financial years, i.e., from 2020-21 to 2022-2023 (as per the last published audited balance sheets): Scoring Criteria: • ≥ INR 1000 Cr. = 10 Marks • ≥ INR 750 Cr. and < INR 1000 Cr. = 7.5 Marks • ≥ INR 500 Cr. and < 750 Cr. = 5 Marks	10	CA Certificate with CA's Registration Number and Seal Please refer Form 7 of Appendix - III
4	The bidder shall have experience of successfully completed design, development, implementation, and maintenance of large ICT systems in the last five (5) financial years (FY 2018-19 to FY 2022-23) for any Indian Govt. (Central/State)/Ministries/PSUs/Government Autonomous Bodies, of value specified herein: Scoring Criteria: a. Single project of value INR 100 Cr. OR b. Two projects each having value of INR 80 Cr. OR c. Three projects each having value of INR 60 Cr. = 20 Marks a. Single project of value INR 90 Cr. OR b. Two projects each having value of INR 70 Cr. OR c. Three projects each having value of INR 50 Cr. = 15 Marks	20	A. Documents required in case of Completed project: Copy of Purchase Order / Work order / Agreement / Contract along with the Completion certificate from Client on client's letterhead and Assignment Details as per the format provided in Bidding Forms. B. Documents required in case of Ongoing project (Project in O&M phase after Go-Live): Copy of work order/Agreement, Go-live certificate from client on client's letterhead along with Assignment Details as per the format provided in Bidding Forms Please refer Form 8 of Appendix - III

#	Eligibility Criteria	Max Marks	Supporting Documents Required
	a. Single project of value INR 80 Cr. OR b. Two projects each having value of INR 60 Cr. OR c. Three projects each having value of INR 40 Cr. = 10 Marks		
5	Approach and Methodology towards design, development, and implementation of a robust ANNA DARPAN. • Understanding of the Department ecosystem, objectives of Project, Scope of work, Challenges, mitigation, Solution requirements and business processes = 10 Marks • Proposed Solution comprising of proposed technology stack and solution design and architecture, Capacity building/Training Plan = 10 Marks • Previous experiences in Design, Development, Deployment, and maintenance of a Large Supply chain Management application. Experience in Integrating applications and setting up Analytics platform= 10 Marks	30	Presentation on Approach and Methodology which shall cover minimum points mentioned.

Note:

- Rejection of the bid:** FCI reserves the right to reject the bid of any bidder if the proposed solution is not found satisfactory or has not covered the necessary aspects of the solution.
- Bidders scoring more than **70 Marks** in the Technical Evaluation (**Minimum 50% marks in each Category/Criteria**) shall be eligible for commercial/financial bid opening.
- Technical Proposals of only those bidders who are qualifying as per the Pre-Qualification Criteria given in the table above shall be taken up by FCI for further evaluation in accordance with other documents submitted.
- Financial proposals of those bidders who are disqualified during Technical Evaluation for not meeting the pre-qualification criteria or due to the non-compliance to the Technical Specifications given in the RFP shall not be opened. In such case, a notification to that effect shall be sent to the bidder. FCI shall simultaneously notify those bidders who are qualified in Technical Evaluation and inform them of the date, time, and location for online opening of the Financial Proposals.
- Prices shall not be mentioned anywhere in their technical bid by the bidder. If found, FCI reserves the right to reject the bid.
- The successful bidder shall be selected on basis of **QCBS (70:30)**.

6.11.1 QCBS Evaluation

The bid shall be awarded to the bidder who has scored highest marks in the process (70% weightage for technical and 30% for financial bid).

The process of selection of successful bidder for the purpose of award of project shall be as follows:

a. **Calculation of Technical Score (ST) = $100 \times (T/TH)$**

T: Technical Marks obtained by the individual bidder.

TH: Highest technical marks obtained by bidder.

b. **Calculation of Financial Score (SF) = $100 \times (FL/F)$**

F: Total Financial Bid amount quoted by individual bidder.

FL: Lowest Total Financial Bid amount quoted by individual bidder.

c. **Calculation of Final Composite Score (S):** The Final Composite Score (S) shall be computed for each firm/bidder by assigning 70% weightage to the Technical Score (ST) and 30% weightage to Financial Score (SF) using the formula: **$S = (ST \times 70\%) + (SF \times 30\%)$**

Note:

- a. All scores shall be rounded off to two decimal places.
- b. In case of a tie in the final composite score, the bidder with the higher Technical Score shall be selected first for further processing.

6.12 Disqualification Criteria

6.12.1 Disqualification of Bidder

The bidder is liable to be disqualified in the following cases:

- a. Bidders who have been blacklisted or otherwise debarred in the last three (03) years by FCI/DFPD or any department of Central or State Government or any other Central/State PSU as on date of submission of this bid.
- b. Any bidder whose contract with the Food Corporation of India, or any department of Central or State Government or any other PSU has been terminated before the expiry of the contract period on account of breach of contract at any point of time during last five years, shall be ineligible.
- c. If the proprietor/ any of the partners of the firm/ executive member of cooperative /any of the Directors of Board of Directors of the bidder have been, at any time, convicted by a court of an offence and sentenced to imprisonment for a period of three years or more, such bidder shall be ineligible.
- d. While considering ineligibility arising out of any of the above clauses, incurring of any such disqualification in any capacity whatsoever (even as a proprietor, partner in another firm, executive member of cooperative or as director of a company) shall render the bidder disqualified.
- e. If bidder is blacklisted by GST/ any other authorities.

6.12.2 Disqualification of Bid

The bid is liable to be disqualified in the following cases:

- a. Bidder's bid is conditional and has deviations from the terms and conditions of RFP.
- b. The bid submitted is incomplete.
- c. The bid is not accompanied by all the requisite documents.
- d. Information submitted in technical bid is found to be misrepresented, incorrect or false, accidentally, unwittingly, or otherwise, at any time during the processing of the contract (no matter at what stage) or during the tenure of the contract including the extension period if any.
- e. Commercial bid is submitted in the same folder as that of the technical bid or prices are indicated in technical bid.
- f. Bidder tries to influence the bid evaluation process by unlawful/corrupt/fraudulent means at any point of time during the bid process.

7 Appointment of System Integrator

7.1 Award Criteria

- a. The selection of the System Integrator (SI) for this project shall be done on **QCBS basis (70:30)**. The commercial bids of the qualified bidders only shall be opened on the notified date & time and reviewed to determine whether they are substantially responsive. Bids that are not substantially responsive are liable to be disqualified at the committee's discretion.
- b. The contract shall be awarded to the successfully qualified bidder by way of issuance of acceptance letter by FCI by post/e-mail/hand delivery under acknowledgment and the bidder shall immediately act upon such acceptance letter. Acceptance conveyed by FCI shall constitute the contract between the qualified bidder and FCI and the contract shall be effective from the date of signing of contract or a later date as specified in the acceptance letter.
- c. FCI reserves the right to accept or reject any or all the bids without assigning any reason/notice whatsoever and any bid and reserves the right to scrap the bid enquiry at any stage without assigning any reasons and corporation shall not be liable for any costs and consequences thereof.

7.2 Notification of Award

Prior to the expiration of the validity period, FCI shall notify the qualified bidder in writing or by fax or email, that their bid has been accepted. In case the tendering process has not been completed within the stipulated period, FCI may like to request the bidder to extend the validity period of the bid. The notification of award shall constitute the formation of the contract.

7.3 Contract Finalization and Award

FCI shall not negotiate with the bidder(s) at any stage of the bidding process or afterwards, based on eligibility and commercial evaluation to the proposed project, as per the guidelines provided by CVC. Contract agreement shall be finalized and signed with the qualified bidder.

7.4 Performance Bank Guarantee (including e-BG)

- a. The security deposit in the form of PBG (including e-BG) furnished by the successful bidder shall be subject to the terms and conditions given in the RFP and its subsequent corrigenda and FCI shall not be liable for payment of any interest on the security deposit.
- b. The security deposit shall be refunded/returned to the successful bidder on due and satisfactory performance of the services and on completion of obligations by the successful bidder under the terms of contract and submission of clear "No Dues Certificates" by FCI subject to such deductions from the security as may be necessary for making up FCI's claim against successful bidder. No interest is payable on the amount of security deposit lying with FCI under the contract, in any case. The decision of FCI as to the amount determined for deduction from the security deposit shall be final and binding on the successful bidder.
- c. The successful bidder shall ensure that security deposit amount is replenished within 7 days of any deduction made by FCI.
- d. The selected bidder shall provide PBG (including e-BG) from a scheduled commercial bank notified by RBI (excluding all urban/rural/state co-operative banks and Gramin Banks), within 15 days from the Letter of Award for a value equivalent to 10% of the total quoted value.
- e. The PBG (including e-BG) shall be kept valid for 84 months of the project completion date. The PBG (including e-BG) shall contain a claim period of six months from the last date of validity.
- f. SI shall be responsible for extending the validity date and claim period of the PBG (including e-BG) as and when it is due because of non-completion of the project and warranty period. In case of failure of SI to deposit the PBG (including e-BG) within 15 days of acceptance of his tender, further extension of 7 days can be given by FCI subject to levy of penalty @ 1% of PBG (including e-BG). FCI shall invoke the PBG (including e-BG) in case the selected SI fails to discharge their contractual obligations during the period or FCI incurs any loss due to SI's negligence in carrying out the project implementation as per the agreed terms & conditions.
- g. Under circumstances where the SI does not execute the work as per the scope, requirements, SLAs, terms, and conditions stated in the RFP and its subsequent corrigenda or the signed contract etc., the PBG (including e-BG) shall be forfeited.
- h. The EMD of the selected agency shall be refunded as soon as may be, after submission of PBG (including e-BG) and subject to entering a contract signing of SLA with FCI.
- i. The BG issuing bank shall send cover for BG issued through SFMS platform to the FCI banker, i.e., ICICI Bank Ltd., 9A, Phelps Building, Connaught Place, New Delhi – 110001 (IFSC Code: ICIC0000007) as per the details below:
 - i. MT760 COV for issuance of Bank Guarantee.
 - ii. MT767 COV for amendment of Bank Guarantee.
 - iii. Issuing bank shall mention FCI beneficiary office code in field code in field 7037 of MT760COV/MT767COV.
 - iv. FCI Beneficiary code will be "FCIHA11" where HA11 is four-digit unit code of respective office of FCI.
- j. The bidder shall submit the copy of SFMS message as sent by the issuing bank branch along with the original Bank Guarantee.
- k. BG submitted without these details shall not be accepted.
- l. Proforma of BG shall also be amended to include the following message:
"Cover message for this BG has been sent to FCI bankers i.e., ICICI Bank Ltd., 9A, Phelps Building, Connaught Place, New Delhi – 110001 (IFSC Code: ICIC0000007) through SFMS."

7.5 **Signing of Contract**

Post award of project and after submission of PBG (including e-BG) by the qualified bidder, FCI and the SI shall enter a contract, incorporating all clauses of the RFP and its corrigenda, pre-bid clarifications and the bid of the bidder etc.

7.6 **Fraud and Corrupt Practices**

- a. The bidders and their respective officers, employees and advisors shall observe the highest standard of ethics during the selection process. Notwithstanding anything to the contrary contained in this RFP, FCI shall reject a bid without being liable in any manner whatsoever to the bidder, if it determines that the bidder has, directly or indirectly or through an agent, engaged in corrupt, fraudulent, coercive, undesirable or restrictive practice (collectively the “Prohibited Practices”) in the selection process or after the issue of the contract or the execution of the agreement.
- b. In such an event, FCI shall, without prejudice to its any other rights or remedies, forfeit/encash and appropriate the PBG (including e-BG) as mutually agreed genuine pre-estimated compensation and damages payable to the authority for, inter alia, time, cost, and effort of the authority, regarding the RFP, including consideration and evaluation of such bidder’s bid. Such bidder shall also not be eligible to participate in any tender issued by FCI for a period of five years from the date of occurrence of event.
- c. Following terms shall have the meaning hereinafter respectively assigned to them:
 - i. “Corrupt practice” means:
 - A. The offering, giving, receiving, or soliciting, directly or indirectly, of anything of value to influence the action of any person connected with the selection process (for avoidance of doubt, offering of employment to or employing or engaging in any manner whatsoever, directly or indirectly, any official of FCI who is or has been associated in any manner, directly or indirectly with the selection process or the contract agreement or has dealt with matters concerning the agreement or arising there from, before or after the execution thereof, at any time prior to the expiry of one year from the date such official resigns or retires from or otherwise ceases to be in the service of FCI, shall be deemed to constitute influencing the actions of a person connected with the selection process); or
 - B. Save as provided herein, engaging in any manner whatsoever, whether during the selection process or after the execution of the agreement any person in respect of any matter relating to the project or the agreement, who at any time has been or is a legal, financial or technical consultant/advisor of FCI in relation to any matter concerning the project.
 - ii. “Fraudulent practice” means a misrepresentation or omission of facts or disclosure of incomplete facts, to influence the selection process.
 - iii. “Coercive practice” means impairing or harming or threatening to impair or harm, directly or indirectly, any persons or property to influence any person’s participation or action in the selection process.
 - iv. “Undesirable practice” means:

- A. Establishing contact with any person connected with or employed or engaged by FCI with the objective of canvassing, lobbying or in any manner influencing or attempting to influence the selection process; or
- B. Having a conflict of interest.
- v. “Restrictive practice” means forming a cartel or arriving at any understanding or arrangement among bidders with the objective of restricting or manipulating a full and fair competition in the selection process.
- d. The selected bidder (or SI) represents, warrants, and covenants that it has given no commitments, payments, gifts, kickbacks, lavish or expensive entertainment, or other things of value to any employee or agent of FCI or its nominated agencies in connection with this agreement and acknowledges that the giving of any such payment, gifts, entertainment, or other things of value is strictly in violation of FCI standard policies and shall result in cancellation of this agreement, or the SLA.

7.7 Conflict of Interest

- a. A bidder shall not have a “conflict of interest” that affects the bidding process. Any bidder found to have a conflict of interest shall be disqualified. In the event of disqualification, FCI shall be entitled to forfeit the PBG, as the case may be, as mutually agreed genuine pre-estimated loss and damage likely to be suffered and incurred by FCI and not by way of penalty for, inter-alia, the time, cost and effort of FCI, including consideration of such bidder’s proposal (the “damages”), without prejudice to any other right or remedy that may be available to FCI under the bidding documents and/or the contract agreement or otherwise. Without limiting the generality of the above, a bidder shall be deemed to have a conflict of interest affecting the bidding process, if:
 - i. The bidder, and any other member thereof (or any constituent thereof) have common controlling shareholders or other ownership interest; provided that this disqualification shall not apply in cases where the direct or indirect shareholding of a bidder, its member thereof (or any shareholder thereof having a shareholding of more than 5% (five per cent) of the paid up and subscribed share capital of such bidder as the case may be) in the other bidder, its member is less than 5% (five per cent) of the subscribed and paid up equity share capital thereof; provided further that this disqualification shall not apply to any ownership by a bank, insurance company, pension fund or a public financial institution referred to in subsection (72) of section 2 of the Companies Act, 2013.
 - ii. For the purposes of this clause indirect shareholding held, through one or more intermediate persons shall be computed as follows: (aa) where any intermediary is controlled by a person through management control or otherwise, the entire shareholding held by such controlled intermediary in any other person (the “Subject Person”) shall be taken into account for computing the shareholding of such controlling person in the Subject Person; and (bb) subject always to sub-clause (aa) above, where a person does not exercise control over an intermediary, which has shareholding in the Subject Person, the computation of indirect shareholding of such person in the Subject Person shall be undertaken on a proportionate basis; provided, however, that no such shareholding shall be reckoned under this sub-clause (bb) if the shareholding of such person in the intermediary is less than 26% of the subscribed and paid up equity shareholding of such intermediary; or
 - iii. A constituent of such bidder is also a constituent of another bidder; or

- iv. Such bidder thereof receives or has received any direct or indirect subsidy, grant, concessional loan or subordinated debt from any other bidder, its member, or has provided any such subsidy, grant, concessional loan or subordinated debt to any other bidder, its member, or any associate thereof; or
- v. Such bidder has the same legal representative for purposes of this bid as any other bidder; or
- vi. Such bidder thereof, has a relationship with another bidder, thereof, directly or through common third party/ parties, that puts either or both in a position to have access to each other's information about, or to influence the bid of either or each other.
- b. A bidder shall be liable for disqualification and forfeiture of PBG (including e-BG) if any legal, financial, or technical advisor of FCI in relation to the project is engaged by the bidder, or any associate thereof in any manner for matters related to or incidental to such project during the bidding process or after the Execution of the Contract Agreement.
- c. In the event any such advisor is engaged by the selected bidder after execution of the contract agreement for matters related or incidental to the project, then notwithstanding anything to the contrary contained herein or the contract agreement and without prejudice to any other right or remedy of the authority, including the forfeiture and appropriation of the PBG (including e-BG), as the case may be, which FCI may have there under or otherwise, the contract agreement, as the case may be, shall be liable to be terminated without FCI being liable in any manner whatsoever to the selected bidder for the same.
- d. For the avoidance of doubt, this disqualification shall not apply where such adviser was engaged by the bidder, its member or associate in the past but its assignment expired or was terminated prior to the application due date. Nor shall this disqualification apply where such adviser is engaged after a period of 3 (three) years from the date of commercial operation of the project.
- e. Any other incidents not falling under the above-mentioned clauses, the decision of FCI as to what constitute conflicting shall be final.

7.8 Right to Vary Quantity

- a. At the time of signing of contract and post award of work, the quantity of goods, works or services originally specified in the bidding documents may be varied. It shall be varied without any change in the unit prices or other terms and conditions of the bid and the bidding documents.
- b. In the event of any variation sought after the award of work, the same shall be considered as a change request. The Change Request Note (CRN) submitted to FCI in this regard shall be evaluated by a committee formed by FCI and the decision of the committee shall be final on the scope and rate.
- c. Repeat orders for extra items or additional quantities may be placed, if it is provided in the bidding document, on the rates and conditions given in the tender and agreed in the contract. Delivery or completion period may also be proportionally increased.
- d. During implementation and detailed due diligence, the quantities of certain components may be varied under the scope of the bidder. The bidder shall be required to have provisions to accommodate such variations in quantities at the unit rates quoted in the tender response.
- e. Changes may be in the range of +10% of the specified bill of quantities or lesser.

8 Milestone, Deliverable & Payment Terms

The overall project shall be of 21 months from the time of signing of contract given for achieving 100% go-live across all locations. The bidder shall use the below table to have an understanding on the deliverables and expected timelines during the bid submission. The bidder may suggest any additional deliverables, as deemed necessary.

Time "T" is the signing of contract between FCI and the successful bidder.

ANNA DARPAN TIMELINES				
Phase 1A: Requirement Gathering, Gap Analysis and Detailed Documentation of the complete system (Development, Integration and Analytics)				
#	Milestone	Timelines (In Weeks)	Deliverables	Payment
1A.1	Signing of Contract, Vendor Onboarding and Project Kick-Off	T	-	3% of the price quoted in financial bid mentioned in Section 17.3.1
1A.2	Project Team Deployment & Submission of Implementation Roadmap	T+4	1. Resource Deployment Plan 2. Detailed Project Management Plan and Implementation Roadmap 3. Risk Management and Mitigation Plan 4. Communication Plan	
1A.3	Requirement Gathering, Analysis and Documentation of the complete system	T+20	1. System Requirement Specification (SRS) 2. Functional Requirement Specification (FRS) 3. High Level Design Document (HLD) including Integration 4. Low Level Design Document (LLD) 5. Technical Architecture Document (TAD) 6. Wireframe Design 7. Data Migration Plan 8. Analytics Use Cases & User Stories 9. Traceability Matrix	5% of the price quoted in financial bid mentioned in Section 17.3.1

Phase 1B: Design, Development, Implementation, Testing & Rollout of Core Modules - Web & Mobile App				
#	Milestone	Timelines (In Weeks)	Deliverables	Payment
1B.1	Development, Integration & Testing of the core modules	T+5 to T+36	1. Unit Testing Report 2. Integration Testing Report 3. Functional Testing Report	12% of the price quoted in

Phase 1B: Design, Development, Implementation, Testing & Rollout of Core Modules - Web & Mobile App

8.1 **Liability of Deployed Resources**

- a. All resources deployed by the SI shall be engaged by them as their own employees in all respects.
- b. All rights and liabilities under the prevailing acts, rules and statutory obligations as applicable, in respect of all such resources shall exclusively be that of the SI.
- c. SI shall be bound to take care of their resources under the applicable acts for any statutory modifications thereof or otherwise for or in respect of any damages or compensation payable in consequence of any accident or injury sustained by any person whether in employment with the SI or not.
- d. SI shall be liable for making contributions in accordance with the provisions of the applicable acts and the schemes framed in respect of the resources deployed by them. FCI shall be in no way responsible for making any contributions towards any statutory provisions or acts.

8.2 Payment Schedule

- a. Payment to SI after successful completion of the target milestones and delivery of the specified project deliverables.
- b. Payment to SI for quoted amount of Handholding staff shall be on quarterly basis depending on satisfactory performance report from respective FCI Offices.
- c. FCI shall process the payment within 4 weeks of receiving of invoice along with proof of acceptance of deliverable.
- d. In case SI completes the assigned work before deadline, payment shall be released accordingly subject to the confirmation from FCI.
- e. SI shall raise a digitally signed payment invoice by uploading in the Bill Tracking Software (BTS) of FCI or any other software provided by FCI during the contract period. Credentials for the respective portal shall be provided by FCI.
- f. Payment shall be made after deduction of applicable penalties capped at 10% of the total Project value subject to maximum 10% penalty on the respective invoice value. Any applicable penalties shall be exclusive of any taxes.
- g. Quarterly payment for O&M phase shall commence only after successful completion of STQC audit.

Note: By successful rollout in a depot, it is meant that the manpower at all levels is trained adequately, ANNA DARPAN solution is completely operational in the depots and all reports are generated on-line through the new system after the Go-Live. Please refer Section 3.11 for Go-live Acceptance Criteria for details.

SECTION III – TERMS & CONDITIONS OF CONTRACT

9 Terms & Conditions of Contract

9.1 Copyright/Intellectual Property Rights (IPR)

- a. The copyright/ IPR in all design documents, architecture, application source code, DB schemas and other materials containing data and information solely and exclusively developed for FCI by the Bidder related to this project and its scope of work vests solely with FCI.
- b. The software (except third party software/ bidder's pre-existing IPR), data, manual, CDs, Drivers, Training material or similar shall be the exclusive property of FCI after it is successfully tested and implemented. The Intellectual Property Rights in all Standard Software and Standard Materials shall remain vested in the owner of such rights. Source code and IPR of the newly developed software/customized software shall be with FCI.
- c. In the case of Commercially-Off-The-Shelf (COTS) software, the licenses must be procured in the name of FCI and shall be of perpetual use.
- d. The successful bidder shall not provide or use the goods/services for the performance of work, which shall infringe any third-party patent, trademark, registered design, or other intellectual property rights.
- e. The successful bidder shall submit declaration regarding non-violation / infringement of any patent, trademark, registered design, or other intellectual property rights. [Form 18 of Appendix - III](#)
- f. FCI shall have complete and total ownership and control over all the data generated, stored, and processed during the Project.
- g. FCI shall be owner of IPR for application developed.
- h. The successful bidder shall indemnify, defend, and hold FCI harmless during and after the term of this contract from and against all liabilities, damages, losses, expenses, demands, actions, proceedings, costs and claims arising out of the third party IPR infringement under this contract.
- i. The items/services are reserved for **exclusive purchase from Local suppliers** (i.e., whose offered product or service meets the minimum local content) as per the "**Public Procurement (Preference to Make in India) order 2017 of DPIIT (previously known as DIPP), GoI**". Only local suppliers shall be eligible for participation in the tender & FCI shall have rights to place contract/order on local suppliers only. Techno-commercially qualified Local Supplier bidders shall be considered for further processing.

9.2 Acceptance Tests

The selected bidder in presence of FCI authorized officials shall conduct acceptance tests as part of implementation and rollout of the ANNA DARPAN across selected offices of FCI (including HQ, ZOs, ROs, and DOs) in a phased manner. No additional charges shall be payable by FCI for carrying out these acceptance tests.

9.3 Extension of Contract Period

After completion of five (5) years of O&M support, the contract period of the SI may be extended subjected to its satisfactory performance. FCI may, at its discretion, extend the contract period for an additional period of three (3) years with an annual increment of 7% on the annual cost at the end of 5th year of actual completion of O&M support phase. The contract may be further

extended for a period of two (2) years after completion of the additional period of three (3) years subject to mutual consent between FCI and the selected bidder on the same terms and conditions as mentioned in this RFP. Also, in case the contract is extended, SI shall extend the PBG (including e-BG) as well for the decided period.

Illustration for the same is as under:

- a. *Per annum accepted rate by bidder/SI for O&M: INR 1,00,000*
- b. *For 6th year, O&M rate per annum: INR 1,00,000+ 7% = INR 1,07,000*
- c. *For 7th year, O&M rate per annum: INR 1,07,000 + 7 % = INR 1,14,490 and so on.*
- d. *Similar escalation of rate may also be affected in quoted man-month rate for any works to be undertaken as change request, if any.*

9.4 Termination Clause

Right to Terminate the Contract

- a. FCI shall reserve the right to terminate the contract and recover expenditure incurred by FCI under the following circumstances:
 - i. The selected bidder commits a breach of any of the terms and conditions of the bid.
 - ii. The bidder goes into liquidation, voluntarily or otherwise.
 - iii. If the selected bidder fails to complete the assignment as per the timelines prescribed in the RFP and the extension if any allowed, it shall be a breach of contract. The FCI reserves its right to cancel the order in the event of delay and encash the PBG (including e-BG) as liquidated damages for the delay.
 - iv. If deductions on account of liquidated damages exceeds more than 10% of the total quoted value.
 - v. In case the selected bidder fails to deliver the quantity as stipulated in the delivery schedule, FCI reserves the right to procure the same or similar product from alternate sources at the risk, cost, and responsibility of the selected bidder.
 - vi. After the signing of the contract, if the selected bidder does not perform satisfactorily or delays execution of the contract, FCI reserves the right to get the balance contract executed by another party of its choice by giving one month's notice for the same. In this event, the selected bidder is bound to make good of the additional expenditure, which FCI may have to incur in executing the balance contract. This clause is applicable if, for any reason, the contract is terminated.
- b. FCI shall send a formal notice of termination, 30 days prior to date of termination, to the selected bidder.
- c. FCI reserves the right to recover any dues payable by the selected bidder from any amount outstanding to the credit of the selected bidder, including the pending bills and/or invoking the PBG (including e-BG) under this contract.

9.5 Consequences of Termination

- a. In the event of termination of the contract due to any reason whatsoever [whether consequent to the stipulated term of the contract or otherwise], FCI shall be entitled to impose any obligations and conditions as may be necessary to ensure efficient transition and effective

business continuity of the service(s) which the SI shall be obliged to comply with and take all available steps to minimize loss resulting from that termination/breach, and further allow the next successor SI to take over the obligations of the erstwhile SI in relation to the execution/continued execution of the scope of the contract.

- b. Nothing herein shall restrict the right of FCI to invoke FCI PBG (including e-BG) and any other guarantees, securities furnished, , and pursue such other rights and/or remedies that may be available to FCI under law or otherwise.
- c. The termination hereof shall not affect any accrued right or liability of either Party nor affect the operation of the provisions of the Contract that are expressly or by implication intended to come into or continue in force on or after such termination.

9.6 Liquidated Damages

- a. Notwithstanding FCI's right to cancel the order, liquidated damages shall be deducted for delay in rollout of ANNA DARPAN (Phase 1B & Phase 2) at 1% (one percent) per week of total payable amount for Milestone 1B.6 and 2.6 respectively.
- b. Breach of service levels as defined under Section 10.1 to 10.7 shall attract deductions as defined under the mentioned sections.
- c. Sum of liquidated damages applicable on delays in rollout and penalties applicable on breach of Service Level Agreement (SLA) shall be capped at 10% of the total Project value subject to maximum 10% penalty on the respective invoice value.
- d. If the selected SI successfully rolls out the Phase 2 within the defined timeline, any penalty imposed previously due to delay in the rollout of Phase 1B shall be adjusted or waive-off and applicable payment shall be made to SI.
- e. Delays not attributable to selected bidder shall be considered for exclusion for the purpose of computing liquidated damages at the sole discretion of FCI.

9.7 Audits by Third Party

FCI shall conduct STQC audit (Please refer Section 3.12 for details)

9.8 Deductions

- a. The bidder shall perform its obligations under the agreement entered with FCI, in a professional manner.
- b. In the event of failure of maintaining the operational SLAs, deductions shall be carried out as per Section 10 in this RFP.
- c. FCI may recover such number of deductions from any payments being released to the selected bidder, irrespective of the fact whether such payment is relating to this contract or otherwise.
- d. If any act or failure by the selected bidder under the agreement results in failure or inoperability of systems and if FCI must take corrective actions to ensure functionality of its property, FCI reserves the right to impose penalty, which may be equal to the cost it incurs or the loss it suffers for such failures.

- e. FCI may impose penalty to the extent of damage to any of its equipment if the damage was due to the actions directly attributable to the staff of the selected bidder.
- f. FCI shall implement all deductions after giving due notice to the bidder.
- g. If the selected bidder fails to complete the due performance of the contract in accordance with the specification and conditions as per SLAs, FCI reserves the right either to cancel the order and/or to recover a suitable amount as deemed reasonable as Penalty / Liquidated Damage for non-performance.

9.9 Governing Laws and Dispute Resolution Mechanism

- a. The contract and the transactions contemplated therein shall be governed by and construed in accordance with the laws of India. All the parties and their personnel deciding to participate in this process shall be deemed to be submitting themselves to the laws of India. The courts at Delhi shall have exclusive jurisdiction for settlement of any dispute arising out of this contract.
- b. In case of any dispute arising out of and touching upon the Contract, the same shall be first referred to the Dispute/Grievance Redressal Committee constituted by FCI and functioning at Headquarter of the Corporation, with a view to settle the disputes. If any dispute remains thereafter, the same shall be settled in the Court of law having competent jurisdiction. The Courts in New Delhi shall have exclusive jurisdiction to adjudicate the disputes arising under the Contract.

9.10 Notices

- a. Notice or other communications given or required to be given under the contract shall be in writing and shall be faxed/e-mailed/hand-delivered with acknowledgement thereof or transmitted by pre-paid registered post or courier.
- b. Any notice or other communication shall be effective when delivered or on the Notice's effective date, whichever is later if hand delivered & if sent by registered post then on expiry of seven days from the date of posting.
- c. FCI shall issue a notice or communication to SI seeking justification for any delay in the delivery of services as soon as an impediment in delivery of services occurs or within 30 days from such occurrence.

9.11 Force Majeure

A Force Majeure means any event or circumstance or a combination of events which are beyond the control of the selected bidder, that is not foreseeable, is unavoidable, and its origin is not due to negligence or lack of care on the part of the selected bidder. Such events may include, but not be limited to, acts of the FCI in its sovereign capacity, wars or revolutions, fires, floods, epidemics, due to rains at identified locations, quarantine restrictions, and freight embargoes.

Procedure for Force Majeure

If a bidder claims relief on account of a force majeure, then the bidder claiming to be affected by such event shall, as soon as reasonably practicable and in any event within seven (7) days of occurrence of such force majeure, give notice of and describe in reasonable detail the effect of

such force majeure to FCI in writing, including the dates of commencement and estimated cessation of such force majeure and its effects on the bidder's obligations under this agreement. Upon cessation of the situation which led to a bidder claiming force majeure under this section the bidder shall within two days thereof notify the Corporation in writing of the cessation and the bidder shall as soon as practicable thereafter continue performance of all obligations under this agreement but without prejudice to the excuse of performance of all obligations during the continuance of the force majeure.

Prolonged Force Majeure

- a. In the event Force Majeure continuously impedes or prevents a Bidder's performance for longer than seven consecutive days from the date of commencement of such Force Majeure, notwithstanding the suspension of the obligations of the Bidder, they shall decide by mutual consent through consultation either the terms upon which to continue the performance of this Agreement or to terminate this Agreement.
- b. Any period within which a Party shall complete, pursuant to this Contract, any action or task, shall be extended for a period equal to the time during which such Party was unable to perform such action because of Force Majeure.
- c. The Bidder is entitled to the payments for the portion of the work already completed before the happening of any event constituting force Majeure culminating in termination of contract. Decision of FCI in this regard shall be final.

9.12 Failure to Agree with the Terms and Conditions of the RFP

Failure of the successful bidder to enter into Contract/Agreement as per the Terms & Conditions of the RFP shall constitute sufficient grounds for the annulment of the award, in which event FCI may award the contract to the next best value bidder or call for new bids from the interested bidders. In such a case, PBG (including e-BG) of the successful bidder shall be encashed and fresh tenders shall be invited at the risk and cost of the bidder.

9.13 Defect Liability

SI warrants that the system, including all Information Technologies, Materials, and other Goods supplied and Services provided, shall be free from defects in the design, engineering, materials, and workmanship that prevent the System and/or any of its components from fulfilling the Functional and System Requirements or that limit in a material fashion the performance, reliability, or extensibility of the System and/or Subsystems. Exceptions and/or limitations, if any, to this warranty with respect to Software (or categories of Software), shall be as specified by the SI in agreement with FCI. Commercial warranty provisions of products supplied.

9.14 Functional Guarantees

The selected bidder shall guarantee that, once the Go-Live of the complete ANNA DARPAN has been achieved, the System represents a complete, integrated solution to FCI's requirements set forth in the functional requirements and scope of work and it conforms to all other aspects of the contract.

If, for reasons attributable to the selected bidder, the system does not conform to the functional requirements or does not conform to all other aspects of the contract, the selected bidder shall at its cost and expense make such changes, modifications, and/or additions to the System as may be necessary to conform to the functional requirements and meet all functional and performance standards. The selected bidder shall notify FCI upon completion of the necessary changes, modifications, and/or additions and shall request FCI to repeat the User Acceptance Tests until the system achieves acceptance and Go-Live.

If the system (or subsystem[s]) fails to achieve Go-Live, FCI may consider termination of the contract, pursuant to Section 9.4 and forfeiture of the PBG (including e-BG) in compensation for the extra costs and delays likely to result from this failure.

9.15 Limitation of Liability

In any event, neither party shall be liable for any special, incidental, punitive, exemplary, or consequential damages arising out of or in connection with the Contract entered between the parties. The aggregate liability of either party, whether under the contract, in tort or otherwise, shall not exceed the total contract value, provided that this limitation shall not apply to:

- a. Any obligation or claim arising out of or in connection with any third-party claim of IPR infringement,
- b. In the event of any gross negligence or wilful misconduct on part of either party, as finally judicially determined by a court of competent jurisdiction.

Selected bidder shall indemnify FCI for any losses except for the aforementioned conditions.

9.16 Risk Purchase

In the event successful bidder fails to execute the project as stipulated in the resultant contract agreement, or as per the directions given by FCI from time to time, FCI reserves the right to procure similar services from alternate sources at the risk, cost, and responsibility of the successful bidder. Before taking such a decision, FCI shall serve a notice period of 30 days to the successful bidder. Successful bidder's liability in such case shall be limited to the difference between the existing quoted value and the new contract value due to failure of existing successful bidder and all related costs arising out of it, limited to the two times of the value of uncompleted portion of the project. The amounts so recoverable may be deducted by encashing the PBG (including e-BG) or payments due to the successful bidder, any residual amount may further be recovered from the successful bidder.

9.17 Confidentiality & Non-Disclosure Agreement

Any information pertaining to FCI, or any other Governmental Agency involved in the contract that comes to the knowledge of the bidder in connection with this contract, unless already available in public domain, shall be deemed to be confidential and the bidder shall be fully responsible for the same being kept confidential and held in trust, as also for all consequences of its concerned personnel failing to do so. Bidder shall ensure due secrecy of information and data not intended for circulation in public. Bidder and its personnel shall not disclose any

information stored in the servers of the system to any person on any ground except with the express permission of competent authority unless it is legally required as per direction of court of competent jurisdiction. For any breach of confidentiality the bidder organization shall be responsible under all civil and criminal law in addition to the personal liability of the person indulging in such misconduct.

9.18 Agreement

- a. The successful bidder shall have to enter into an agreement with FCI, for the performance of the contract on INR 1000 Non-Judicial Stamped Paper, within 15 days of the communication of the final order on bids, the cost of which must be borne by the bidder. FCI shall provide proforma for the agreement. No variation shall be permitted in this agreement.
- b. Until the signing of agreement, the selected bidder shall bear its own cost for all the activities relating to this tender.
- c. On submission of security deposit and signing of the agreement, the timeline for completion of tasks under the RFP shall commence forthwith.

9.19 Exit Management

Transfer of Assets

The selected bidder shall be allowed to continue work on the assets for the duration of the exit management period, which may be a three-month period from the date of expiry, or termination of the agreement, if required by FCI to do so. During this period, the selected bidder shall transfer all the assets in good working condition and as per the specifications of the bidding document including the ones being upgraded to the department/designated agency.

The PBG (including e-BG) submitted by selected bidder shall only be returned after the successful completion/expiry of contract and transfer of the entire project assets including its infrastructure. The selected bidder, if not already done, shall transfer all the Software Licenses, Source Code, Containers, Templates and Clones or anything similar under the name of FCI during the Exit Management Period. The selected bidder shall also transfer all the relevant Software Passwords, Usernames and Keys, or anything similar. FCI during the project design & implementation phase and the operation and maintenance phase shall be entitled to serve notice in writing to the selected bidder at any time during the exit management period requiring the selected bidder to provide with a complete and up-to-date list of the assets within 15 days of such notice. Upon service of a notice, as mentioned above, the following provisions shall apply:

- a. In the event, if the assets which are to be transferred to FCI are mortgaged to any financial institutions by the selected bidder, the selected bidder shall ensure that all such liens and liabilities have been cleared beyond any doubt, prior to such transfer. All documents regarding the discharge of such lien and liabilities shall be furnished to FCI or its nominated agencies.
- b. All title of the assets to be transferred to FCI or its nominated agencies pursuant to clause(s) above shall be transferred on or before the last day of the Exit Management Period. All expenses incurred during transfer of assets shall be borne by the selected bidder.
- c. That on the expiry of this clause, the selected bidder and any individual assigned for the performance of the services under this clause shall handover or cause to be handed over all

confidential information and all other related material in its possession, including the entire established infrastructure supplied by the selected bidder to FCI.

- d. That the products, services, and technologies delivered to FCI during the contract term or on expiry of the contract duration shall not be sold or re-used or copied or transferred by the selected bidder to other locations apart from the locations mentioned in this bidding document without prior written notice and approval of FCI. Any software, or similar used by selected SI for FCI shall be under the ownership of FCI.
- e. Please refer Section 3.14 for list of documents to be submitted as part of Exit Management phase.

Confidential Information, Security and Data

The selected bidder shall promptly on the commencement of the Exit Management Period, if not already provided, supply to FCI or its nominated agencies the following:

- a. Documentation relating to Intellectual Property Rights (IPR).
- b. Project related data and confidential information.
- c. All current and updated data as is reasonably required for purposes of FCI or its nominated agencies transitioning the services to its replacement selected bidder in a readily available format nominated by FCI or its nominated agencies.
- d. All other information (including documents, records, Agreements or similar) relating to the services reasonably necessary to enable FCI or its nominated agencies, or any successive agency appointed by FCI for management of the ANNA DARPAN to carry out due diligence to transition the provision of the services to FCI or its nominated agencies, or any successive agency (as the case may be).
- e. Before the expiry of the Exit Management Period, the selected bidder shall deliver to FCI or its nominated agencies all new or updated materials from the categories set out above and shall not retain any copies thereof, except that the selected bidder shall be permitted to retain one copy of such materials for archival purposes only.

Transfer of Certain Agreements

- a. On request by FCI, SI shall effect such assignments, transfers, innovations, licenses and sub-licenses to FCI or its nominated agencies may require in favour of FCI or its nominated agencies, or its replacement operator in relation to any equipment lease, maintenance or service provision agreement between selected bidder and the Third Party lessors, operators, or operator, and which are related to the services and reasonably necessary for carrying out of the replacement services by FCI or its nominated agencies, or its replacement operator.
- b. **Right of Access to Premises:** At any time during the Exit Management Period and for such period of time following termination or expiry of the SLA, where assets are located at the selected bidder's premises, the selected bidder shall be obliged to give reasonable rights of access to or, in the case of assets located on a Third Party's premises, procure rights of access to FCI or its nominated agencies, and/or any replacement operator in order to inventory the assets.

General Obligations of Selected Bidder

- a. The selected bidder shall provide all such information as may reasonably be necessary to effect as seamless during handover as practicable in the circumstances to FCI or its nominated

agencies or its replacement operator and which the operator has in its possession or control at any time during the exit management period.

- b. The selected bidder shall commit adequate resources to comply with its obligations under this Exit Management Clause.

Exit Management Plan

- a. The selected bidder shall provide FCI or its nominated agencies with a recommended exit management plan ("Exit Management Plan") which shall deal with at least the following aspects of exit management in relation to the SLA as a whole and in relation to the Project Implementation, the O&M SLA and scope of work within 6 months of commencement of project or within 15 days from the date of notice of termination.
- b. A detailed program of the transfer process that could be used in conjunction with a replacement operator including details of the means to be used to ensure continuing provision of the services throughout the transfer process or until the cessation of the services and of the management structure to be used during the transfer.
- c. Plans for the communication with such of the selected bidder's, staff, suppliers, customers, and any related Third Party as are necessary to avoid any material detrimental impact on FCI operations because of undertaking the transfer.
- d. If applicable, proposed arrangements and plans for provision of contingent support in terms of business continuance and handholding during the transition period, to FCI or its nominated agencies and Replacement Operator for a reasonable period, so that the services provided continue and do not come to a halt.
- e. The bidder shall re-draft the Exit Management Plan by end of each quarter post Go-Live to ensure that it is kept relevant and up to date.
- f. Each Exit Management Plan shall be presented by the selected bidder to and approved by FCI or its nominated agencies.
- g. In the event of termination or expiry of SLA, Project Implementation, Operation and Maintenance SLA or SOWs each party shall comply with the Exit Management Plan.
- h. During the Exit Management Period, the selected bidder shall use its best efforts to deliver the services.
- i. Payments due, if any, during/for the Exit Management period shall be made in accordance with the Payment Terms Clause and upon successful completion of exit management process.
- j. It shall be the responsibility of the selected bidder to support new operator/agency during the transition period.

9.20 Approval and Required Consents

- a. The selected bidder shall cooperate to procure, maintain, and observe all relevant and regulatory and governmental licenses, clearances, and applicable approvals (hereinafter the "Required Consents") necessary to provide the Services. The costs of such Approvals shall be borne by the SI normally responsible for such costs according to local custom and practice in the locations where the Services are to be provided.
- b. The FCI or its nominated agencies shall use reasonable endeavours to assist selected bidder to obtain the Required Consents. In the event that any Required Consent is not obtained, the

selected bidder and FCI or its nominated agencies shall co-operate with each other in achieving a reasonable alternative arrangement, if applicable, as soon as reasonably practicable for FCI or its nominated agencies to continue to process its work with as minimal interruption to its business operations as is commercially reasonable until such Required Consent is obtained, provided that the selected bidder shall not be relieved of its obligations to provide the Services and to achieve the Service Levels until the Required Consents are obtained if and to the extent that the selected bidder's obligations are not dependent upon such Required Consents.

10 Service Levels Agreement (SLA) & Penalties

Service Level Agreements (hereinafter referred to as SLA) shall play an important role in defining the Quality of Services (QoS) that shall govern the level of service provided by the selected SI. SLA defines the terms of the SI's responsibility in ensuring the timely Delivery and the compliance to the Performance Indicators as detailed in this document.

SI must comply with Service Levels requirements to ensure adherence to timelines, quality, and availability of products / services. **The current SLAs are defined based on consideration that the project development, deployment, and rollout must be done within the mentioned timelines** (Please refer Section 8 for detailed Milestones, Timelines and Payment Terms) **from award**. However, in case FCI decides to extend the project rollout timeline on account of any unavoidable circumstances, the SLA timelines shall be extended accordingly.

In case SLA defined below are not achieved, FCI may decide at its discretion to impose/waive off/partially waive off the penalty if it is established that the delay is not attributable to the SI:

Incident Severity Description:

Severity	Definition
Critical	High severity incidents are the ones which have a critical business impact. These incidents shall have any of the following characteristics: 1. Entire application not available. 2. Anything that requires a change to be made immediately. 3. Incorrect behaviour (wrong calculations, workflows not functioning as desired for critical reports, or similar.) 4. Data theft/loss/corruption 5. Any incident escalated by FCI or any authorized personnel as Critical Priority.
High	High severity incidents are the ones which have a significant business impact. These are concerns needing attention as quickly as possible but shall not cause business processes to fail within one day. 1. Difficult work-around to mitigate the disruption in service. 2. Repeat calls (same incident that has occurred earlier and reported more than two times). 3. Any incident that prevents fifty percent or more users from using the application. 4. Any incident escalated by FCI or any authorized personnel as High Priority.

Severity	Definition
Medium	Medium severity incidents are the ones which have a minor business impact. These incidents shall have any of the following characteristics: 1. Part of the application not available or not working as desired. 2. Internal user escalations for slow response of the system impacting the efficiency of users. 3. Problem adversely affects product functioning, but a workaround is available. 4. Any incident that prevents 25% to 50% users from using the application.
Low	Low severity incidents are the ones which have a minimal business impact. These incidents shall have any of the following characteristics: 1. No impact on processing of normal business activities. 2. A low impact on the efficiency of users 3. Has a simple workaround 4. Enhancement requests like cosmetic user interface changes, usability improvement, unclear error messages or similar.

10.1 SLA for Design, Development, and Implementation of ANNA DARPAN

- A configurable Services Level Monitoring (SLM) tool shall be provided and implemented by SI as per **latest industry standards** (at the time of project implementation).
- License ownership for all such tools purchased for the purpose of ANNA DARPAN shall remain with FCI. SI shall share all necessary information along with admin credentials with FCI. Any tools/software snippets/code/licenses incorporated in system shall not have the end of life/end of support dates, prior to the last date of envisaged Operations & Maintenance Phase of the project including in extended period, if any.
- SLM tool proposed by SI shall be using in public sector companies and/or in any government projects.
- SLM tool implemented shall have capabilities to generate reports and dashboards for analysis and monitoring purposes for entire project duration.
- SLM tool must ensure that each application activity is catered.

10.2 SLA for Operation & Maintenance

#	SLA	Definition	Target	Applicable Penalty	
1	System Availability (Availability of all services/modules measured in terms of Uptime)	Uptime = [Total time – downtime] with the targeted performance by 99.5%. Total Time shall be	99.50%	>=99.5%	NIL

#	SLA	Definition	Target	Applicable Penalty	
		measured on 24x7x365 basis for the Application. Application Downtime shall be measured from the time the solution becomes unavailable (due to any reasons whatsoever attributable to the SI) except planned downtime. Any downtime for maintenance shall be approved with prior written intimation to FCI.			
				>=97% and <99.5%	2% of quarterly payment of Operations & Maintenance
				>=96% and <97%	3% of the quarterly payment of Operations & Maintenance
				<96%	5% of the quarterly payment of Operations & Maintenance
2	Monitoring system availability and any part thereof (detection of non-availability)	SI shall be constantly monitoring the system and all its services/subcomponents. Unavailability of the system/module or any services for any reason needs to be identified by the SI and incident to be reported instantaneously.	For every instance on system non-availability (notified by SI/FCI/ User), must be solved in 15 min.	> 15 min and <=30 min	0.5% of the quarterly Payment of Operations & Maintenance per instance
				>30 min and <=60 min	1.0% of the quarterly Payment of Operations & Maintenance per instance
				>60 min and <=4 hrs	2.0% of the quarterly Payment of Operations & Maintenance per instance
				Beyond 4 hrs	3.0% of the quarterly Payment of Operations & Maintenance per instance for every 4-8 hours/day.
3			2 Sec	<2 Sec	NIL

#	SLA	Definition	Target	Applicable Penalty	
	Application response time – (This is the time taken from submission of any request by end user to response of the request to the end user).	Time for response from application post user click. (The cases due to identified/discovered external network issues shall be excluded from response time calculation). The response shall be measured from 5 systems at any given point in time for both DC & DR-measured monthly.		>2 sec <=5 sec	0.5% of the Quarterly payment of Operations & Maintenance
				>5 sec	1% of the Quarterly payment of Operations & Maintenance
4	Performance – Portal's Homepage before or after login	Time for opening of Home Page of Portal (The cases due to identified/discovered external network issues shall be excluded from response time calculation). The response shall be measured from 5 systems at FCI at any given point in time for both DC & DR.	2 sec	>2 sec and <=4 sec	0.5% of the Quarterly payment of Operations & Maintenance
				>4 sec	1.0% of the Quarterly payment of Operations & Maintenance
5	Recovery Time from Disaster requiring switching to DR site	1. Time taken to recover from Disaster scenario requiring switchover to DR site and successful operations from the DR site and restoring services to normalcy at DR with no data loss. (This SLA is applicable for both production environment and during Quarterly DR Drills) 2. The switch over from DC site to DR site shall be without any interruption in services. RPO = 0 min. RTO = 1 hr.	1 Hour	<=1 hr.	NIL
				>1 hr. and <=2 hrs	0.4% of the Quarterly payment of Operations & Maintenance
				>2 hrs.	0.6% of the Quarterly payment of Operations & Maintenance

#	SLA	Definition	Target	Applicable Penalty	
6	Delay in Change Request delivery during the Operations & Maintenance phase	Measured as the difference between the planned and the actual date of delivery.	-	Delay of 1 week beyond the targeted timeline	0.20% of approved Change request Cost
		Except where the revised time schedule proposed by SI has been accepted by FCI in advance based on reasonable justification. SI shall seek approval for any such change in timelines with necessary justifications at least 15 days prior to the due date of concerned milestone.		Delay of 1 week beyond	0.40% of approved Change request Cost
7	Response time for generation of BI/MIS reports	Average response time for generation of BI/MIS reports.	For ad-hoc reports <=30 seconds For Canned reports <=10 seconds	For ad-hoc reports <=30 seconds	NIL
				For Canned reports <=10 seconds	
			For ad-hoc reports >30 & <=60 seconds For Canned reports >10 & <=20 seconds	For ad-hoc reports >30 & <=60 seconds	0.2% of the Quarterly payment of Operations & Maintenance
				For ad-hoc reports >60 seconds	0.5% of the Quarterly payment of Operations & Maintenance

#	SLA	Definition	Target	Applicable Penalty	
				For Canned reports >20 seconds	

10.3 SLA for Helpdesk Services

#	Type of Incident	Definition	Target	Applicable Penalty		Measurement Tool/Method
1	Critical	Critical severity incidents shall be resolved within 30 mins of problem reporting. Measured as the time taken from the time the issue/ incident is reported in the tool.	99%	>99%	No Penalty	SLM/Helpdesk Tools for Calculating Resolution Time shall be provided by the SI to FCI. <i>*SLM/Helpdesk Tool shall be as per the latest industry standard and must be implemented and currently in use in any Govt office/PSUs.</i>
				<=99% and >98% of incidents resolved in time	0.5% of Quarterly Payment of Operations & Maintenance Payment	
				<=98% and >97% of incidents resolved in time	1% of Quarterly Payment of Operations & Maintenance Payment	
				For each additional drop of 1% (rounded to the next integer) in incidents not meeting the target SLA of below 97%, additional 1% (rounded to the next integer) of Quarterly Payment of Operations & Maintenance shall be deducted.		
2	High	High severity incidents shall be resolved within 1 hour of problem reporting. Measured as the time taken from the time the issue/ incident is reported in the tool.	98%	>98%	No Penalty	
				<=98% and >97% of incidents resolved in time	1% of Quarterly Payment of Operations & Maintenance Payment	
				<=97% and >96% of incidents	2% of Quarterly Payment of	

#	Type of Incident	Definition	Target	Applicable Penalty		Measurement Tool/Method
				resolved in time	Operations & Maintenance Payment	
				For each additional drop of 1% (rounded to the next integer) in incidents not meeting the target SLA of below 96%, additional 1% (rounded to the next integer) of Quarterly Payment of Operations & Maintenance shall be deducted.		
3	Medium	Medium severity incidents shall be resolved within 4 hours of problem reporting. Measured as the time taken from the time the issue/ incident is reported in the tool.	97%	>97%	No Penalty	
				<=97% and >96% of incidents resolved in time	0.5% of Quarterly Payment of Operations & Maintenance Payment	
				<=96% and >95% of incidents resolved in time	1% of Quarterly Payment of Operations & Maintenance Payment	
				For each additional drop of 2% (rounded to the next integer) in incidents not meeting the target SLA of below 95%, additional 1% (rounded to the next integer) of Quarterly Payment of Operations & Maintenance shall be deducted.		
4	Low	Low severity incidents shall be resolved within 1 working days of problem reporting. Measured as the time taken from the time the	95%	>95%	No Penalty	
				<=95% and >94% of incidents resolved in time	0.5% of Quarterly Payment of Operations & Maintenance Payment	

#	Type of Incident	Definition	Target	Applicable Penalty		Measurement Tool/Method
		issue/incident is reported in the tool.		<=94% and >93% of incidents resolved in time	1% of Quarterly Payment of Operations & Maintenance Payment	
				For each additional drop of 2% (rounded to the next integer) in incidents not meeting the target SLA of below 93%, additional 1% (rounded to the next integer) of Quarterly Payment of Operations & Maintenance shall be deducted.		
5	Submission of Root Cause Analysis (RCA) reports	RCA to be submitted for all critical, high and medium severity incidents within 5 working days of resolution		For delay of every 1 week in submitting RCA report, 0.5% of Quarterly Payment of Operations & Maintenance shall be deducted.		

10.4 SLA for Compliance & Reporting Procedures

These reports shall be submitted to FCI within 1 week of every quarter completion.

#	Parameter	Target	Penalty
1	Submission of MIS Reports for SLA calculation (previous month/quarter)	7 th of current month	No Penalty
		Delay beyond date of submission	1% of the quarterly payment of Operations & Maintenance for non-compliance for delay of every two days
2	Maintenance of Inventory/ Asset Management	100% as per the inventory log committed and maintained by SI	No Penalty
		Non-compliance to committed inventory log	1% of the quarterly payment of Operations & Maintenance for non-compliance
3	Documentation, Management and Maintaining the document	100% as per the inventory log	No Penalty

	versioning (FRS, SRS, User, Training Manual or any other similar document), application version control or updates & patches	committed and maintained by SI	
		Non-compliance to committed inventory log	1% of the quarterly payment of Operations & Maintenance for non-compliance

10.5 SLA for Cloud Related Services

#	Parameter	Definition	Target	Penalty	Deduction
1	Cloud Data Center Availability	Availability of cloud data center proposed for FCI for at least 99.50% of time measured on monthly basis for a 24x7x365 time. Availability shall be measured at each service level and not at application level.	99.50%	<99.50% & >=97%	0.5% of the quarterly payment of Operations & Maintenance
				<97% & >=95%	1% of the quarterly payment of Operations & Maintenance
				<95%	2% of the quarterly payment of Operations & Maintenance

10.6 SLA for Manpower (Core Team)

S. No.	Parameter	Penalties
1	Non-deployment of total manpower mentioned in the contract as per the date of joining	Up to 15 days: No penalty. From 16 to 30 days: Penalty of INR 10,000 per day per resource Beyond 30 days: Penalty capped @ 1% of the total Project value.
2	If the employee is found responsible for any theft, loss of material/ articles and damages	Immediate payment in actuals, equivalent to the value of the article theft/lost/damaged. Replacement within 2 day/Penalty at INR 1,00,000 as decided by the FCI depending on the gravity of the act.
3	If the employee is found responsible for disobedience/ misconduct	Warning/counselling/immediate replacement of resource within 7 days as decided by FCI depending on the gravity of the act.
4	If the employee is absent for more than 7 days without informing or taking prior approval	Substitute within 7 days with equivalent resource failing which, penalty of INR 10,000 per day (excluding tax) of the absent resources up to 30 days.

S. No.	Parameter	Penalties
5	If the employee is found responsible for adopting illegal and foul methods or exercising any corrupt practice in collusion with any third party or officials at the workplace	Immediate replacement within 7 days and penalty of INR 1,00,000 or as decided by the FCI depending on the gravity of the act.
6	Up to 2 replacements	No penalty
7	More than 2 but up to 4 replacements	INR 50,000 per replacement (applicable beyond 2 replacements up to 4 replacements)
8	More than 4 replacements	INR 70,000 per replacement (applicable beyond 4 replacements)

10.7 Other SLAs

#	Type of Incident	Definition	Target	Applicable Penalty	
1	Timely upgrades and updates	SI shall ensure that all the components in the system are within supported versions. Upgrades need to be executed for all components on a regular basis with prior technical evaluation before implementation. (It shall be SI's responsibility to trigger timely requests for upgrade of the various components. FCI may reserve the right to defer an upgrade.)	All components of the system shall run on latest supported versions	For every default detected in any system component, 1% of Quarterly Payment of Operations & Maintenance shall be deducted per component per default quarter shall be imposed even if a component has been in an unsupported version for one day in a Quarter.	
2	Implementation of recommendations of any Audits	Any recommendation made by any form of audit conducted on the Solution. The Audit may be conducted by the SI.	100% of all recommendations agreed upon with FCI, to be implemented by SI within 5 working days of notice from FCI	Delay in implementation beyond 5 days and ≤8 days Delay in implementation beyond 8 days and ≤12 days	1% of Quarterly Payment of Operations & Maintenance 2% of Quarterly Payment of Operations

#	Type of Incident	Definition	Target	Applicable Penalty	
					& Maintenance
				For delay of each additional day, 1% of Quarterly Payment of Operations & Maintenance shall be levied.	
3	Any Security Incident resulting in Data Breach or no data breach	Including but not limited to Malware Attack, Denial of Service Attack, Ransomware attack, Intrusion or Defacement or any other similar breach	No Breach in data	Penalty of INR 10,000 on each incident reported.	

10.8 SLA Reporting Procedures

SI shall prepare and distribute Service level performance reports in a mutually agreed format by the 5th working day of subsequent month. The reports shall include “actual versus target” Service Level Performance, a variance analysis and discussion of appropriate issues or significant events. Performance reports shall be distributed to FCI management personnel as directed by FCI. SI may be required to get the Service Level performance report audited by a TPA appointed by FCI.

10.9 SLA Exclusions

The time lost due to any of the following causes shall not be included in calculating “System Availability” or “Resolution Time”:

- Time taken for scheduled maintenance/ troubleshooting (including back-up and restore times) either for preventive purposes or improvement in function or other purposes, provided such activities have been intimated / planned in consultation with FCI.
- Time taken for reconfiguration or other planned downtime for any patch deployment situations provided such activities have been intimated in advance in consultation with FCI.
- Scheduled shutdowns as required by FCI.

SECTION IV – APPENDICES

11 Appendix – I: Detailed Functional and Non - Functional Requirements for ANNA DARPAN

These indicative features shall be made available and implemented in the ANNA DARPAN. SI shall follow IT industry best practices and latest trends to recommend any other features to FCI to meet the project objective and business needs.

a. Optimization and simplification of existing processes

The existing application almost covered all the operations taking place at various instance from procurement to storage, weighment to movement and from quality check to distribution. This shall necessitate to observe and analyse the **complexity in the existing processes** and identify simplification as a necessity to make the **same operations more optimized and standardized** that capture all the adequate information at each step and obtain the desired end results.

So, the IT solution shall aim to target the existing operations making them more streamlined and efficient by focusing on eliminating process defects and improving the overall quality of day-to-day operations carried out by different users at each step.

b. Mobility solution using smart phones and tablets for convenient capturing of data at source anytime anywhere.

Most of the depot level operations occur either in the godowns/sheds, or at the railhead/siding, or at the procurement/purchase centres. This shall necessitate the *use of smart phones and tablets for data entry, data submission, data view or status checking purposes* due to the lack of feasibility in setting up desktop or PC at each point of transactional data source/origin.

The IT solution shall have provision of installing, configuring, and using function-specific mobile apps for both smart phones and tablets to capture and submit data by the internal and external users during their routine field level activities. The mobile apps shall be standardized on Android & iOS smart phones and support push notification and application updates from the central server.

c. Maker/Checker

This facilitates leadership with better ways to track all actions and decisions taken by users, *enhancing the transparency, better administration, and timely decisions* at every step of food grain life cycle. It shall provide efficient and consistent review of all the decisions made by the concerned user.

d. Feature of adapting any device and screen size.

User friendly mobile responsive site is to cater the needs of all users at all levels using mobile browser and of each mobile device. A mobile-optimized as well as mobile responsive website must include “**thumb-friendly**” navigation, smaller image file sizes, a minimized need to type any information, and a single column layout.

This means the various components of the application *changes depending on the device users are using*; this might translate into images and text adapting in size, content layout adjusting to each screen and menus switching formats for improved visualization.

Note: Mobile-first strategy may be adopted for a better fit design as it shall help focussing on the core features of the application depending upon the target audience and their requirements. Hence mobile version of the site is designed first and only then adopted to other screen sizes.

e. One Data Once Entry

Enter “one data once” means **data is entered into the application only one time**. It can be reused and shall be available in a system when it is needed.

This feature facilitates ANNA DARPAN users at all levels **minimizing common data entry error** and hence **reducing the duplicate data entry points** from each module by reviewing and optimizing the process flow including forms, data, information, and documents helps in reduce the data redundancy and encourage data entry once.

f. Drill-down based advanced reporting system

A drill-down report allows the user to navigate the data from a comprehensive view of the data to a more detailed one. Drill down reports provides users a deeper insight into the critical data like pan India Procurement, Storage & Transit loss, Movement, Stock Quality or any other similar data.

Therefore, it gives stakeholders a new way to **analyse data to a more granular level** and walk them through the hierarchy from level to level including the ability to download the reports in PDF and CSV/excel format.

g. Integration with internal and external applications of FCI.

For smooth end to end operations of the ANNA DARPAN, other internal applications like CFPP and CFSP may be integrated for complete visibility of procurement and storage of foodgrains across the states (Please refer Section 3.6 for Integration Scope of Work)

Integration with FAP, VLTS, QMS and HRMS etc. may also be considered to enable data exchange and validation for improving end to end operational efficiency.

h. Analytical Dashboard based on latest trends

Foodgrains/commodity data (whether it is of procured, storage or off-take) on day-to-day operations is derived at multiple points like Mandis, Depots, Mills and shared across respective regions, zones, and departments. Using business intelligence tools this data can be sorted and curated to create engaging visuals and smart dashboards.

These dashboards **enable FCI leadership and key stakeholders to gain better understanding on real time consolidated data majorly of procurement, storage, and release of commodity at pan India level with 50 ($\pm 25\%$) power user facility.** These kinds of dashboards equip analysts and top management to draw concrete conclusions, give good recommendations, and support more informed decisions in every season.

i. Data Source – Single Source of Truth

This feature ensures that every application's user accesses the relative data from a centralized location. Existing processes shall be optimized in a standard procedure to ensure that data from multiple sources does not get fragmented. Data entered in ANNA DARPAN shall be used as the **single** baseline source for all future reports, calculations and metrics thereby driving consistency and reducing errors. Thus, eliminating the need to access multiple **applications/systems such as IRRS, DFIMS, and other old applications.**

j. Robust Tracking System – Maintain the Audit Trails of all change/approve requests.

For enhanced tracking facility, every change/approved request undertaken in the system must be recorded and maintained for quick tracking and comprehensive audit trails. System shall enable better management at every step and be able to trace the detail of each transaction/communication relating to any process.

11.1 ANNA DARPAN Brief of Functional Requirements**Procurement Module****A. Procurement Planning and Monitoring**

Planning plays a crucial role in overall procurement process. Planning for procurement is set up for PAN India and is done at the beginning of every season. It shall cover the following key functions:

A.1	The system shall have the functionality where the regional user shall be able to create the procurement plan and submit it into the system. The procurement plan created shall be finalised, based on the multi-level approvals.
A.2	Users at Zone and HQ levels shall be able to view procurement plan and submit comments on the same (if any).
A.3	The system shall be able to capture PADDY, WHEAT and CMR procurement details etc.
A.4	The system shall be able to capture Farmer/Miller Registration details.
A.5	The system shall have the provision to create the Marketing season at headquarter level i.e., RABI and KHARIF procurement seasons every year.
A.6	System shall have an ability to check the available storage capacity at ROs, DOs and depot level so that the procurement and monitoring of foodgrains can be done accordingly.
A.7	System shall accept any change/update done in the marketing season by the state and raise an alert/notification to intimate GM/ED Procurement, FCI HQ for approval.
A.8	System shall have the provision to notify all stakeholders with the approved procurement plan and it shall also be automatically shared/forwarded to concerned stakeholders over email/SMS.
A.9	System shall have the ability to maintain all the past records of the procurement plan created/approved by the respective users.
A.10	System shall have an ability to maintain the logs of all past seasons and procurement plan and provide an option to generate various types of desired reports (state wise, year wise, season wise or similar).
A.11	System shall have the ability to inherit the information from the previously created procurement plan to save time.
A.12	System shall have provision to confirm the procurement status for payment approvals to farmers/millers/agencies for procured foodgrains.
A.13	System shall have an ability to add and map new commodity to be procured, in the master. It must be easily accessible and available wherever required.

B. Procurement of wheat, paddy and other foodgrains from Farmers at Mandi/Purchasing Centre/Agency.

This process includes the procurement of wheat, paddy and other foodgrains at mandis and purchasing centres directly from the farmers which are then lifted to FCI depots. To fulfil the **procurement target FCI also acquire commodity from the state government agencies/private agencies** who procure wheat/paddy on their own.

B.1	System shall be integrated with state procurement portal and Agri Stack to fetch govt. issued documents like (Farmer PAN card, registration card, voter id, and other necessary details).
B.2	Farmer shall be able to book an appointment (date and time) for visiting mandi/purchasing centre to sell the commodity.
B.3	System shall be able to generate unique QR code/barcode/Rfid tag at the time booking an appointment. The QR code/barcode/Rfid tag created shall be used by TA to validate/fetch the information contains in the QR code/barcode/Rfid tag at Mandi.
B.4	Farmer/Depot user shall have an ability to track the status of the transaction and history using token/QR code/barcode/Rfid tag generated.
B.5	Technical/Quality Assistant (TA) shall be able to generate the token to procure the commodity at mandi/purchasing (if token is not created by Farmer).
B.6	Technical/Quality Assistant (TA) shall have provision to record the quality of the procured commodity along with other details like commodity type, variety, weight, moisture, and other parameters or it shall be fetched from the Quality Management System or Directly from the equipment database through integration.
B.7	Technical/Quality Assistant shall mark the status Accepted/Rejected based on quality check result and moisture of the procured foodgrains.
B.8	System shall generate the Acceptance/ Rejection note of the procured commodity based on the acceptance/rejection status with justification.
B.9	System shall be provisioned to account for gunny bags being sent from the depot to the Mandis for FCI procurement against an indent from the Mandi/purchase centers.
B.10	System shall raise a payment request of procured commodity with FAP as soon as the acceptance note is generated and reflect the payment status wherever required. BTS may be used if required.

B. Procurement of wheat, paddy and other foodgrains from Farmers at Mandi/Purchasing Centre/Agency.

B.11	After successful payment credited, details like payment status, amount credit, amount credit date and total paid amount with transaction history (UTR no.) shall be updated in the system.
B.12	System shall be able to raise an alert/notification to the depot staff/depot manager/shed manager about the procured foodgrains once the acceptance note is generated by TA.
B.13	System shall be integrated with VLTS for real-time tracking of the vehicles carrying FCI food-grains for necessary alerts.
B.14	System shall be able to generate and print acknowledgements, WCM, report, truck chits, gate passes and any other similar documents with digital signature.
B.15	System shall be provisioned with bulk upload feature (in xls, xml or similar) to upload procurement related data in bulk.

C. Procurement of Rice (CMR)

This process includes the procurement of custom milled rice (CMR) against the paddy issued to the miller.

C.1	System shall provide an ability to upload contracts, firm details and other related documents by millers and approved by divisional manager.
C.2	System shall have provision to manage (add/update/approve/activate/ deactivate) millers with necessary justifications and send necessary timely notification/updates to millers through mail/SMS .
C.3	The system shall have provision to automatically map the mills with the depots based on the geographical location
C.4	System shall be provisioned to remove the association with an existing miller citing the reasons and notifying the Divisional Manager.
C.5	When miller is ready to deliver CMR, system shall be able to show the available space based on the available space in nearby depots and allocate the stack accordingly.

C. Procurement of Rice (CMR)

C.6	System shall have provision for creation of token by miller for dispatching the milled rice and raise necessary alert to concerned users in depot to take informed decision for receipt planning.
C.7	System shall provide facility to generate a unique QR code/barcode/RFID tag at the first point for each token created and the token shall be used till its closure.
C.8	Miller shall be able to create master token for huge quantity of commodity to be dispatched and to release commodity lot by lot (partial quantity) and shall also be able to create linked token associated with the master token.
C.9	System shall provide an ability to create token by the gate officer at the depot and issue gate pass, if the token is not already created at the miller end.
C.10	System shall be provisioned for auto allocation of dumping on CMR receipt from miller.
C.11	System shall provide an ability to raise a flag for miller for frequent rejection(s).
C.12	System shall be provisioned to accept the CMR and approve payment to the FAP against the CMR purchased. BTS may be used if required.
C.13	System shall be able to trace all the payment related transactions/history and paddy given to the miller for the procurement of CMR.
C.14	System shall be able to capture the different charges applicable for milling the rice and shall be provisioned to raise payment requests in the system.
C.15	System shall auto generate alerts to divisional manager and miller as soon as the miller contract is over. System shall make the miller auto inactive after the contract gets expired/terminated.
C.16	System shall be able to integrate with state procurement portals and fetch data related to paddy stored with each mill, providing information back to state portal about rice delivered along with basic documents like Acceptance Note and weight confirmation.
C.17	System shall be able to integrate with FAP application to enable online verification of invoices/bills submitted by the state governments from their system and facilitating payment for the accepted stocks of CMR.

Movement Module**D. Movement Planning**

Movement of commodity can be done in various ways like depot to depot, purchasing center/ mandi to depot. To dispatch commodity from source to destination an optimal/shortest route is identified which helps to anticipate the best mode of transport viz rail, trucks or any other similar mode.

D.1	User at HQ and Zones shall capture parameters such as stock position, storage capacity, quantity of stock to be received in the month, anticipated offtake, anticipated procurement, anticipated inward movement, expected outward movement, next month inflow and next month offtake or any other similar parameter. Few parameters shall be auto populated like current stock position and storage capacity.
D.2	User at HQ and Zones shall have provision of sharing comments/inputs on the received Inflow-Outflow (IO) statement and then approve inflow-outflow statement.
D.3	GMs at region shall be able to alter demand of inflow and outflow with proper reason and raise an alert to Zone & HQ office for any modification in IO statement.
D.4	GM at region shall raise the demand for any change in the plan approved by HQ, System shall raise an alert to Zone and HQ for further approval.
D.5	GM at region shall receive an alert if the inward or outward movement data from respective region is not submitted by 11 th of each month. Also, the system shall have the capability to generate inflow outflow plan based on the available data using predictive technologies.
D.6	ROs shall be able to receive the movement plan from the concerned DOs for advance preparation. System shall display movement requirement submitted by all regions and zone to ED (Transport) at HQ on 15 th of each month.
D.7	System shall have provision for HQ to create movement plan based on requirement submitted by all regions/zone.
D.8	ED (Transport) shall approve both inward and outward movement and may change in plan with reason or justification and raise a flag to concerned EDs, GMs and DMs for any alteration.
D.9	System shall be able to maintain all the logs/changes happened in movement plan.
D.10	System shall be capable enough to integrate with any route optimisation tool for finding the optimal route and suggest the movement plan accordingly.

D. Movement Planning

D.11	System shall have ability to generate various kinds of reports like depots wise, week-wise quantity and commodity to be moved in/out to/from each depot or similar reports for all the regions.
D.12	The system shall be able to send auto alerts/notification displaying available storage at the Depots.
D.13	System shall be able to notify ED (Transport) once depot-wise movement data (Movement by Road) is submitted by all the regions.
D.14	Regional office shall have an ability to capture and update the geo-coordinates between all the railheads and railheads to depots.
D.15	User at region shall have ability to capture and update the geo-coordinates between all the depots.
D.16	Regional office shall have ability to capture and update the railway freight slabs.
D.17	User at region level shall be able to add/view/update the details of Road Transport Contractors, Coastal Movement Contractors along with fields, 'From' and 'To' station, and rate in INR per MT along with attachment upload like notice, order, approvals or any other similar attachments.
D.18	Destination region/division shall have ability to request for DIs (Dispatch Information) within the same region/zone, if the entire rake can't be accommodated in the planned destination.
D.19	System shall have an ability to automatic check the available space in receiving depot and align/dispatch the rake /truck accordingly.
D.20	Movement module shall be app driven to ease the operation specially at rail head/siding while loading and unloading.

E. Movement by Rail

The process of movement by rail is used to dispatch the commodity from one depot/mandi/purchasing centres to another depot using rails. Rail movement can be performed using two ways: 1. Rail Head and 2. Rail Siding. It involves the process from loading of special (rail-rake), Receipt of dispatch of commodity, Unloading of commodity, and Rail transit loss.

E.1	Depot manager & Movement officer at depot (source & destination) shall be able to view and download the approved movement plans (source and destination depots).
E.2	System shall be able to manage any diversion/interception/rebooking in the movement and alert the concerned stakeholders.
E.3	Movement officer shall be able to do indent registration and notification through SMS/email shall go to respective depot manager.
E.4	Depot managers of recipient divisions shall receive notification/alerts about the loading of the rake for advance preparation at their depot.
E.5	The system shall be able to generate movement plans based on stored information related to origin, destination, number of rakes and others.
E.6	System shall be able to auto assign Special/Unique/Friendly Number for each rake.
E.7	System shall have provision to map the wagon with multiple depots if needed. (In case of rail head).
E.8	System shall update wagon type & wagon number and record for unfit and open wagon with description.
E.9	System shall have provision to allocate gang at the railhead or siding for loading the rake.
E.10	System shall be able to capture any change in commodity in rake for a shortfall of any number of wagons.
E.11	System shall be able to capture any shortfall of commodity in a rake at the loading point
E.12	System shall be able to manage rake placement time (inward/outward) with Demurrage free time, Wharfage free time and Additional free time.
E.13	System shall be able to capture Demurrage Charge to be paid to the railways.
E.14	System shall be able to send an alert/notification to Divisional Manager and RO for any Demurrage Charges to be incurred for loading a rake.
E.15	System shall capture the details of wagon loading at Rail head from Depot/PC/Mandi and be able to calculate 10% of weighment in case of Rail Siding and 100% of weighment of Rail head.
E.16	System shall be provisioned to capture the specified time limits for unloading of rakes and calculate the wharfage charge accordingly.

E.17	System shall be able to capture "Additional Free Time" given for loading of rake on account of extra shunting for placement and removal of wagons.
E.18	System shall be able to prepare the Loading Statement based on the rake load at the railhead or siding.
E.19	System shall have the ability to record the movement process without depot inflow if stock is issued directly to schemes/PDS .
E.20	System shall be able to generate an indent and automated alerts to the depot manager at the dispatching end. It shall get auto clearance once space is available at recipient end. Recipient region shall have the option to defer loading with proper justification. Any deferment beyond 2 days shall have approval of next higher authority.
E.21	System shall integrate with FOIS/Railways for sharing indent and necessary details.
Unloading of Rake (Rail)	
E.22	System shall be able to capture the following checklist and generate a note on receiving a rake for unloading: • Whether Railway/FCI Seal on each wagon is intact or tampered • Whether all entries on label/seal card are legible and cards are intact • Whether wagons opened by labour on getting the instructions from Depot Manager • Whether Convoy Notes are found with complete legible entries in each wagon • Whether 2 sealed samples are found in each wagon • Whether wagon stock quality conforms to representative sample quality received in the wagons
E.23	System shall be able to capture details of unconnected and missing wagon(s) of a full rake at the unloading point.
E.24	System shall have provision to reconcile missing wagons and unconnected wagons and track missing wagon claims through its payment or liquidation (in case a missing wagon is later found and moved to a depot by railways)
E.25	System shall be able to send intimation to concerned depot(s) automatically for any interception, re-booking, and diversion of rake.
E.26	System shall capture any rebooking or diversion plan by the FCI HQ based on information received from Railways alert the user to enter details of a fresh indent issued for rebooking of an existing indent.

E.27	System shall be able to send notification to Divisional Manager and RO of the dispatching depot on issue of fresh indent
E.28	System shall be able to capture the details of demurrage receipt for each rake, if applicable
E.29	System shall be able to carry out wagon reconciliation of a full rake, both for inward and outward movement
E.30	System shall have provision to edit both the receiving and despatching depot in case of a diversion or rebooking of a rake with justification and approved from the upper level.
Unloading of Rake (Rail)	
E.31	System shall be able to verify the Railway Receipt at the railhead or railway siding prior to unloading
E.32	System shall be able to set up the unloading time window for different rake types to calculate the detention period (≤ 5 hours for up to 20 wagons, ≤ 7 hours for upto 35 wagons ≤ 9 hours for 42 wagon rake, ≤ 11 hours for 58 wagon rake)
E.33	System shall be able to capture "Additional Free Time" given for unloading of rake on account of extra shunting for placement and removal of wagons
E.34	System shall be able to calculate the excess detention for a siding, having placement capacity less than a rake, by deducting the permissible free time and periods of dies-non from the period of total detention of the rake
E.35	System shall be able to calculate the excess detention for splitting up and placement of rake in case of sheds having multiple lines of limited capacity
E.36	System shall be able to calculate the Wharfage Charges only for the period from commencement of unloading of consignment at rail head till its removal even when the free time for removal expires before beginning of unloading from a rake
E.37	System shall be able to calculate the free time for Wharfage Charges without considering if the unloading of rake is done in single or multiple placements
E.38	System shall be able to set up the rates (per hour or part thereof) for demurrage charges both for 8 wheeled wagons as well as 4 wheeled wagons on the Broad/Meter/Narrow Gauge
E.39	System shall be able to set up the permissible free time for removal of goods from railway premises based on their classification
E.40	System shall be able to set up the Wharfage Rates on per wagon per hour basis irrespective of the wagon types

E.41	System shall be able to set the free hours of Wharfage to 3 days from the date of arrival (including date of arrival) at rail head when the food grains are reaching after 2 months from date of booking with railways
E.42	System shall be able to set Wharfage Rates to 50% of the applicable rate for first 10 days and prescribed rate for subsequent days when food grains are reaching after 2 months from date of booking with railways
E.43	System shall be able to calculate and combine the Demurrage and Wharfage Charges when the free time for both unloading of rake and removal of consignment from platform have expired
E.44	System shall be able to capture the stack planning details for each of the incoming wagons in a rake
E.45	System shall be able to automatically suggest optimized options to unload the wagon consignment across the different shed compartments
E.46	System shall be able to accept a rake in a railway siding having one Special Number but two (2) Railway Receipt (RR), each for a different railhead or depot siding
E.47	System shall be able to calculate the transit loss based on the difference between Dispatch Weight and Receipt Weight for all Railway Receipts of stocks received during any month.
E.48	System shall be able to update and maintain the Unloading Register and Siding Register based on data capture from Loading and Unloading Statement, and Railway Receipts
E.49	System shall be able to automatically show inward and outward transaction of the same stock for the receiving FCI Depot if the rake load is directly delivered to State Agencies from the railhead
E.50	System shall be able to capture information on any direct delivery of rake load to State Agency from the railhead
E.51	System shall be able to have provision to stack the consignment on the siding platform or in goods shed as a temporary storage
E.52	System shall be able to calculate the stock in transit based on the following conditions - • Stock received at railhead but not entered the depot • Stock entered the depot but not stacked in the sheds

F. Movement by Road (MBR)

The aim of this process is to create the road movement and record the dispatch of commodity from one depot to another depot by road movement. Creation of road movement involves the information of commodity including dispatching and receiving depots. Based on the movement plan, movement order is created by regional staff and approved by regional manager.

F.1	Staff at the regional office shall have the ability to create movement order and regional manager shall approve the movement order. Each movement order shall have system generated unique friendly name.
F.2	System shall generate QR code/barcode/RFID tag against each movement order that shall be used across all points in the depot to auto populate and auto filled the movement details like Destination Depot, Commodity, crop year, variety/grade, Total Quantity, number of bags, start date and end date.
F.3	System shall be able to share the final detail of road movement order with destination depot.
F.4	System shall have an ability to auto populate transporters and contract validity details based on the selection criteria like region/divisions and others.
F.5	System shall not populate the transporter's detail if the contract validity has expired while creating a movement order.
F.6	System shall have an ability to raise an alert for transporter for assigning truck/container to lift the procured foodgrains from mandi/purchasing centre as soon as the movement order is created.
F.7	Gate operator at the depot shall create the gate pass for the consignment by scanning the QR code/barcode/RFID tag generated for the movement order.
F.8	System shall be provisioned for generating truck chit and gate pass for good sheds.
F.9	QR code/barcode/RFID tag generated at the time of movement order creation shall be used for all operation undertaken in the depot such as - Taking in-weight of the truck, loading of commodity to the truck, taking out-weight of the truck, generation of truck chit, and exiting the truck from the depot.
F.10	A depot manager of destination depot shall receive notification/alerts about the loading of the truck at source depot, for advance preparation at destination depot.
F.11	System shall be integrated with Vehicle Location Tracking System (VLTS) to auto start/end the trip/rake, trace the location of the vehicles including alerts like Geo coordinates, engine on/off, running condition, speed, vehicle not moving and route deviation which helps in comprehensive analysis.

F. Movement by Road (MBR)

F.12	System shall be integrated with FAP to process the transporter payment on successful movement completion.
F.13	System shall have an ability to calculate transit loss after MBR closure and sync the detail with the integrated payment system for transit loss recovery.
F.14	System shall be provisioned for transshipment feature – in case of truck failure or due to natural calamity.
F.15	System shall be provisioned with bulk upload feature (in .xls, .xml or similar formats) to upload movement related data in bulk.

G. Movement by Ship

The aim of this process is to create movement by ship and capture the details of food-grains to be shipped.

G.1	System shall be able to capture the indent details for booking of ship for stock movement
G.2	System shall be able to send SMS alert to loading Depot Officer for non-registration of indent to avoid cancellation
G.3	System shall be able to generate notifications/alerts for loading the ship within the allocated time and prevent of forfeiture of the indent amount
G.4	System shall be able to capture the receipt of dispatched food grains at the port for loading into ship containers
G.5	System shall be able to account for additional gunny bags (2 gunny bags instead of 1) to store food grains in depots for loading in ships
G.6	System shall have a separate identification for the depot stock that has been marked for ship movement
G.7	System shall be able to calculate the work performed and utilization of the gang at the port
G.8	System shall be able to update the Work Done register and generate the Work Slips to print for filing
G.9	System shall be able to perform real-time synchronization of the updated Work Done register with the FAP application for payment approval

G. Movement by Ship

G.10	System shall be able to prepare the loading statement based on the containers loaded into the ship and contents of each container
G.11	System shall be able to send SMS alert/notification to the destination point on preparation of Loading Statement
G.12	System shall be able to view the Loading Statement by the source Divisional Manager and Regional Office, and the destination office
G.13	System shall be able to capture the details of contract for the coastal movement plan

Storage Module**H. Storage Management**

Foodgrains procured by FCI and state govt. agencies (on behalf of FCI) are stored in FCI owned godowns or FCI hired godowns across the States. FCI owned godowns are FSDs (Food Storage Depots) and hired godowns belong to state/central govt. warehouses like SWC/CWC and private food storages like PEG (Private Entrepreneur Guarantee), there are various schemes/conditions under which private godowns are hired/de-hired.

One type of storage are Silos i.e., large tank type structures made of steel. It consists of storage of food grains in monitored atmosphere in bulk form. Silo requires mechanized handling for loading and unloading. It ensures better preservation of foodgrains and enhances its shelf life. Silos require 1/3rd of land area as compared to conventional storage.

H.1	System shall have provision for provisioning of FCI owned depots (FSDs) as well as hired depots like SWC, CWC and PEG with geo tagging feature at region level.
H.2	System shall allow DO level users to manage depots (modify, re-hire and de-hire).
H.3	System shall enable robust report system and provide day end stock report of all depots, foodgrains inflow and outflow drilled down reports, storage loss report, stocks availability, receipt, or issue date wise, crop-year wise or similar at all levels (depot/DO/RO/ZO/HQ) manager and above.
H.4	System shall be able to record the number of bags, quantity of commodity stack wise, shed-wise, silo wise and overall depot wise.
H.5	System shall have the ability to update storage capacity automatically based on receipt and issue of foodgrains.

H. Storage Management

H.6	System shall be able to manage gunny bag accounting – Consumption of KMS and RMS bags in each season, new gunny bag purchase and availability of bag at the depot, usage of second-hand bags (SHB).
H.7	The system shall be Integrated with FAP for payment to hired godowns.
H.8	System shall have the ability to record the quantity block wise, stack wise, unit wise, shed wise and godowns wise of the foodgrains.
H.9	Shed In charge shall scan the QR code/barcode/Rfid tag generated against the movement order to auto-populate the details of the commodity like token number, commodity name, quantity, number of bags, category, specification, or similar details and plan the stacking accordingly.
H.10	System shall be able to list the stock priority wise (based on certain parameters like crop year, receipt date or similar) and based on priority listing, stock shall be issued.
H.11	System shall have provision to calculate the transit loss and raise a request with FAP system to recover the transit loss from the transporter. <i>Transit loss is the difference between the weight of the commodity received at destination and weight of the commodity at the source.</i>
H.12	System shall have ability to generate WCM (Weigh Check Memo) and update the commodity/stock in the system.
H.13	System shall be able to provide ratings of Godowns on fixed parameters as per Warehousing Development and Regulatory Authority (WDRA) guidelines.
H.14	System shall be provisioned with bulk upload feature (in xls, xml or similar formats) to upload storage related data in bulk.
H.15	The system shall have the provision to capture ‘palla bags’, wherein the count of bags shall increase without affecting the total weight of stack.

Quality Module

I. Quality Management

Quality check of the commodity is managed by the Manger QC at depot. Technical Assistant (TA) is the first point of contact for quality analysis in depot as well as during procurement in mandi and purchasing centre.

I.1	TA /Manager QC shall be able to modify the parameters of quality specification for every marketing season.
I.2	System shall enable TA and Manger QC to record the parameters of quality specification like Broken, damage grain, coloured grain, foreign matter, chalky grains, and description with max percentage. And make them consistently available wherever needed.
I.3	TA shall update the quality status Approved or Not Approved in the system, if quality status is approved by TA, a flag shall be raised to release the Farmer payment to FAP system.
I.4	System shall be designed in a way that it is compatible for future integrations with Quality management System (QMS) application and other systems for Sample testing, quality measurement devices/software and capture quality parameters in the system.
I.5	The system shall be interlinked with various modules such as, Storage, Movement and provide seamless flow of information among the modules without data redundancy.
I.6	System shall be able to generate drill down dynamic report related to quality parameters.
I.7	System shall be able to send auto alerts for Infestation status, using predictive analysis.
I.8	System shall be provisioned with bulk upload feature (in xls, xml or similar formats.) to upload quality related data in bulk.
I.9	System shall have capability to integrate with devices like Automatic Grain Analyser (AGA).

Physical Verification

J. Physical Verification

This process involves the verification of the commodity stock across all depots by FCI officials visiting physically as per the orders issued from the region/zone/HQ. Physical verification can be categorized as: **PV Annually, Quarterly, Zero PV, ISI PV, and special/other PV.** At the time of physical verification all the bags in the stacks needs to be counted and verified physically.

J.1	System shall have the functionality where the Divisional Manager shall create the Annual PV in a year, Quarterly PV every quarter, and select assign the user/officers to form a PV team.
-----	---

J. Physical Verification

J.2	System shall have the provision where PV (by peripheral count) of each stack in number of bags shall be made by PV teams nominated by concerned Divisional Manager.
J.3	System shall have the functionality to send an automatic SMS/Alert to the nominated FCI officials for scheduled PV.
J.4	System shall have the ability where for baby stack, stock shall be weighed 100%. A stack shall be reckoned as baby stack, if the number of bags is less than 20% of the total number of bags received right from the creation of the stack.
J.5	System shall be able to capture all the details involved in the PV process like in-weight of the truck, loading of the baby stock, out-weight of the truck, stacking using QR code/barcode/RFID tag and finally generate exit gate pass.
J.6	System shall have provision to record and track the excess and shortage amount of the commodity observe during PV as a PV result.
J.7	Depot manager/staff shall be able to record the PV result.
J.8	System shall be able to capture the inventory of dead stocks in the depot based on inspection by the PV team.
J.9	System shall be able to compare the observation report from PV team with the existing records in the depot and highlight the deviations, if any.
J.10	System shall be able to capture the storage loss/gain at the depot level.
J.11	System shall generate all kind of PV reports at various levels (HQ/ZO/RO/DO/depot).
J.12	System shall be designed in a way such that it drives and suggest randomized physical verification procedures.

Ticketing Mechanism

K. Ticketing Mechanism in ANNA DARPAN	
A dedicated Cloud-based Incident Management tool shall be in place that offers complete solution for proactive monitoring of real-time alerts and proactive/ reactive incidents.	
K.1	System shall have a provision to raise Incidents with selection of required parameters.
K.2	The system shall be able to display the real-time incident status of issues raised by users such as open tickets, assigned tickets, closed tickets along with other status on the dashboard against their incident reference number and description.
K.3	Custom-based service reporting functionalities shall be available in the tool.
K.4	System shall have dedicated two/three-level escalation matrix whereby highest escalation points shall be client itself.
K.5	Documented procedures, SOPs and guidelines shall be present in the repositories of the tool for reference.

Asset and Inventory Management Module

L. Asset and Inventory Management Module	
This module shall provide an overview of storing and tracking information about assets such as equipment, vehicles, and facilities, as well as inventory. Also optimizing operations by ensuring that assets and inventory are utilized effectively, reducing waste and improving overall productivity.	
L.1	The system shall digitally track & administer all Assets.
L.2	The system shall allow for easy tracking of all assets, including equipment, vehicles, and facilities. This could be done using RFID tags, barcodes, or GPS tracking, depending on the type of asset.
L.3	The system shall be able to generate a detailed reporting on Inventory levels, Asset usage, depreciation or similar parameters.
L.4	The system shall be able to track inventory levels in real-time, including the quantity and location of all items. It shall also allow for easy ordering request and restocking of inventory when necessary.

L. Asset and Inventory Management Module

L.5	The system shall provide detailed reports on inventory levels, asset usage, and other key metrics. It shall also allow for easy customization of reports to meet specific business needs.
L.6	The system shall be able to integrate with other systems such as Fixed Asset Module under BTS in Financial Account Package (FAP) Application to ensure that inventory and asset data is up-to-date and accurate.
L.7	Vendors shall be able to place/upload their purchase orders into the system to integrate those with FAP system to process their payments.
L.8	System shall be able to monitor the warranty and payments of the assets including life cycle management and generate necessary alerts to the concerned users to the respective division.

Sales Module**M. Sales**

This module shall be able to manage various schemes launched by the GOI under which the commodity shall be issued to the states and others. Scheme management section shall provide all such schemes and shall have the feature to generate and approve release orders by DO staff and Divisional Managers respectively and supply the required commodity against that release order.

M.1	The system shall be able to do release order management.
M.2	System administrator shall be able to manage (add/update/activate/deactivate) all welfare schemes launched by the GOI.
M.3	Divisional Manager shall have an ability to manage (add/update/delete) the detail of RO Party: Party name, in-charge name, designation, address or similar, for which the release order shall be issued.
M.4	DO staff shall be able to generate the release order and Divisional manager shall approve the release order.
M.6	System shall generate QR code/barcode/Rfid tag for each release order approved by the Divisional Manager.
M.7	System shall have an ability to create multiple tokens at depot against one release order until the whole quantity of commodity shall be delivered.

M. Sales	
M.8	The system shall be provisioned to e-auction and tendering for sales of stock.
M.9	The system shall be integrated with SMART-PDS and FAP.
M.10	System shall provide an interface to capture the necessary details of the commodity to be imported and exported.
M.11	System shall have a provision where the user shall be able to raise a request for the commodity to be imported and generate release order for the commodity to exported and follow all other steps.
M.12	System shall follow the complete process and steps to support the inward movement for the imported commodity as detailed in procurement module.
M.13	Users at different level involved in import-export operation shall receive necessary alert and notification for each operation.
M.14	System shall be integrated with FAP for releasing the commodity payment procured by FCI.
M.15	The system shall have the provision to maintain an audit trail for any import/export.
M.16	System shall be able to manage open sale scheme, ethanol scheme and other commercially oriented schemes.
M.17	System shall have feature to manage direct delivery (DD) of foodgrains from purchasing center/mandis.

Engineering & Maintenance Module

N. Engineering & Maintenance	
This module shall be able to raise and schedule a request for engineering and maintenance work to be carried out in FCI depots and offices.	
N.1	Admin user shall be able to maintain and manage all the engineering and maintenance work/services.
N.2	System shall be provisioned to record and digitize mBook i.e., logs/history of all the requests raised by the user and comment provided with date and time.
N.3	System shall have an ability to manage (add/update/delete) request raised by the users for any services.
N.4	Users shall be able to assign priority for each request including name of work, depot name, activity type, work type, department type, project expenditure and others.
N.5	Users at RO/ZO level shall be able to approve or reject the request along with reason/comment of approval/rejection.
N.6	Users shall be provisioned to upload the necessary documents and images.
N.7	User at DO/RO/ZO level shall receive automated alerts on request generation.
N.8	Admin user shall be able to modify the allocated budget for the work approved with reason and an alert shall be raised to concerned stakeholders.
N.9	System shall be able to track the work progress of all engineering and maintenance work.
N.10	User shall be able to track the status of the work request and close the request after the work is completed.
N.11	System shall be integrated with FAP application for releasing the payment to the contractor/vendor for the approved work.
N.12	User shall have the provision to download the customized report with drill down and advance search feature.

Contract Management Module

0. Contract Management

This module shall be able to manage labour contract, transporter contract, miller contract, other service providers like gunny bags, gate securities, plumber or electric service or similar.

- | | |
|-----|--|
| 0.1 | System shall provide an interface to capture the basic details, bank details, firm detail or similar, of onboarded contractor/vendor. |
| 0.2 | System shall have an ability to manage (add/update/activate/deactivate) contractors' details including personal and business information. |
| 0.3 | System shall have the provision to share the required information with FAP system for payment related transactions. |
| 0.4 | System shall send automatic alerts and notifications on and before the date the contract is due for expiry to concerned users in FCI and contractors. System shall have the ability to auto deactivate the contractor as soon as the contract is over. |
| 0.5 | System shall have a mechanism for contract sourcing and management system. |
| 0.6 | System shall be flexible to generate the customized reports as per their requirements with incorporation of drill down and advanced search feature. |

User Management

P. User Management Module

This module shall be used for registration of users like FCI users, farmers, contractors, millers, vendors, and any other user. It shall also be used to manage profile management, profile picture or similar.

P.1	System shall be able to create new roles and provide role-based access control to users.
P.2	System shall have the ability to register different types of users and create unique login IDs and passwords. These users may be FCI users, farmers, millers, state agencies, vendors, and similar users.
P.3	Designated users shall be able to modify/discontinue roles and access rights for users already registered in the application.
P.4	System shall have an advanced search option for moving directly to related operations to be carried out by users.
P.5	System shall provide an edit option to rectify human errors with proper workflow/approval process.
P.6	System shall be provisioned for mapping miller with mandis/purchasing centre and remove the association with an existing miller, citing the reasons and notifying the Divisional Manager.
P.7	System shall have the provision to provide role-based access to the user and manage module's permission based on roles.

Mobile Application

Q. Mobile Application

A mobile application shall be developed with basic functionalities to process the core requirements/tasks of the different users and stakeholders specially operations of the core modules which are done inside and outside the depot.

Q.1	The application shall be ready to be used on Android and iOS operating system. Further, it shall be platform and device agnostic.
Q.2	The UI of the Mobile app shall be like the ANNA DARPAN application with limited necessary functionalities.

Q. Mobile Application

Q.3	Application shall allow user-based access to the functionalities such as procurement, movement, storage, quality, distribution, and other required modules.
Q.4	Application shall have the functionality to showcase the dashboards/reports.
Q.5	Application shall have feature to scan the encrypted QR codes/barcodes/RFID tags generated.
Q.6	This mobile application shall have the functionalities to generate, track and update tickets if needed, upload various documents such as images or similar
Q.7	Application shall have the ability to track and update the assets and inventory in real time.
Q.8	Application shall facilitate to the FCI users to create and record the inspection details on the go and real time alerts and notifications shall be provided.
Q.9	Application shall have 'offline option' to include network challenged geographies.

Labour Management**R. Labour Work Assignment and Monitoring**

This module shall capture the details of the task assignment, monitoring and work done for all 4 types of labour in a depot viz. departmental, DPS, NWNP and contractual, to facilitate payment accuracy and work distribution.

R.1	The system shall have provision to allocate gang for loading the stocks on to the truck by the shed in-charge.
R.2	The system shall have provision to modify the existing gang allocation for stacking the incoming stocks in the shed.
R.3	The system shall have provision to capture the labor attendance across each gang and maintain the attendance register.
R.4	The system shall have provision to view the attendance to determine the availability of labour for loading the stack.
R.5	The system shall have provision to allocate gang for loading the stocks on to the identified stacks by the shed in-charge.
R.6	The system shall have provision to view the utilization and work allocation of the gangs on a real-time basis.
R.7	The system shall have provision to capture the actual work done by the gang for payment and update the work register.

R. Labour Work Assignment and Monitoring

R.8	The system shall have provision to perform real-time synchronization of the work register data of all the gangs with FAP application daily for payment approval.
R.9	The system shall have provision to generate and print the work slips of each gang daily.
R.10	The system shall have provision to assign the work of gunny replacement and/or made-up to specific gang.
R.11	The system shall have provision to capture the actual work done by the gang for payment and update the work register.
R.12	The system shall have provision to pass on the work register data of all the gangs to FAP application daily for payment approval.
R.13	The system shall have provision to generate monthly utilization and payment report for each gang.
R.14	The system shall have provision to capture any regional variation of guidelines in allocation of gangs to stack/ shed/depot for the work distribution.
R.15	The system shall have provision to exclude the work allocation and work done daily by the contract labor in the Work Done register of the depot.
R.16	The system shall have provision to calculate the payment to be made to gangs based on the work slip captured in the sheds/railheads/sidings.
R.17	The system shall have provision to send the gang work related data to the finance system for approval of payment.
R.18	The system shall have provision to capture the payment approval for each of the work slips of the contract labour gangs.
R.19	The system shall have provision to compare the payment calculation at the depot level with the actual payment being approved for the contract labour gangs.
R.20	The system shall have provision to edit the work done by the gangs for adjustment to payments with proper approval and justification.

S. Labour Work Planning and Contracting

Labour work planning and contracting involves the process of organizing and managing the workforce required for a particular project or task. It includes determining the necessary labour resources, estimating the required number of workers, and creating a contract or agreement with the individuals or companies providing the labour services.

S.1	The system shall have provision to view the utilization and work allocation of the gangs on a real-time basis.
S.2	The system shall have provision to set up the guideline for automatic calculation of work done by the gang based on distance travelled (lead) and different height categories of the food grains stacking in the shed.

S. Labour Work Planning and Contracting	
S.3	The system shall have provision to forecast the work allocation and associated payments for the gangs in a depot based on the monthly movement plan.
S.4	The system shall have provision to map each of the gang numbers to compartment/stacks of a depot shed.
S.5	The system shall have provision to configure and update gang number and team size based on contract with the depot.
S.6	The system shall have provision to view the historical data for work allocation and work done by the different gangs within a depot.
S.7	The system shall have provision to view the history of payments being made to the different gangs.
S.8	The system shall have provision to prepare the plan for work allocation to gangs based on the procurement and movement plan at the depot level.
S.9	The system shall have provision to capture the details of new labour contracts for depots.
S.10	The system shall have provision to edit the details of existing labour contracts, as applicable.
S.11	The system shall have provision to notify the Depot Manager on expiry or renewal of existing contracts based on the contract dates.
S.12	The system shall have provision to maintain the performance history of different labour contractors.
S.13	The system shall have provision to maintain the rates and payment history of labour contractors.
S.14	The system shall have provision to capture the details of labor contracts for the railheads and sidings.
S.15	The system shall be able to generate work slips based on lead and height by mapping of layout of stack.

Dashboards

T. Dashboards	
A dashboard is a visual representation of key information, metrics, and data points that provide an overview of the performance and status of an application or system. When defining the functional requirements for a dashboard, consider the following:	
T.1	The dashboard shall be able to connect to relevant data sources, such as databases, APIs, or external systems, to retrieve the necessary data for display.
T.2	The dashboard shall present data in a visually appealing and easy-to-understand manner. This may include charts, maps, graphs, tables, gauges, and other visual elements that effectively represent the underlying data.
T.3	The dashboard shall allow users to customize the layout, choose the specific metrics and data they want to see, and configure their preferred visualization options.
T.4	Depending on the application's requirements, the dashboard shall be capable of displaying data in real-time or with minimal delay to ensure that users have the most up-to-date information.
T.5	The dashboard shall enable users to explore the underlying data in more detail by providing interactive elements that allow for drill-down capabilities, such as clicking on a chart to see a detailed breakdown or filtering options to refine the displayed data.
T.6	The dashboard shall have the ability to send automated alerts and notifications based on predefined conditions or thresholds. This shall include email notifications, in-app alerts, or push notifications to mobile devices.
T.7	The dashboard shall ensure that it is accessible and compatible across multiple platforms and devices to accommodate different user preferences and needs
T.8	The dashboard shall have the ability to handle large datasets efficiently and provide a responsive user experience, even when dealing with complex visualizations or heavy data processing.
T.9	The dashboard shall provide functionality to export dashboard views or specific data in multiple formats like PDFs, Excel files, or other commonly used formats. Additionally, allow users to share dashboard views or specific data with other users within the application.
T.10	The system shall include contextual help, tooltips, and documentation within the dashboard interface to assist users in understanding the available features, data interpretations, and navigation.
T.11	The dashboard shall be responsive and able to handle a growing number of users and data without significant performance degradation.
T.12	The dashboard shall be able to capture data such as FAP Efficiency Parameter, QCI Application for Monitoring of Depot Grading, WDRA Rating for Depot post integration with other applications.
T.13	The dashboard shall be able to show SL/TL regularization (storage loss/transit loss).

Reports

U. Reports	
Reports provide valuable information that supports decision-making processes. They present data in a concise and understandable format, enabling users to make informed choices based on the insights derived from the reports. Reports can assist in strategic planning, resource allocation, budgeting, or forecasting.	
U.1	The system shall provide the ability to generate reports based on predefined templates or custom configurations. Users shall be able to specify the desired data parameters, filters or similar.
U.2	The system shall include functions to aggregate, summarize, and calculate data within reports. This may involve calculations such as totals, averages, percentages, or other statistical measures.
U.3	The system shall generate present data in an easily understandable and visually appealing format. Use charts, graphs, tables, and other visual elements to effectively communicate the information contained in the report.
U.4	The system shall allow users to customize the layout, formatting, and presentation of the report and provide options for selecting specific data fields, applying filters, and defining sorting preferences.
U.5	The system shall enable users to schedule reports for automatic generation and delivery at specified intervals, such as daily, weekly, or monthly. This ensures that relevant stakeholders receive updated information on a regular basis.
U.6	The system shall provide the functionality to export reports in various formats, such as PDF, Excel, or CSV. Users shall be able to save reports locally, print them, or share them with others via email or other communication channels.
U.7	The system shall enable users to drill down into specific data points or sections within the report to gain more detailed insights.
U.8	The system shall optimize the report generation process to ensure fast and efficient data retrieval and processing, especially when dealing with large datasets or complex calculations.
U.9	The system shall have appropriate security measures to control access to reports, ensuring that only authorized users can view or generate specific reports. This includes authentication, role-based access control and data privacy considerations.
U.10	The system shall have the provision to generate reports based on the datasets available post integration with other applications.
U.11	System shall generate reports in metric tonne unit (MTs by default), with option for change in units like Quintal and KG.

Master Module**V. Master Management Module**

Through Master module data related to various commodity, commodity variety, commodity specification, assets, inventory, user roles, chemicals used in quality and preservations of food grains, gunny bags, and other related masters shall be created and managed.

V.1	System shall be able to provide role-based access control to users. Designated users shall have the access right to create new users and be able to modify/discontinue roles and access rights for users already registered in the application.
V.2	System shall provide the facility to attach/ detach the role(s) to any already registered user in the system.
V.3	System shall be able to create and maintain masters for various commodities along with its specification and variety.
V.4	System shall be able to define & manage organization structure including hierarchy across all offices at each level by defining name/ create of functions, sub-functions, and positions.
V.5	System shall be highly flexible to accommodate and incorporate any new policies / procedures / processes and its amendment.
V.6	System shall be able to download the masters' data in various formats like xml, xls and other similar formats.
V.7	System shall have provision to print the masters.

Analytics**W. Analytics**

The operations of data analytics involve data collection, data processing, data storage and data analysis using different algorithms and analytical techniques. Data shall be optimized to produce valuable insights, visualizations, and reports over large volume of data to meet the business objective and user need.

W.1	The system shall be able to consume/gather data from various sources, such as FCI internal applications, external systems, state portals and any other future application. System shall support data integration and extraction from different formats and structures.
W.2	System shall be capable of processing large volumes of data efficiently. This includes data cleansing, transformation, and aggregation to ensure data quality and usability for analysis purposes.

W. Analytics	
W.3	The system shall provide a robust and scalable data storage mechanism to store the processed data. This may involve using a data warehouse, data lake, or a combination of both, depending on the specific requirements.
W.4	The system shall offer intuitive interfaces and tools for users to explore and visualize data. It shall support various visualization techniques, such as charts, graphs, dashboards, and interactive reports, to facilitate data understanding and decision-making.
W.5	The system shall enable the creation and customization of reports and dashboards. Users shall be able to define key performance indicators (KPIs), set up alerts, and schedule automated report generation.
W.6	The system shall provision users to perform ad hoc queries on the data to answer specific questions or investigate anomalies. It shall support flexible query languages and provide fast response times for interactive querying.
W.7	The system shall ensure the security and privacy of sensitive data. This includes implementing access controls, encryption mechanisms, and compliance with relevant data protection regulations.
W.8	The system shall have the ability to integrate with other systems and tools within the organization's ecosystem. It shall provide APIs or connectors to enable data exchange and interoperability.
W.9	The system shall be scalable to handle increasing data volumes and user loads. It shall be optimized for performance to provide timely responses, even with complex analytical queries.
W.10	The system shall be able to process and analyse streaming data, providing insights and alerts in real-time and/or near real time.
W.11	The system shall support collaboration features, providing users to share insights, reports, and visualizations with other team members. It shall provide options for annotation, commenting, and version control.

11.2 Non-Functional Requirements

a. Generic:

- i. The application shall be browser and device agnostic and shall be able to run smoothly on internet.
- ii. The application shall have multi-lingual support for both web & mobile applications.
- iii. The application shall have the option to customize reports in run-time as per requirement of the user.
- iv. If data is pushed from backend, the application shall have validations to ensure that all front-end validations are applied thereon.
- v. The application shall be able to create token/record transactional data offline and later upload into the system when network is available.
- vi. The application shall be developed using Service Oriented Architecture principles wherever applicable.
- vii. The application shall be modular in nature and support addition of new features easily and shall also ensure easy scalability and extensibility through minimum effort.
- viii. The application shall be developed with loosely coupled wrapper-based architecture.
- ix. The application shall sync with central system dates and time (NTP) for all date transactions.
- x. The application shall be designed in a manner that operational data is not lost and can be recovered in case of any failure of equipment or communication network during disaster.
- xi. SI shall support implementation of appropriate data retention approach for the application that shall satisfy the requirements of the solution.
- xii. The application shall provide easy data migration from the existing internal/external applications to the new ANNA DARPAN.
- xiii. The application shall provide audit/log trail of system and solution deployment throughout the lifecycle.
- xiv. The application to provide provision of Digital Signature to ensure authenticity of the document.
- xv. The application shall be designed to function satisfactorily in low network bandwidth and shall have the capability to store transaction data in offline mode and push the same to central databased whenever connectivity is re-established, without having to stop the operations.
- xvi. The FAQ and user manual shall be available through respective portals for quick reference in addition to context-based help and video clips.
- xvii. The solution shall provide data dictionary along with the description of the objects, fields, and field types.
- xviii. The application shall be able to provide data migration capabilities in case of data structure change during transfer to new versions.
- xix. The solution shall be developed using a pluggable architecture so that additional modules can be added without changing the core application.
- xx. The solution developed (Web & Mobile) shall comprise of features that support differently abled users, ensuring inclusivity and accessibility. Features like Keyboard Accessibility, Screen Reader Compatibility, Alternative Text for Images, Captions and Transcripts, Form Validation and Error Handling or similar features may be incorporated to enhance user experience for the mentioned set of users.
- xxi. The application shall demonstrate usage of latest technologies like Artificial Intelligence, Machine Learning, Blockchain and similar technologies.

- xxii. SI shall be responsible for publishing the recent updates made available in the latest version of the ANNA DARPAN in form of release notes for the users.
- xxiii. The solution developed shall have capabilities to intimate users of any technical downtime activities (planned/unplanned) and any technical issues encountered.

b. Authentication and Authorization

- i. The application shall support Multi Factor Authentication methods for user log in such as Biometric system, PIN verification, voice recognition or similar methods to secure data and applications in the ANNA DARPAN.
- ii. The application shall develop Multi Factor Authentication for user log in on the android & iOS Mobile Application.
- iii. On authentication, the application shall provide access and authorization based on allowed roles for logged in user.

c. Exception Handling

- i. The application shall display meaningful error messages to the users when required.
- ii. The application shall maintain a list of various error codes and error messages. Error messages shall not include variable names, variable types, SQL strings, or source code.
- iii. The application shall be able to manage exceptional situation handling and shall have escalation/auto escalation mechanism.

d. Logging

- i. Audit trails and Audit logging mechanism shall be built in the application to ensure that user action can be established and can be investigated if any can be aided. (e.g., Logging of IP Address or similar actions).
- ii. All changes to configurable rules or master data shall be logged in the application.
- iii. All log files shall be maintained in a protected manner and backed up periodically to archive storage.

e. Integration

- i. The application shall provide support for batch and real time integration.
- ii. The application shall be capable of integrating to other applications in the food ecosystem by securely exposing data and functionalities.
- iii. The application shall have capabilities to integrate with Reporting and Statistical Tools.
- iv. The application shall have capabilities to integrate with other applications using plug and play approach via standardized APIs, data formats, communication protocols and interface contracts.
- v. The application shall have provision/capabilities to integrate with external devices like Weigh Bridges, AI Based Grain Analyzer and others as required.

f. Application Security

- i. The application security services shall cover the user profile management, authentication, and authorization aspects of security control.
- ii. The Application shall authenticate users and allow access to other features of the application for which the user is entitled to and at the same time shall also ensure data confidentiality and data integrity.
- iii. SI shall share the details of any tools and technologies to be used with FCI for whitelisting before using for the production.
- iv. SI shall implement protocols such as Lightweight Directory Access Protocol (LDAP) for internal as well as external users who shall be authenticated using protocols like OAuth 2.0 and Open ID access, where users can utilize their other IDs.
- v. SI shall develop a solution which shall be deployed on public internet. For network security, Intrusion Detection System (IDS) and an Intrusion Prevention System (IPS) shall be implemented by SI.
- vi. ANNA DARPAN design shall include an audit mechanism. Any Personal Identifiable Information (PII) data, such as email IDs, phone numbers or similar needs to be secured by applying encryption & anonymization processes.
- vii. The application shall have data security policies and standards based on the departments and systems.
- viii. The application shall provide role-based access for all the stake holders envisaged to access and use the system.
- ix. SI shall make sure that data shall be visible only to the authorized entity.
- x. Any of the Vulnerability Assessments (VA) shall be so robust that it meets 95% score.

g. Usability and Accessibility

- i. The solution shall have unified, easy, flexible, and user-friendly interface.
- ii. The application shall have self-descriptive navigation such as going backward or forward or similar.
- iii. Showing users where they are: Each presentation segment (page or window) shall provide the user with a clear and sufficient indication of where he or she is in the navigation structure and of the current segment position with respect to the overall structure.
- iv. Offering alternative access paths: Alternative access paths for navigating to a specific unit of content shall be offered to support different navigation strategies.
- v. Mobile application shall be compatible with new and old technologies. The mobile screen resolutions shall be automatically adjusted as per the device screen size.
- vi. Minimizing navigation effort: The number of navigation steps needed to reach a certain piece of content shall be minimized if different mental models, navigation strategies and tasks of the user are considered.
- vii. Vertical scrolling shall be minimized. This may be done by placing important information at the top and providing links to information that is further down the page. Horizontal scrolling shall be avoided wherever possible.
- viii. Minimizing user errors: Potential user errors as well as the effort needed to recover from errors shall be minimized.
- ix. Text quality: The quality of textual content with respect to spelling and grammar shall be sufficient so as not to impede readability.

- x. Writing style: The reading and understanding of the textual content on the screen shall be supported by suitable means, including the use of short sentences, the division of the text into shorter chunks or the presentation of content items in the form of bullet points.
- xi. Shall be used in such a way that it does not impair the visual skimming of the page. While white space is an important means of visually organizing the different content elements on a page, if the distance between the blocks of information displayed becomes too large, rapid skimming of the page can be impeded. Use of “white space”: “White space” on a page i.e., space filled only with the background colour.

12 Appendix – II: Change Requests

12.1 Proforma for Change Request Note (CRN)

Change Request Note:	CRN Number:

12.2 Change Request (CR) Man month Rate

Bidder shall provide a man month effort rate, which will be applicable in case of any change requests as per the T&C of this RFP. This will not be applicable for the evaluation purpose; however, the rate should not exceed the rate used for calculating the total cost.

***Note:**

- Selected bidder shall provide BOM (Bills of Material) for the price quoted for the bid.
- Any change request will be subject to the man-month rate of the year in which it occurs.
- An increment of 7% (maximum) may be considered while quoting the year-wise man month rates for the O&M phase.
- FCI reserves the rights to negotiate the quoted rates given by the bidder.

CR Man Month Rate	CR Man month Rate during development Phase	O&M Phase				
		1 st year	2 nd year	3 rd year	4 th year	5 th year
Years						
Total Cost (INR):						
Total Cost in Words:						

13 Appendix – III: Technical Bid Form

The bidders are expected to respond to the RFP using the forms given in this section and all documents supporting Eligibility Criteria.

Technical Bid shall comprise of following forms:

Forms to be used in Technical Bid

- a. Form 1: Letter of Bid
- b. Form 2: Power of Attorney for Authorized Signatory of the Bidder
- c. Form 3: Bidder Particulars
- d. Form 4: Compliance Sheet for Eligibility Criteria
- e. Form 5: Checklist of Documents
- f. Form 6: PBG (including e-BG)
- g. Form 7: Certificate for Turnover and Net Worth of the Bidder
- h. Form 8: Certificate for Experience
- i. Form 9: Project Citation and Declaration for Projects under NDA (Forms 9A and 9B)
- j. Form 10: Certificate for Manpower Resources
- k. Form 11: Proposed Solution and Proposed Bill of Material
- l. Form 12: Proposed Work Plan
- m. Form 13: Team Composition
- n. Form 14: Curriculum Vitae (CV) of members of the Core Team
- o. Form 15: Self-Declaration for Non-Blacklisting
- p. Form 16: Undertaking for Total Responsibility
- q. Form 17: Earnest Money Deposit (EMD) as Bank Guarantee (BG)
- r. Form 18: Declaration
- s. Form 19: Draft Contract Agreement
- t. Form 20: Undertaking for Cloud Service Provider (CSP)
- u. Form 21: Tender Acceptance Letter
- v. Form 22: Bid Security Declaration Form

13.1 Form 1: Letter of Bid

(To be provided on the Bidder's Letterhead)

Date:

To,
The Chief General Manager (IT)
Food Corporation of India
16-20, Barakhamba Lane,
New Delhi – 110001.

Subject: Submission of the Technical Bid for Design, Development, Implementation and Maintenance of ANNA DARPAN

Dear Sir/Madam,

We, hereby, offer to provide a turnkey solution to Food Corporation of India (FCI) involving the design, development, implementation and maintenance of an ANNA DARPAN with your Request for Proposal dated _____ and our bid. We are hereby submitting our bid, which includes the Technical Bid and the Commercial Bid submitted in separate folders.

We hereby declare that all the information and statements made in the Technical Bid are true and accept that any misinterpretation contained in it may lead to our disqualification.

We hereby declare that we are not ineligible under any of the following clauses:

- a. Bidder as on date of submission of this bid who has been blacklisted or otherwise debarred by FCI or any department of Central/State Government or any other Central/State PSU in the last three year shall be ineligible during the period of such blacklisting/debarment.
- b. Any bidder whose contract with FCI, or any department of Central/State Government or any other PSU has been terminated before the expiry of the contract period on account of breach of contract at any point of time during last three (03) years, shall be ineligible.
- c. Bidder whose Security Deposit have been forfeited by FCI or Central/State Government or any Central/State PSU/Statutory Corporation, during the last three (03) years, for breach of any terms and conditions shall be ineligible.
- d. If the proprietor/any of the partners of the firm/executive member of cooperative/any of the Directors of the bidder have been, at any time, convicted by a court of an offence and sentenced to imprisonment for a period of three years or more, such bidder shall be ineligible.
- e. While considering ineligibility arising out of any of the above clauses, incurring of any such disqualification in any capacity whatsoever (even as a proprietor, partner in another firm, executive member of cooperative or as director of a company or similar) shall render the bidder disqualified.
- f. Bidder is not blacklisted by GST authorities.

We agree to abide by the entire scope, instructions, timelines, deliverables, payment terms and contract terms and conditions and agree for unconditional acceptance of all the contents of the

RFP document and its subsequent corrigenda if any. We shall hold the terms of our bid valid for 90 days from the date of opening of Technical Bid. We understand that FCI reserves the right to extend this period by another 30 days at its discretion, which shall be binding on the bidders. Thereafter, this period may be further extended by the parties on mutual consent. Not keeping the offers open for the prescribed period shall lead to summary rejection of our bid.

In the event of our bid being accepted, we agree to furnish the PBG (including e-BG) as stipulated in the bid, within 15 (Fifteen) days from the signing of the contract.

We understand that in all matters regarding doubts raised by bidders on the clauses of the RFP, interpretation of clauses, scope, terms, and conditions or similar, as stated in this RFP and/or its subsequent corrigenda/addenda, if any, the decision of FCI shall be final and binding on us.

We understand that during implementation and detailed due diligence it may be required to vary the services of certain components under the scope of the bidder. We understand that there may be variations in services specified in the bids and such changes may be in the range of +10% of the specified bill of the services or lesser.

We understand you are not bound to accept any bid you receive.

Yours Sincerely,

Authorized Signature [In full and initials]

13.2 Form 2: Power of Attorney for Authorized Signatory of the Bidder

Tender No. _____

Date: _____

(To be executed on non-judicial stamp paper of the appropriate value in accordance with relevant stamp Act. The stamp paper to be in the name of the entity who is issuing the power of Attorney)

Know all men by these presents, We, (**name of the firm and address of the registered office**) do hereby irrevocably constitute, nominate, appoint and authorise Mr./Ms. (**Name**), son/daughter/wife of (**Name**) and presently residing at (**Address**) who is presently employed with us and holding the position of (**Position**), as our true and lawful attorney (hereinafter referred to as the "Attorney") to do in our name and on our behalf, all such acts, deeds and things as are necessary or required in connection with or incidental to submission of our bid for the project, "Selection of System Integrator for Design, Development, Implementation and Maintenance of ANNA DARPAN" proposed or being developed for Food Corporation of India (the "Authority") including signing and submission of all applications, bids, power of attorney and other similar documents and writings, participate in bidders' and other conferences and providing information/responses to the Authority, representing us in all matters before the Authority, signing and execution of all contracts including the Contract Agreement and undertakings consequent to acceptance of our bid, and generally dealing with the Authority in all matters in connection with or relating to or arising out of our bid for the said project and/or upon award thereof to us and/or till the entering into of the Contract Agreement with the Authority.

AND we hereby agree to ratify and confirm all acts, deeds and things lawfully done or caused to be done by our said Attorney pursuant to and in exercise of the powers conferred by this Power of Attorney and that all acts, deeds, and things done by our said Attorney in exercise of the powers hereby conferred shall and shall always be deemed to have been done by us.

IN WITNESS WHEREOF WE, _____, THE ABOVE-NAMED PRINCIPAL HAVE EXECUTED THIS POWER OF ATTORNEY ON THIS _____ DAY OF _____ 20____

For _____

Witnesses:

1.

2.

Accepted

Notarized

(Signature, Name, Designation and Address of the Attorney)

Note: Copy of Board Resolution to be attached stating the powers of the executants to authorize the concerned person to whom this power of attorney is being issued.

13.3 Form 3: Bidder Particulars

#	Particulars	Details
1	Bidder Name	
2	Office Address	
	Telephone Number	
	Fax Number	
	Mobile Number	
	Email ID	
3	Nature of the Firm i.e., whether Registered Partnership Firm/LLP, or a Private Limited Company, or a Public Limited Company incorporated in India.	
4	Names of Directors/members of Managing Committee of the bidder on the date of submission of Bid. (Separate sheet may be attached)	
5	Name of the contact person(s) authorized to sign tender documents	
	Telephone Number	
	Mobile Number	
	Email ID	
	Photo ID Card Type	
	Photo ID Card Number	
6	PAN of bidder (enclose a scanned copy of PAN Card of the firm)	
7	GST Registration Number (enclose a scanned copy of proof of GST registration number of the firm)	
8	EPFO Registration Number (enclose a scanned copy of proof of EPFO Registration Number of the firm), if applicable.	

#	Particulars	Details		
9	ESIC Registration Number (<i>enclose a scanned copy of proof of ESIC Registration Number of the firm</i>), if applicable			
10	Bank Account details of the bidders	Account Name		
		Bank Name & Branch		
		Account Number		
		IFSC		
11	Turnover and profit during the immediately preceding 3 years. (Enclose scanned copies of Audited Profit & Loss account & Balance Sheets) or similar	Year	Turn-over (INR Crores)	Profit (INR Crores)
		FY2022-2023		
		FY2021-2022		
		FY2020-2021		
12	Number of employees on payroll of organization			

13.4 Form 4: Compliance Sheet for Eligibility Criteria

The documents mentioned in this compliance sheet along with this form shall be used for verifying the eligibility of the bidders and shall form a part of the Technical Bid.

#	Eligibility Criteria	Documents Required	Compliance	Reference & Page Number
1	The bidder shall be a company, registered under Indian Companies Act, 1956/ Companies Act, 2013. OR A partnership firm registered under Indian Partnership Act, 1932. OR A partnership firm registered under Indian LLP act 2008.	Certificate of Incorporation	Yes / No	
		Copy of valid Registration Certificates	Yes / No	
2	The bidder must have: • PAN • GST Registration • EPFO Registration (if applicable) • ESIC Registration (if applicable)	PAN	Yes / No	
		GST Registration Number	Yes / No	
		EPFO Registration Number, if applicable	Yes / No	
		ESIC Registration Number, if applicable	Yes / No	
3	The bidder shall have a minimum of INR 500 Crores as annual turnover during the last three (3) financial years i.e., from 2020-21 to 2022-23 (as per the last published audited balance sheets) <i>[The turnover refers to the bidder's turnover and not the composite turnover of its subsidiaries/sister concerns]</i>	CA Certificate with CA's Registration Number and Seal *Note: For the year 2022-23, provisional certificate shall be accepted Please refer Form 7 of Appendix - III	Yes / No	
4	The bidder shall have a Positive net worth during the last three (3) financial years, i.e., from 2020-21 to 2022-23.	CA Certificate with CA's Registration Number and Seal Please refer Form 7 of Appendix - III	Yes / No	

#	Eligibility Criteria	Documents Required	Compliance	Reference & Page Number
5	Mandatory Undertakings: - Bidder shall not be insolvent, in receivership, bankrupt or being wound up, not have its affairs administered by a court or a judicial officer, not have its business activities suspended and must not be the subject of legal proceedings for any of the foregoing reasons. - Bidders, their directors, and officers shall not have been convicted of any criminal offence related to their professional conduct or the making of false statements or misrepresentations as to their qualifications to enter a procurement contract within a period of three years preceding the commencement of the procurement process, or not have been otherwise disqualified pursuant to debarment proceedings. - Bidder shall not have a conflict of interest in the procurement in question as specified in the bidding document. - Bidder shall be an individual organization. Consortium shall not be allowed. - Bidder shall comply with the Memorandum No. F. 13.6 Form 6: Performance Bank Guarantee (including e-BG)

(TO BE EXECUTED ON NON-JUDICIAL STAMP PAPER OF APPROPRIATE VALUE, PURCHASED IN THE NAME OF ISSUING BANK)

In consideration of the Food Corporation of India, _____ at _____ (hereinafter called FCI) having stipulated furnishing the security deposit in the form of Performance Bank Guarantee (including e-BG) under the terms and conditions of the Letter of Award No. _____, dated _____ made between FCI and M/s _____ (hereinafter called the Bidder/SI) to undertake design, development, implementation and maintenance of an ANNA DARPAN for FCI (hereinafter called the 'contract') for the due performance and fulfilment by the said Bidder/SI of the terms and conditions and obligations contained in the said contract, we **<Bank Name>**, (hereinafter referred to as 'the Bank') at the request of M/s **<Bidder Name>** do hereby undertake to pay on demand by FCI an amount not exceeding **<value in figures and words>**.

We, **<Bank Name>** do hereby undertake to pay the amounts due and payable under this guarantee without any demur, merely on a demand from FCI. Any such demand made on the Bank shall be conclusive as regards the amount due and payable by the Bank under this guarantee.

However, the Bank's liability under this guarantee shall be restricted to an amount not exceeding **<value in figures and words>**.

We undertake to pay to FCI any money so demanded notwithstanding any dispute or disputes raised by the bidder/SI in any suit or proceeding pending before any Court or Tribunal relating thereto our liability under this present being absolute and unequivocal.

The payment so made by us under this bond shall be valid discharge of our liability for payment there under and the bidder/SI shall have no claim against us for making such payment.

We, **<Bank Name>** further agree that the guarantee herein contained shall remain in full force and effect during the period that shall be taken for the performance of the said contract and for a period of 84 months from the date of issue of this Guarantee and that it shall continue to be enforceable till all the dues of FCI under or by virtue of the said contract have been fully paid & its claims satisfied or discharged or till FCI certifies that the terms and conditions of the said contract/RFP have been fully and properly carried out by said bidder/SI and accordingly, discharges this guarantee. Unless a demand or claim under this guarantee is made on us in writing on or before **<Date>** (84 months to be indicated) we shall be discharged from all liability under this guarantee thereafter.

We, **<Bank Name>** further agree with FCI that FCI shall have the fullest liberty without our consent and without affecting in any manner our obligation hereunder, to vary any of the terms and conditions of the said contract or to extend time of performance by the said bidder/SI from time to time or to postpone for any time or from time to time any of the powers exercisable by FCI against the said bidder/SI and to forbear or enforce any of the terms and conditions relating to the said contract and we shall not be relieved from our liability by reason of any such variation, or extension being granted to the said bidder/SI or for any forbearance, act or commission on the part of FCI or any indulgence by FCI to the said bidder/SI or by any such matter or thing whatsoever which under the law relating to sureties would, but for this provision, have effect of so relieving us.

This guarantee shall not be discharged due to the change in the Constitution of the Bank or the bidder/SI.

The guarantor hereby declare that it has power to execute this guarantee and the executant has full power to do so on its behalf under the proper authority granted to him/them by the guarantor.

We, <**Bank Name**> lastly undertake not to revoke this guarantee during its currency except with the previous consent of FCI in writing.

- a. We support <Bidder Name> to provide our cloud services listed below and related services to FCI for hosting the ANNA DARPAN application.
- b. We do hereby comply with all Statuary Acts/IT Acts/Applicable Acts of Government of India and amendments thereof and meet ever evolving Security Guidelines specified by CERT-In and meet any security requirements published (or published in future) by MeitY or any standards body setup/recognized by Government of India from time to time and notified by MeitY as a mandatory standard.
- c. We undertake to provide the support for the services for entire project duration (O&M phase and applicable extensions) commencing from the date of acceptance sign-off.
- d. We also certify that the below mentioned services being supplied by the <Bidder Name> meets the minimum specifications given in the RFP.

S. No.	Service Offering	Deployment Model	Remarks

Yours Sincerely,

Authorized Signature [In full and initials]

Name and Title of Signatory:

Name of Firm & Full Address:

13.21 Form 21: Tender Acceptance Letter

(To be given on Company Letter Head)

Date:

To,
The Chief General Manager (IT)
Food Corporation of India
16-20, Barakhamba Lane,
New Delhi – 110001.

Subject: Acceptance of Terms & Conditions of Tender.

Tender Reference Number:

Name of Tender/Work: _____

Dear Sir,

- a. I/We have downloaded/obtained the tender document(s) for the above mentioned 'Tender/Work' from the web site(s) namely:

as per your advertisement, given in the above-mentioned website(s).

- b. I/We hereby certify that I/we have read the entire terms and conditions of the tender documents from page number _____ to _____ (including all documents), which form part of the contract agreement and I/we shall abide hereby by the terms/conditions/clauses contained therein.
- c. The corrigendum(s) issued from time to time by your department/ organisation too has also been taken into consideration, while submitting this acceptance letter.
- d. I/We hereby unconditionally accept the tender conditions of above-mentioned tender document(s)/corrigendum(s) in its totality/entirety.
- e. In case any provisions of this tender are found violated, then your department/organisation shall without prejudice to any other right or remedy be at liberty to reject this tender/bid.

Yours Faithfully,

(Signature of the Bidder, with Official Seal).

13.22 Form 22: Bid Security Declaration Form

Date: _____

**To,
The Chief General Manager (IT)**

Food Corporation of India
16-20, Barakhamba Lane,
New Delhi – 110001.

Subject: Bid Security (Earnest Money Deposit) Declaration

I/We understand that, according to your conditions, bids must be supported by a Bid Securing Declaration.

I/We accept that I/We may be disqualified from bidding for any contract with you for a period of one year from the date of notification if I am /We are in a breach of any obligation under the bid conditions, because I/We

- a. have withdrawn/modified/amended, impairs, or derogates from the tender, my/our Bid during the period of bid validity specified in the form of Bid; or
- b. have been notified of the acceptance of our Bid by the purchaser during the period of bid validity
 - i. fail or refuse to execute the contract, if required, or
 - ii. fail or refuse to furnish the Performance Security, in accordance with the instructions to Bidders.

I/We understand this Bid Securing Declaration shall cease to be valid if I am/we are not the successful Bidder, upon the earlier of

- i. the receipt of your notification of the name of the successful Bidder; or
- ii. thirty days after the expiration of the validity of my/our Bid.

Signed: *(insert signature of person whose name and capacity are shown)*

in the capacity of *(insert legal capacity of person signing the Bid Securing Declaration)*

Name: *(insert complete name of person signing the Bid Securing Declaration)*

Duly authorized to sign the bid for an on behalf of: *(insert complete name of Bidder)*

Dated on _____ day of _____ (insert date of signing)

Corporate Seal (where appropriate)

(Note: *In case of a Joint Venture, the Bid Securing Declaration must be in the name of all partners to the Joint Venture that submits the bid***)**

14 Appendix – IV: Details of the Existing Application – Depot Online System (DOS)

14.1 Depot Online System (DOS) - Overview

Depot Online System (DOS), aligned with Digital India initiative of Government of India had been envisaged to automate the existing business processes and improve efficiency and transparency in FCI operations. Conceptualized in July 2014, the vision of the DOS project was to transform the food supply chain management through innovative use of Technology for ensuring transparency, reliability and efficiency of procurement, storage, and distribution operations.

DOS application provided various types of data visualization techniques to see key real time information. It had built as a decision support system to enable better and efficient operational decisions based on data and prevent leakages. The application had allowed top management to see key operational aspects centrally and help in better utilization of resources by enabling end to end visibility of supply chain operation up to the last mile of the operation i.e., stack level in a depot.

Note: Further details of the current application such as user manuals, Detailed Project Report (DPR), RFP for Implementation and others can be accessed via FCI website: <https://fci.gov.in/>

14.2 DOS Users at Different Levels

There are various users and stakeholders for the DOS application such as:

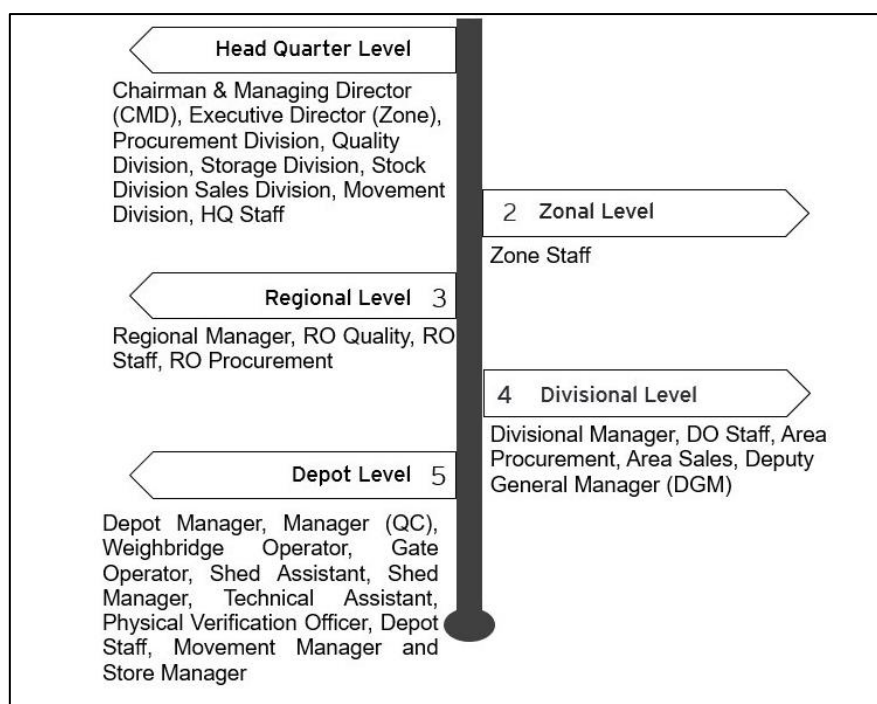

Figure 3: DOS Users at Different Levels

14.3 Overview of DOS Process Maps

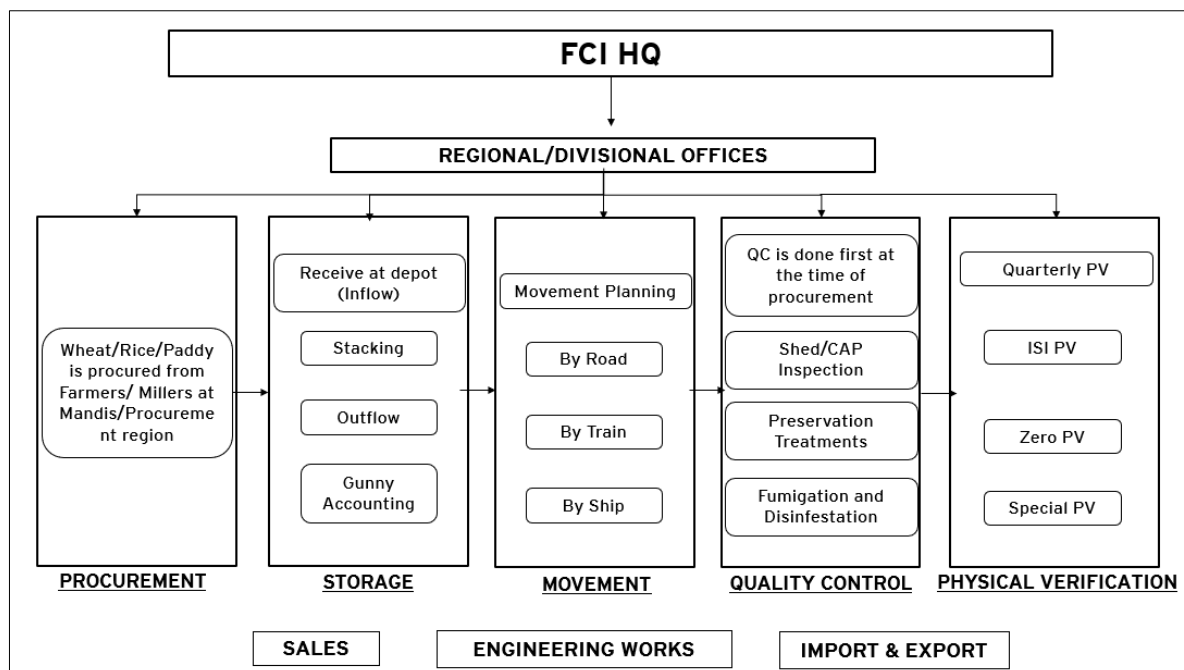

Figure 3: DOS Process Maps

Currently DOS has the following modules:

a. Procurement

FCI, the nodal central agency of Government of India, along with other State Agencies undertakes procurement of wheat and paddy under price support scheme. The procurement department deals with the end-to-end procurement process which involves various stakeholders at different stages of procurement.

This module involves various procurement features such as:

- Procurement Planning
- Procurement of Wheat/paddy/coarse grains
- Procurement of Rice (CMR)
- Receipt of Stock
- Road Transit Loss

b. Movement

FCI undertakes movement of food grains to:

- Evacuate stocks from surplus regions
- Meet the requirements of deficit regions for NFSA/ TPDS and Other Schemes
- Create buffer stocks in deficit regions

Movement of foodgrains is undertaken by Rail, Road, and Waterways. Around 80% of stocks are moved by rail to different parts of the country. Inter-State movement by road is mainly undertaken

in those parts of the country which are not connected by rail. A small quantity is also moved by water ways to Lakshadweep and Andaman & Nicobar Islands as well as through coastal shipping to Kerala, etc.

This module comprises of the following features:

- i. Movement Planning
- ii. Movement by Rail
- iii. Movement by Road
- iv. Movement by Ship

c. Storage

Storage plan of FCI is primarily to meet the storage requirement for holding stocks to meet the requirements of Public Distribution System (PDS) and Other Welfare Schemes undertaken by the Government of India. Also, buffer stock is to be maintained for ensuring food security of the nation for a minimum of 9 months. Adequate scientific storage is pre-requisite to fulfil the policy objectives assigned to the Food Corporation of India for which FCI has a network of strategically located storage depots including silos all over India.

This module deals with the following provisions:

- i. Stacking of food grains
- ii. Shed Outflow
- iii. Issue of Stock
- iv. Gunny Accounting
- v. Receipt of Fresh Gunny
- vi. Stock inflow and outflow

d. Quality Control

The foodgrains are procured as per laid down specifications of Government of India and are inspected regularly during storage to monitor the quality using various methods. Representative samples of the stocks are drawn for physical and chemical analysis to ensure whether the quality standard meets the parameters of laid down Specifications of Government of India.

This module comprises of the following features:

- i. Quality Check on receipt of the stock
- ii. Quality Check on procurement of wheat/paddy/rice
- iii. Disinfestation
- iv. Fumigation

e. Physical Verification (PV)

This module deals with physical verification of the depots which is done by designated teams on a quarterly or Annual basis. PV process includes weighment of the stocks and checking the dead stock inventory. The observations of the PV are captured in an PV report.

f. Sales

To achieve the food security of the country, the Sales Division looks after one of the most important operations i.e., distribution of foodgrains under TPDS/NFSA & Other Welfare Schemes. Government of India fulfils the objectives of food security through the Public Distribution System. Public Distribution System strives to meet the twin objectives of price

support to the farmers for their product and supply of foodgrains at affordable prices. It is against the stocks procured under price support; Government releases a certain quantity of foodgrains in each State under the Public Distribution System.

g. Engineering Works

This module takes care of the various engineering construction and maintenance works which are carried out throughout the year in FCI.

h. Import and Export

Import and Export module handles the work of Export and Import of foodgrains as per the guidelines, policy, and instructions of Government of India. Import and Export of food grains (mainly Wheat and Rice) and issue of stocks under various schemes of World Food Program/ Government aid on donation basis to other countries.

14.4 Current IT Infrastructure

Current DOS DC-DR Architecture

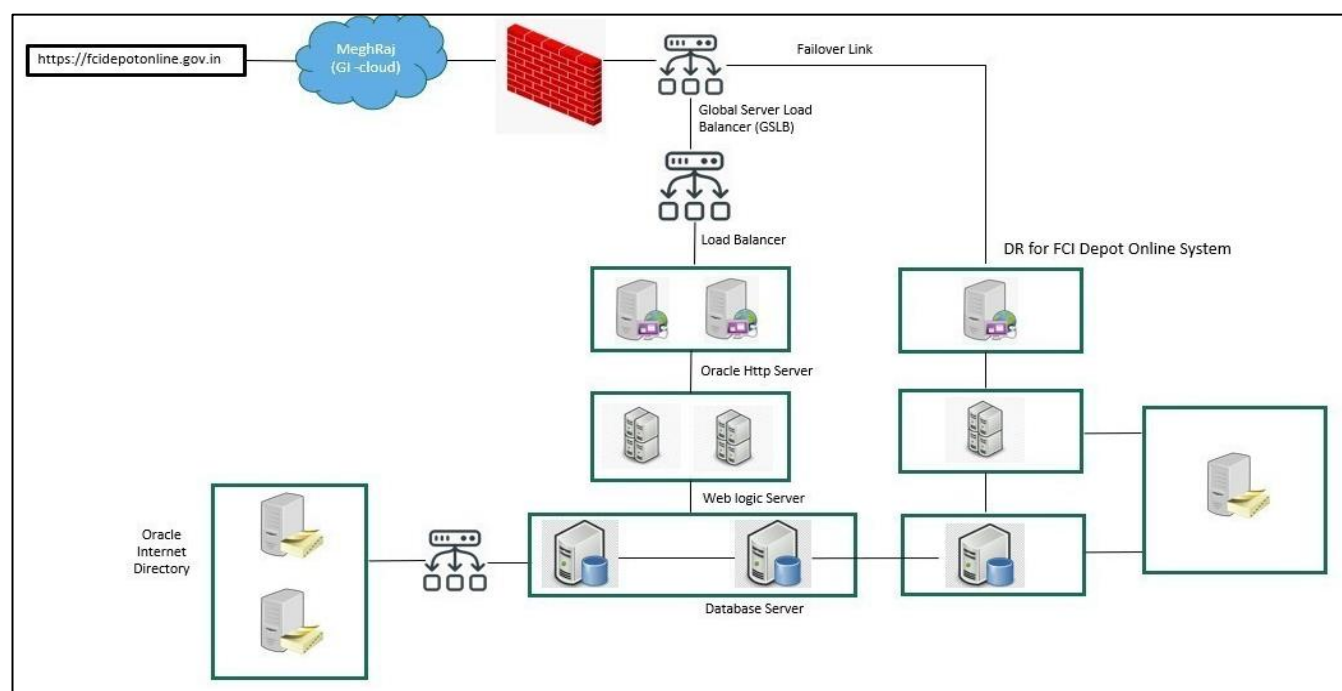

Figure 5: Current DOS DC-DR Architecture

In this architecture, Global Load Balancer distributes incoming network traffic to the DC-DR setup. At DC site, further a load balancer distributes incoming traffic to multiple section hosts, which are connected to application servers running on the WebLogic Server. The application servers are connected to the DB RAC Database, which is responsible for storing & managing application data. The architecture consists of highly available & scalable setup for hosting web applications, having:

- a. Two Identity Management LDAP servers with version 11.1.1.9,

- b. Two HTTP Web Servers with version 12.1.3,
- c. Two Enterprise WebLogic Application Servers with version 12.1.3, and
- d. Two DB Servers with Version 12.1.0.2.0 - 1 is for staging and 1 is for production.

The **Identity Management LDAP servers**, responsible for providing authentication & authorization services to other components of this architecture. The standalone server technical specification includes:

- a. 8 Cores and 32 GB RAM per virtual server
- b. 300 GB total storage allocated per virtual server

The **HTTP Web Servers** act as the front-end for the architecture, handling incoming web traffic and routing requests to the appropriate application servers. The standalone server technical specification includes:

- a. 8 Cores and 32 GB RAM per virtual server
- b. 300 GB total storage allocated per virtual server

The **Enterprise WebLogic Application Servers** host the actual web applications, serving up dynamic content for the current application (Front end software of DOS) & its application specific business logic. The standalone server technical specification includes:

- a. 24 Cores and 128 GB RAM per virtual server
- b. ~572 GB total storage allocated per virtual server

The **DB Servers** provide a backend database for the web applications to store and retrieve data. The standalone server technical specification includes:

- a. 24 Cores and 125 GB RAM per virtual server, either for production or staging
- b. ~1479 GB total storage allocated for Production virtual server
- c. 1425 GB total storage allocated for Staging virtual server

Approximately 4.0 TB of total infrastructure CLOUD storage is designated to this DOS DC architecture. This architecture entails in number of Oracle software Licenses for:

- a. Mobile Security Suite
- b. Identity and Access Management (LDAP)
- c. Web
- d. Database
- e. SOA
- f. Web

Note: This architecture infrastructure is however currently hosted in **NIC Data Centre** with the virtual machine instances configured with respective Oracle service Licences to surmount the architecture availability challenges.

14.5 Application Details

#	Item	Value
1	Total # of active users	• Approx. 15 user's login per Depot. • Total active Depots (owned & hired) approximately – 2500 <i>(a variation of 25% increase or decrease is expected in the future)</i> • Total User base approximately– 28000 <i>(User base is likely to get increased up to 60000 approximately for the new application)</i>
2	Concurrent Users	Approximately 10000 <i>(a variation of 25% increase or decrease is expected in the future)</i>
4	Maximum Hits in 24 hours	Peak Hours (Daily): 9 AM to 6 PM (Working Hours) Lean Hours (Daily): After 6 PM (Non-Working Hours) Total structured data in DOS (Approx.): 400 GB Total tables: 395
5	Dashboards	Java Springware Framework
6	Alerts	Parameters trigger the mail to hierarchy
7	Total number of reports at different level:	
	• Headquarters	91
	• Zone	25
	• Region	37
	• Division	31
	• Depot	146
8	Data	Total structured data in DOS (Approx.): 400 GB Total tables: 395

14.6 Current Technology Stack

The following table summarises the tools/technologies currently used in DOS ecosystem:

#	Element	Technologies
1	Frontend	Bootstrap HTML CSS
2	Backend	JDK 1.7
3	App Server	Oracle 12 c
4	Database	Oracle 12.1.0.2
5	Application IDE	JDK 1.7
6	Operating System	RHEL 7.9

Note: FCI currently has few Oracle licenses in possession.

14.7 Database Details

#	Item	Value
1	Data Base Size (Cloud Storage capacity)	4.0 TB approx.
2	List of Masters	43
3	Total # of tables	2999
4	Current data archiving policy	Enable Fra-size-50GB at same server filesystem

15 Appendix – V: Proposed Technology Stack/Solution Specifications of ANNA DARPAN

15.1 Container Platform

1. Proposed cloud service should offer managed service for container platform based on open-source stack (e.g., Kubernetes).
2. Proposed solution shall be 100% certified by the CNCF.
3. Proposed solution shall be open standard, enterprise grade with 24x7 support, updates, and upgrades for the project duration.
4. Proposed solution shall have capability to run both stateful and stateless applications.
5. Proposed solution shall provide auto pod scaling capabilities basis on real time compute utilization reported by pre-integrated out of the box fully supported monitoring solution without any dependency on external components.
6. Proposed solution shall support a private registry to push and pull container images to the cluster.
7. Proposed solution shall support inbuilt management, monitoring, observability.
8. Proposed solution shall have native integration with DevSecOps systems, including CI/CD tools, image scanners, registries, container runtimes and notification tools.
9. Proposed solution shall provide out of the box pre-integrated cloud native development capabilities using integrated development environment (IDE) tool. This shall enable developers to develop (write code), test and deploy application code using just a secure browser with zero dependency on local machines.
10. Proposed solution should also support serverless compute and service-mesh capabilities.
11. Proposed solution should offer managed service for container registry/repository to store container images.
12. Proposed solution must have image scanning feature for at the time of image upload as well as continuous image scanning to capture recent vulnerabilities.

15.2 API Management

1. Proposed solution should act as a reverse proxy to accept all application programming interface (API) calls, aggregate the various services required to fulfil them, and return the appropriate result.
2. Proposed solution should be highly available (minimum 99.95% availability) and scalable.
3. The proposed solution shall provide centralized web-based user interface to configure, manage and monitor APIs.
4. The proposed solution shall provide role-based access control (RBAC) to its user interface for configuring and managing the API services.
5. Proposed solution should authenticate the APIs before passing the data to backend component.
6. Proposed solution shall support multiple industry standard API authentication mechanisms e.g., API Keys.
7. Proposed solution should support a minimum of 5,000 transactions per second to manage peak load
8. Proposed solution shall be natively integrated with the proposed container platform solution and provide automated installation and management tools.

9. Proposed solution shall provide multitenancy support in a single centralized deployment.
10. Proposed solution should have support for exposing both public and private APIs (APIs accessible over private network only).
11. Proposed solution shall support configuring and exposing multiple versions of the APIs.
12. Proposed solution shall support mechanism to restrict from where the APIs can be accessed.
13. Proposed solution shall support end to end logging for APIs.
14. Proposed solution should support REST based APIs and be extensible for Websocket and HTTP APIs.
15. Proposed solution shall also accept request and response in REST/JSON format to integrate with external endpoints
16. Proposed solution shall have JSON and XML schema validation to validate the data and parameter type.
17. Proposed solution shall have the capability to independently autoscaling the API management platform according to the load.
18. Proposed solution should provide Auto-generated API documentation based on Swagger/OpenAPI specification files.
19. Proposed solution should allow mapping of APIs to custom domain names (e.g., FCI specific domain names).
20. Proposed solution shall handle all the tasks involved in accepting and processing of concurrent API calls, including traffic management, CORS support, authorization, access control, throttling/rate limiting, monitoring, and API version management.
21. Proposed solution shall provide a dashboard which is part of the Admin Portal to give quick, centrally located visibility into any traffic.
22. Proposed solution shall have provision for alerts & notifications to admins.

15.3 Enterprise Integration

1. SI shall either deploy an Enterprise Integration solution or shall use combination of CSP provided services/integration mechanisms for the integrations required.
2. Proposed solution shall have capability for TCP/IP or socket-based integration with legacy systems.
3. Proposed solution shall support complex mapping requirements.
4. Proposed solution shall allow easy integration with RESTful web services.
5. Installation procedure for various deployment architectures for the proposed solution shall be well documented.
6. Proposed solution must have a management console monitor and manage processes. This console shall be available via a modern web browser.
7. Proposed solution must support both synchronous and asynchronous integration flows.
8. Proposed solution/services should support multiple types of industry standard integration mechanisms e.g., API based, messaging based, FTP based, event based etc.

15.4 Enterprise Messaging

1. Proposed cloud service should offer managed service for queue-based messaging preferably based on open-source solution.
2. Proposed solution should support high availability and scalability.
3. Proposed solution must have a management console to monitor and manage processes. This console shall be available via a modern web browser.
4. Proposed solution shall provide automatic security patches.
5. Applications developed using the proposed solution shall be able to communicate by sending & receiving messages.
6. Proposed solution shall be designed to handle messages from multiple sources and shall support multiple consumers.
7. Proposed solution shall support at least once delivery of message.
8. Proposed solution shall support connectivity from messaging client programs written in multiple languages such as Java, JavaScript, C, C++, Python, Ruby, .Net.
9. Proposed solution shall support automation of configuring, deploying and securing access to topics, queues, users, messaging clusters and components.
10. Proposed solution shall have configurable retention period.
11. Proposed solution shall support collection and display of metrics either via in-built mechanism or via custom mechanism/tools.

15.5 Single Sign-On

1. SI should provide customer identity and access management (CIAM) solution to manage application users who will be accessing proposed FCI application.
2. Proposed solution must support implementation of SAML 2.0 Identity Provider and SAML 2.0 Service Provider for authentications based on SAML 2.0.
3. Proposed solution must be able to provide user federation by integrating with external identity providers using SAML and OIDC.
4. Proposed solution must provide an admin console for central management of users, groups, roles, role mappings etc.
5. Proposed solution must provide theme support by supporting customization of all users facing pages to integrate with other applications and branding.
6. Proposed solution must provide an account management console that allows users to centrally manage their account.
7. Proposed solution must support Two Factor Authentication and Time-Based OTP (TOTP).
8. Proposed solution shall support secured communication between different components using SSL.
9. Proposed solution shall support session timeout for idle sessions.
10. Proposed solution must provide client adaptors/SDK for JavaScript, Java, PHP, Python, .NET etc.
11. Proposed solution shall support single log-out (i.e., logging out user from a specific device) and global log-out (i.e., logging out user from all the devices.) as applicable for the proposed solution.
12. Proposed solution shall support end to end logging, auditing, and monitoring for activities.

16 Appendix – VI: Overview of other FCI applications

16.1 CFPP (Central Foodgrains Procurement Portal)

The CFPP is designed to view a consolidated picture of all the procurement done by FCI and state agency. Department of Food & Public Distribution (DFPD), GoI has envisioned this application ecosystem, wherein the MSP procurement done by government agencies is available at a single source by integrating all State procurement management portals. CFPP has been put in place with effect from Kharif Marketing Season (KMS) 2021-22. The sole objective of CFPP is to monitor the consolidated details for strategic decision making. CFPP has shared a holistic picture of national level procurement to state and district level view of data.

CFPP Integrations with other applications

Currently CFPP portal is not integrated with any of FCI applications. Data is pushed by state portals in CFPP database using APIs. URL: <http://cfpp.nic.in/>

Mainly following data points are covered in the dashboards at the national level

- | | |
|--|---|
| a. Farmers Registered | h. Farmers - Cultivation Category (Owned land, leased land, rented land or similar) |
| b. Farmers Benefitted | |
| c. Quantity Procured | i. Farmers - Land Ownership Category (Small, medium, large, or similar.) |
| d. MSP Benefitted Farmers | |
| e. MSP Payment Made | |
| f. No. of Procurement Centers Planned and Transacted | |
| g. No. of Agencies Planned and Transacted | |

Current Tech Stack:

#	Element	Technologies
1	Frontend	JSP
2	Backend	Java
3	Database	PostgreSQL – 13.4
4	Operating System	Red Hat Enterprise Linux Server Version=7.9 (Maipo)
5	Virtualization	VMware

16.2 CFSP (Central Foodgrains Storage Portal)

The CFSP is a central portal for online storage management in all FCI (owned and hired) and State Government (owned and hired) across the country to ensure adherence to SOP compliance for storage godowns. CFSP shall help streamline the storage management practices and bring the uniformity across the country.

Objective of the CFSP is to get the real time data of storage availability in FCI and State godowns. This shall help to see the real time current availability of stocks and storage capacity.

CFSP Integrations with other applications

Currently CFSP is not integrated with any of FCI applications. Data is pushed by state portals in CFSP database using APIs. URL: <http://cfsp.nic.in/>

Following data points are showcased in the dashboards:

- Total # of depots of FCI, CWC, SWC, State Govt., PEG, and any other depots
- Total storage capacity utilized in depots of FCI, CWC, SWC, State Govt., PEG, and any other depots
- Total available capacity utilized
- Pool-wise Stock
- Commodity-wise Stock
- Issue/Receipt at Depots
- Storage/Transit Loss and Gain

State and District wise reports can also be generated form the portal.

Current Tech Stack:

#	Element	Technologies
1	Frontend	JSP
2	Backend	Java
3	Database	PostgreSQL 14.2
4	Operating System	Red Hat Enterprise Linux Server Version=8.5(Ootpa)
5	Virtualization	VMware

16.3 FAP (Financial Accounting Package)

FCI envisioned Financial Accounting Package (FAP) in 2013 with a scope to monitor and manage all finance related activities undertaken, involving Invoice processing, Bill Tracking, Employee Salary Transfer along-side involving payments to entities viz. farmers, contractors, suppliers, and other similar entities. It has practical usage in all the administrative offices of FCI, whereby a FAP Nodal Officer is assigned for managing the payments.

The prime objective of Financial Accounting Package as an IT system is to improve the efficiency in the operations across all administrative offices of FCI (Headquarters, ZOs, ROs and DOs) incorporating automation and integration of finance, treasury, inventory, purchase, and payroll functions of the entire organization.

Current Tech Stack:

#	Element	Technologies
1	Frontend	APPS: Oracle E-Business Suite R12.2.9
		BTS: Spring mvc, Java1.8
		CPF Self-Service: Spring mvc, Java1.8
		Energise Payroll: Struts1.1, Java1.8

2	Backend	Oracle 19C, Application 12.2
3	App Server	2 Primary / 2 DR Servers
4	Database	19C
5	Application IDE	BTS and CPF: Spring mvc
		Apps: EBS
		Payroll: Struts 1.1
6	Operating System	Oracle Linux 64 bit
7	Reporting	Apps: Standard and customised both
		Payroll, CPF and BTS: Customised Reporting
		Dashboard: ECC (Under Development)

16.4 **HRMS (Human Resources Management System)**

The Human Resources Management System (HRMS) is a suite of software applications used to manage human resources and related processes throughout the employee lifecycle. It enables the management of several HR functions using information technology. The HRMS aims to improve the productivity and efficiency of the business through the automation of manual and repetitive tasks. This, in turn, also frees up the time which can then be used to address more strategic, business-critical tasks.

HRMS Integrations

Currently HRMS is integrated with FAP. Transactional data is shared manually with FAP to process the salaries and other compensations. There is no automatic sharing of data available between the applications.

Current Tech Stack:

#	Element	Technologies
1	Frontend	Open-Source PHP Micro-Framework by Laravel
2	Backend	Lumen tech
3	Database	MySQL
4	Reporting	Graylog

16.5 **VLTS (Vehicle Location Tracking System)**

Vehicle Location Tracking System (VLTS) is used for live tracking and tracing movement history of the vehicles engaged in transportation of FCI foodgrains in the country. Various alerts and notifications are generated for different events to intimate users for the tracking of vehicle movement like route diversion, vehicle not moving, trip not started from the scheduled source, trip not reached to scheduled destination or any other.

VLTS is **integrated with ULIP** to consume the vehicle key parameters like vehicle registration, insurance details and PUC details, etc.

VLTS application supports **role-based access** which is dependent on the user hierarchy.

Current Tech Stack:

#	Element	Technologies
1	Application Server	Redhat
2	Web Server	Apache
3	Language	PHP, Nodejs
4	Database	Postgres

16.6 QMS (Quality Management System)

Quality Management System (QMS) is a digital system which shall capture key transactions at depot level for sampling and testing to have a complete visibility of the field level operations of FCI depot/go-downs. This application is envisioned to trace batchwise information on samples and help in monitoring various lab activities on real time basis, which shall assist in better operational planning, quality control of foodgrains as well as quality assurance to consumers and regulatory bodies, bringing more transparency in the system.

PART B – COMMERCIAL BID

17 Commercial Bid

17.1 Form A: Commercial Bid Covering Letter

Date:

To,

The Chief General Manager (IT)

Food Corporation of India

16-20, Barakhamba Lane,

New Delhi – 110001.

Subject: Submission of the commercial bid for design, development, implementation, and maintenance of ANNA DARPAN

Dear Sir/Madam,

We, the undersigned, offer to provide the design, development, implementation, and maintenance of ANNA DARPAN in accordance with your Request for Proposal dated _____ and our bid (Technical and Commercial Bids). Our attached commercial bid is the final quote for evaluation. This amount is inclusive of all taxes, duties, fees, and levies etc., except GST.

1. PRICE AND VALIDITY

- a. All the prices mentioned in our bid are in accordance with the terms as specified in the RFP documents. All the prices and other terms and conditions of this bid are valid for a period of 90 days from the date of opening of the bid and can be further extended to a period of 30 days, if required by FCI. Further extension of validity shall be based on mutual consent of all parties concerned. Not keeping the offers open for the prescribed period shall lead to summary rejection of my/our bid.
- b. The quoted price shall remain firm through the period of the contract.
- c. We understand that the actual payment shall be made inclusive of all taxes, duties, fees, levies, and surcharges etc., (or any other taxes) except GST.

2. UNIT RATES

We declare that the unit rates given in the relevant forms enclosed are indicative. However, the entire scope of work shall be carried out by us as at the total quoted value given under Form B of Commercial Bid Forms.

3. UNCONDITIONAL ACCEPTANCE

We declare that all the services shall be performed strictly in accordance with the RFP documents and its subsequent corrigenda and agree for unconditional acceptance of all

contents of the RFP document and its subsequent corrigenda, irrespective of whatever has been stated to the contrary anywhere else in our bid.

4. TENDER PRICING

We further confirm that the prices stated in our bid are in accordance with your instruction to bidders included in RFP documents and its subsequent corrigenda.

5. BID PRICE

We declare that our bid price is for the entire scope of the work as specified in the **Section 3** of this RFP and any subsequent corrigenda. These prices are indicated in the Commercial Bid attached as part of the bid.

6. PERFORMANCE BANK GUARANTEE (including e-BG)

We hereby declare that in case the contract is awarded to us, we shall submit the Performance Bank Guarantee (including e-BG) for totaling to 10% of project award value as specified in the **Form-6 of Appendix – III** of this RFP documents.

Our commercial bid shall be binding upon us, up to expiration of the validity period of the bid. We hereby declare that our bid is made in good faith, without collusion or fraud and the information contained in the bid is true and correct to the best of our knowledge and belief. We understand that our bid is binding on us and that you are not bound to accept any bid you receive.

Yours Sincerely,

Authorized Signature [In full and initials]

Name and Title of Signatory:

Name of Firm:

Full Address:

17.2 Commercial Bid Template

Instructions

- a. Bidder shall provide all prices as per the prescribed format and shall not leave any field blank. In case the field is not applicable, Bidder shall indicate “0” (Zero) in all such fields.
- b. Bidder shall refer to the RFP for details on the requirements for each cost component. FCI shall not pay any additional amount for any missing item(s) which is deemed to be necessary for the successful rollout of the project.
- c. Prices shall be entered in Indian Rupees (INR) ONLY.
- d. Price bid evaluation shall be done on the total bid cost.
- e. FCI reserves the right to ask the bidder to submit proof of payment against any of the taxes, duties, fees, and levies indicated.
- f. The bidder shall ensure that the quoted prices for all software components shall be valid for the entire period of the contract and without any additional operational and maintenance charges for the same.
- g. In case of extension of the contract, SI shall ensure the validity of all components required in the extended period also.

17.3 Form B: Commercial Bid Form

Name of the Bidder/Bidding Firm:			
<u>PRICE SCHEDULE</u>			
<i>(This template must not be modified/replaced by the bidder and the same shall be uploaded after filling the relevant columns, else the bidder is liable to be rejected for this tender. Bidders are allowed to enter the bidder's name and values only)</i>			
a. The bidder shall quote Consolidated Fee (inclusive of all taxes, duties, fees, and levies etc., except GST) as applicable. b. Rates quoted in any other manner than the above shall be summarily rejected. The quoted rates shall remain firm throughout the tenure of the contract and no revision is permissible for any reason. c. In case of any discrepancy/difference in the amounts indicated in figures and words, the lesser quoted amount shall prevail and shall be considered. d. The fee shall be quoted in INR only.			
Note:			
a. The below quoted total rate comprises the cost for entire scope of work as mentioned in RFP and shall be considered as final for the purpose of bid evaluation. b. The details mentioned in the sheet shall form indicative rates and used for future references.			
Instructions: Bidder must include cost for training materials, other logistics, or any other related cost as required shall be borne by bidder			
S. No.	Item Description	Reference	Total Amount Exclusive of GST (in INR)
1	Price for Design, Development, and Implementation of ANNA DARPAN	Section #17.3.1	
2	Price for Operation & Maintenance of ANNA DARPAN	Section #17.3.2
